paying debt share

Bosnia-Hercegovina could become a member of the World Bank within months, before paying its share of former Yugoslavia's debt, which has blocked its membership and access to fresh loans. Officials hope the remaining obstacles to Bosnia's membership can be cleared by the time international donors meet again early in April. Bosnia is responsible for \$850m of former Yugoslavia's debt to the World Bank, of which \$455m is overdue. Page 16

Deal on Austrian deficit: The main obstacle to formation of a new Austrian coalition government was removed when the ruling Social Democrats and the conservative People's party agreed on an austerity package. The package will cut the budget deficit by Sch100bn (\$9.5bn) over the next two years. Page 16

Investors looking to Asia: Asia, excluding Japan, is set to overtake western Europe in the next five years as the most popular destination for foreign direct investment, according to a survey of managers and business experts. Page 5

'Rail renaissance' urged by Kinnock

A "railway renaissance" to curb congestion and save lives and the environment across Europe was urged by European Union transport commissioner Neil Kinnock (left). He called for firmer pricing policies which would make different types of transport reflect the true cost of accidents, pollution and

Dublin fights fraud fine: The Irish Republic has launched a diplomatic offensive to persuade tha European Commission not to impose a £100m (\$154m) fine for a string of irregularities in the Irish meat market. Page 3

Claim on smoking danger: A former executive of a US arm of Britain's BAT Industries claimed his employers had long known cigarettes were addictive and damaging to smokers' health, but concealed the evidence from the public. Page 7

EU energy liberalisation in doubt: Plans to liberalise the European Union's energy markets could be abandoned if member states cannot agree over the next few months how to inject competition into the sector, energy commissioner Christos Papoutsis said. Page 3; Emu still on the cards.

Tokyo housing loans crisis known in 1991: The Japanese government's attempts to win parliamentary approval for a Y685bn (\$6.7bn) bailout of were set back by the disclosure that the Finance Ministry had been aware of the problem in 1991, but had failed to act. Page 6

Floofing industry faces change: A radical restructuring of European roof tile and brick industries could follow the decision by Redland, a leading UK building material company, to conduct a strate-gic review of its businesses. Page 23

SBC Warburg, the merged investment banking business of Swiss Bank Corporation and S.G. Warburg, has cut its analysis of US companies from about 10 sectors to five. Page 10

3M meets expectations: Minnesota Mining & Manufacturing, the US industrial group which plans to spin off its data storage and imaging activities, reported fourth-quarter earnings in line with expectations brought down by last month's profits warning. Page 20

Virgin, UK leisure and travel group, is in talks with European Belgian Airlines, the low-cost air-line, about taking a majority stake. Page 17

Boost for HK planned: Hong Kong's financial watchdog, the Securities and Futures Commission, wants to tackle growing overseas concern on the colony's switch to Chinese sovereignty with measures to improve trading conditions. Page 17

Oil platform to be recycled: Shell UK announced that the 6,000-tonne Leman BK platform in the southern North Sea would be removed to a location on land for recycling and disposal.

Brazil bus crash kills 32: Thirty-two people were killed and 19 injured when a truck loaded with logs hit a bus in north-eastern Brazil.

Lean sales: McDonald's, the fast food company, is dropping its low-fat hamburger - tha McLean Deluxe - in the US. The company said customers wanted "heartier, more satisfying menn items".

Bosnia could join 3,000 jobs to be cut at Grundig European World Bank before 3,000 jobs to be cut at Grundig carmakers

By Wolfgang Münchau in Fürth and Ronald van de Krol Restructure is last-ditch move to achieve a return to profits after \$416m net loss Grundig, the German consumer

electronics group, is to shed 3,000 jobs, more than a quarter of its workforce, in a last-ditch attempt DM330m. Mr Pieter van der Wal, to achieve a return to profit in an a Philips manager who took over as chairman of Grundig last week increasingly difficult market,
Most of the job cuts will occur (February 1), said the 1995 loss in Grundig's German operations, especially around the Nuremberg stemmed from an overoptimistic assessment of sales, a drastic region in Bavaria, where the shortfall in final-quarter sales company has its headquarters. and an uncompetitive cost base. The decision was taken at a Philips said its 1995 results would include an extraordinary charge of Fl 300m (\$182m) to meeting of the company's supervisory board and was accompancover Grundig's restructuring provision of DM270m. Philips' ied by demonstrations outside

The restructuring measures at Grundig, controlled by Philips of 1995 results are scheduled to be released on February 15. The Grundig supervisory board also announced a change to the contractual relationship between Philips and Grundig. From 1997

onwards, Philips will no longer assume responsibility for Grundig's losses, a move that will put Grundig on a more independent footing and may even pave the way for Philips to sell its 32 per

cent stake in Grundig. However, Mr Christian Schwarz-Schilling, a former German telecommunications minis-ter who is now the supervisory board chairman of Grundig, said Philips had no intention of pulling out of its German subsidiary. He added the decision to put the company on an independent footing had been a precondition for agreement to continue in his

Mr van der Wal said he planned no significant changes to Grundig's product portfolio. which he described as excellent. The company suffered a sharp

downturn in the German con-

sumer electronics market, which fell by 10 per cent last year. The final quarter, and especially the Christmas season, had been particularly weak. Mr Schwarz-Schilling said Grundig had adopted a conservative approach for the current

year, with a sales forecast broadly in line with the 1995 turnover of DM3.5bn. The restructuring measures follow a long series of job cuts at

the company which in the 1970s employed 40,000, and whose workforce is now destined to fall to 8,400.

Mr Gerd Lobodda, deputy supervisory board chairman and a representative of the company's workforce, said the planned cuts would be harder than previous

restructuring measures.
"In the mid-1980s, when Grundig cut its staff by over 2,000, we were able to solve this problem without compulsory redundan-cies," he said. "This is going to be an ecormous labour market problem for the Nuremberg eion."

However, Mr Lobodda said there was is a chance to minimise or even exclude compulsory redundancies through special subsidised forms of short-time

the factory gates.

By Michael Skapinker

The US yesterday rebuked Japan for hosting a meeting of Asian countries to rally protectionist sentiment by demonising US carriers and policies" on aviation.

Mr Mark Gerchick, US deputy assistant transportation secre-tary, said the US was concerned about Japan's reported insistence in Kyoto last week that it would accept aviation liberalisation only where it was "gradual. orderly, progressive and safe-guarded."

Mr Gerchick, who was speaking in Singapore, called the Kyoto meeting a transparent attempt to criticise US moves to liberalise aviation. He added: We are told now that the Kyoto meeting was simply a gathering to enhance regional co-operation. not a closed effort to promote a protectionist aviation consensus. "But some may still be left

to wonder. To use an old American saying: if it walks like a duck and talks like a duck, it's probably a duck." He said that Japan's attitude was not typical of all Asian

countries. The US last year concluded liberalising aviation agreements with Hong Kong. India, China, the Philippines, Thailand and Macao Mr Gerchick told the FT

conference on Commercial Aviation in Asia-Pacific that Japan the Asia Pacific Economic Co-operation forum from the meeting, including the US, Canada and Hong Kong.

His attack came on the same day that the US and Japan resumed negotiations in Tokyo over air cargo rights. Tokyo is complaining that US airlines have a disproportionately large share of routes through Japan to fast-growing and profitable Asian

The US attack on Japan was criticised by Mr Richard Stirland, director-general of the Orient Airlines Association, which represents Asian carriers

Mr Stirland told the conference: "It is quite legitimate for Japan Airlines to talk of 'an American problem'." He said the problem was that United Airlines of the US was insisting on increasing the number of flights it could make from Japan to third countries. Other US airlines, however, such as American Airlines and Delta Air Lines, were concentrating on what Mr Stirland saw as the more realistic effort - to increase traffic between the US and Japan.

Mr Stirland said: "You cannot impose on highly important but deeply conservative countries, such as China, Japan and India, philosophies which are totally alien to their way of thinking."

carmakers braced for poor sales

By Haig Simonian, Motor Industry Correspondent,

Europe's leading carmakers are bracing themselves for a poor year because of severe overcapa city and expectations of stagnant

demand in many markets. Mr Helmut Werner, chairman of Mercedes-Benz, said vesterday that the industry was "heading into a very difficult year" because of poor demand in

Europe for new cars. He forecast new car sales in Europe would rise by only 1 per cent this year, in an interview with Financial Times Television at the World Economic Forum in

Davos, Switzerland.
The disappointing outlook for the industry follows a dismal

truck sales _ Fiat chooses Poland GM opens doors on Internet

1995, when new car sales rose by just 0.6 per cent to 12m units, compared with a peak of 13.5m units in the early 1990s.

Manufacturers' pessimism follows poor figures recorded last December, when sales fell by 7.7 per cent compared with a year earlier - one of the highest monthly drops of 1995.

Last year's depressed sales per-formance came in spite of a wideranging government incentiva scheme to simulate new car sales in France - where registrations fell by 2.1 per cent to 1.93m units and unprecedented financial incentives to boost demand.

The European Automobile Manufacturers' Association (Acea) blamed last year's poo sales figures on high memploy ment in parts of Europe, as well as low economic growth and high debt levels in certain countries.

Some manufacturers have been predicting an improvement this year as economic conditions improve. Mr Giorgio Garuzzo, the chief operating officer of Fiat, said he expected sales to rise by between 3 per cent and 4 per cent

premier rejects FDP's tax plan

By Judy Dempsey in Sertin

Mr Edmund Stoiber, the state premier of Bavaria, which is dominated by the Christian Social Union, the sister party of Chancellor Helmnt Kohl's Christian Democrats (CDU). yesterday criticised the government's plans to reduce a surcharge used to finance the rebuilding of east Germany.

Mr Stoiber, who is known for his independent views on many issues, including ecooomic and monetary union, said the liberal Free Democrats (FDP) had no idea what hudgetary pressure the states

were facing.
The FDP has heen at the forefront of the campaign to reduce the solidarity tax, a surcharge on taxed income reintrodoced in Janoary 1995 to finance the costs of restructuring the east German ecooomy. The tax will be reduced from the current 7.5 per cent to 5.5 per ceot of taxed income, starting in July 1996, and will be the equivalent of DM20 (\$13.80) for the average taxpayer. The shortfall of DM4hn will he met hy the states relinquishing a share of receipts from value added taxes, a decision which has enraged the states.

Mr Stolher said Bavaria would have to give up DM450m of value added tax revenues to finance the soli-darity tax cut and would be forced to introduce savings as a result. His remarks could galvanise even more opposition, particularly from the CDU-run governments in eastern Germaoy which have roundly condemned any reduc-tion of the tax because they claim it woold leave them financially worse off,

Among the opposition Social Democrats (SPD), Mr Johannes Rau, state premier of North Rhine-Westphalia, Germany's most populous state, accused the government of using the tax reduction to shore np the FDP in its attempt to get re-elected during next month's three state elections. Mr Ran also rounded on the government for its programme for jobs announced last week, and which will be debated in the Bundestag on Thursday.

But the FDP appears undannted by the criticism. Mr Guido Westerwelle, general secretary of the FDP, said there would be "no it's or huts" over any attempt by the gov-ernment to bow to pressure from its owo coalition or from the SPD to postpone reducing

the solidarity tax. He also said the liherals inteod to put sweeping tax cnts at the centre of their political agenda despite mounting resistance to the party's receot success in trimming the unpopular solidarity

Mr Westerwelle said the FDP would press ahead in its campaign for lower taxation, with the aim of hringing down tax and social welfare contrihutions to a third of the average income. Currently more than 19 per cent of the avergae German's income - excluding tax deductions - is siphoned off for the state health, unemployment and pensions funds. He added that contributions for high earners should not exceed 50 per cent of income.

Meanwhile, industrial production for December was strooger than expected with a monthly iocrease of 0.6 per cent. Manufacturing rose 2.1 per cent compared with the previous month. But construction fell 9.9 per cent, a decline exacerbated by the very cold weather, while energy ontput climbed 3.1 per cent for simi-

R gloomiest in predicting lower demand and employment. Those in the food industry remained mostly optimistic and manufacturers of con-

Bavaria's Russian privatisation to be probed

By Guy de Jonquières in Davos and Chrystia Freeland in Moscow

Russia's senior prosecutor yesterday announced a high-profile investigation into the privatisation of some of the country's most valuable enterprises and predicted the campaign could lead to criminal charges.

The attack on privatisation from within the administration came as Mr Anatoly Chubais, the leading reformer sacked as Russia's deputy prime minister last month, predicted bloodshed if Mr Gennady Zyuganov, leader of the resurgent Communist party, won the presidential election in June and

started re-nationalising husinesses The attack on privatisation appears to have begun well before the election as President Boris Yeltsin seeks to dis-

tance himself from a programme many

Privatisation suffered its most serious blow yesterday when Mr Yuri Skuratov. the chief prosecutor, said his office had begun an "intensive" investigation of how some of Russia's leading enterprises were sold off.

One of his targets is Norilsk Nikel, the world's largest nickel producer. where there is a fierce dispute between the Soviet-era management and a Moscow bank which took a controlling stake last autumn.

Mr Chubais, whose dismissal was one of the initial signs of the government's shift away from reforms, said Mr Zyuganov had pledged to confiscate private property: this would lead to violence because it would be resisted by owners of small businesses such as shops and

ordinary Russians see as deeply corrupt would re-nationalise privatised industries, Mr Chubais told an international conference at Davos in Switzerland.

This kind of policy will lead to big bloodshed in Russia. Business leaders in the west who try to support Zyuganov will be responsible for the blood if he is elected president."

Recent opinion polls have consistently rated Mr Zyuganov as front-runner in the June presidential contest, but over the past month Mr Yeltsin has mounted a strong campaign to revive his popularity.

Mr Yeltsin has not yet formally declared his candidacy, but has made some dramatic changes in his government over the past few weeks.

The sharpest shifts have been replacement of reformist officials with hardliners and a populist spending spree which marks a radical departure If Mr Zyuganov became president, he from the fiscal and monetary austerity

have also seen a number of indications that Mr Yeltsin could be on the verge of a U-turn in his policy in the hreak-away Chechen republic, where Russian forces have been waging an inconclusive war with separatist guerrillas for the past 14

Mr Yeltsin, whose decision to send the army to Chechnya was in part a hid to please nationalist sentiment within Russia, appears to be bowing to frustration with what seems to be an unwinna-

Over the weekend, the president told Mr Gennady Seleznyov, the new Communist speaker of the parliament, he would launch a new peace initiative in Chechnya sometime this week.

Army officials have suggested Moscow might order a complete withdrawal of Russian forces, leaving rival Chechen factions to fight it out.

Spain's opposition promises jobs pact

A new centre-right government in Spain would do "everything possible" to reach a Germanstyle pact with trade unions and employers to encourage the creation of permaneot jobs, the Popular party leader, Mr José Maria Aznar, said yester-

Presenting his party's pro-gramme for the general election in four weeks, he said he was asking nothing of the social partners "except a will-ingness to talk". His proposal was echoed by

the Mr Candido Mendez, leader of the Socialist-oriented General Workers Union (UGT). who said that whoever won the elections would need to count on unions and employers to tackle the jobs problem. Like the ruling Socialists,

the PP programme gives its first priority to employment in the face of an official johless rate of almost 23 per cent.

Anxious to present a moderate image, Mr Aznar. 42, emphasised his party's commitment to maintaining pensions, public health services and unemployment henefits. He argued that the country's hudget deficit stemmed from debt costs rather than the welfare system. Under the party's programme, revenues from pri-

Spanish opposition leader José María Aznar addressing a news conference in Madrid yesterday

vatisation would go to reducing government deht. Replying to Socialist claims that the party's tax-cutting

pean single currency, Mr Aznar said it was hard to conceive of a higger failure than present policies, which meant plans would leopardise Spain's that Spain could not currently chances of joining the Euromeet any of the monetary

union criteria. He said gradual tax cuts would be offset by a reduction in the "scandalous" number of tax evaders.

"I know there are many Spaniards who think I am not

carry out a democratic cleansing of our government," said Mr Aznar, who is banking on the unease many Spaniards feel about the string of scan-dals that forced the Socialist prime minister, Mr Felipe González, to call elections a year early. Mr Aznar took a tough line

a very likeable or pleasant per-son, but they do share my view

on terrorism, promising that a PP government would use "all legal means" to try to defeat Eta, the Basque separatist group, and would change the penal code to ensure that terrorists and drug-traffickers served their full jail sentences without remission.

Placing the emphasis of the PP campaign on honest and more efficient government, he said the PP would need "a clear majority" to be able to create the framework needed to raise employment levels.

"What we are talking about is not who will win the election, but by how much," he said, expressing confidence that the party would obtain sufficient seats to govern on its own. Opinion polls have suggested that the PP has a lead of up to 10 points over the Socialists but may fall short of an outright majority in the 350-

Late payment penalties doubt

Bill payment times

The British government's efforts to resist demands for legal penalties for the late payment of debts yesterday received a boost from a European survey. The study. hy the Association of British Factors and Discounters. showed there was little correlation between tough penalty regimes and prompt payments. Of the five countries with the worst payments records, three -Italy, Spain and Cyprus provided a statutory right to

interest. The survey found

that companies in northern

De

Europe paid more quickly than those in the south. The ABFD said this suggested that man mose in the same largely based on culture. It urged the payment practice was largely based on culture. It urged the UK to concentrate on changing business culture through ways other than legal penalties.

The British government is consulting public opinion about such penalties, but is unlikely to change the status quo. Greek companies were the slowest payers, taking 158 days, against 40 in Sweden. UK companies came eighth of 15 countries, taking an average 75 days. Stefan Wagstyl, London Editorial comment, Page 15

Belgium frees Eta suspects

A Spanish couple who have been in and out of Belgian custody since 1993 on suspicion of being members of the Basque separatist organisation Eta were ordered to be freed yesterday Mr Jose Luis Moreno Ramajo and his wife Racquel Garcia were released minutes after Belgium's Council of State upheld their appeal against deportation.

The decision will embarrass the government of Mr Jean-Luc Dehaene, which has made no secret of the fact that it wanted the couple deported. Spain said on Friday it was confident Belgium would eventually deport them. Belgian diplomatic relations with Spain deteriorated in December 1993 when Madrid held up plans for a European Union asylum law in retaliation for Belgium considering granting the pair refugee

Power line decision criticised

The European Commission yesterday criticised the French government for its "unilateral action" in interrupting work on huilding the very-high-voltage line (400,000 volts) in the Hautes Pyrenées department which would help link the electricity networks in France and Spain. A spokesman said the project "is of great political importance to the Commission". The French move compromised the EU's credibility regarding large projects, he said, and was a bad precedent for all priority schemes in the programme adopted at the Essen summit in

Last Thursday, Mr Alain Juppé. France's prime minister, told the Senate he had "decided not to authorise the start of work" on the Cazaril-Aragon line because of concern for the

The Brussels spokesman said the project was also of vital importance to the proper operation of the Spanish and Portuguese electricity networks.

Dispute over Polish targets

The long-running rivalry between Ms Hanna Gronkiewicz-Waltz, president of Poland's central bank, and Mr Grzegorz Kolodko, the finance minister, resurfaced yesterday when the former described as "overly optimistic" the latter's goal of 5.4 per cent average growth up to the end of the century. She approved Mr Kolodko's tax cutting strategy to spur growth but questioned whether his aim to cut inflation to 5 per cent would be possible without deeper cuts in government

In his Package 2000 programme, revealed last week, Mr government expenditure would continue to grow, though not as fast as the economy. He predicted that exports would rise at a higher rate than imports, but Ms Gronkiewicz-Waltz said: 'We see serious threats to the realisation of this goal."

The central bank expected GDP growth this year to drop to 5.5 per cent from 7 per cent in 1995 because of the expected slowdowo in Germany, Poland's higgest export market. In the first 10 months of 1995, the trade deficit widened to \$4.3hn against \$3.1hn in the same period of 1994. A stronger zloty, coupled with lower import duties and the elimination of the 3 per cent border tax this year, would make imports cheaper and exports more expensive while the high growth of investment, forecast at 8.8 per cent annually by Mr Kolodko. would boost import demand, the bank chief added.

Meanwhile, miners at eight Silesian coal mines went on strike yesterday and the Solidarity union called on 220,000 miners at other pits to join them in demands for higher pay and defence of retirement rights. Anthony Robinson, London

France pushes defence changes

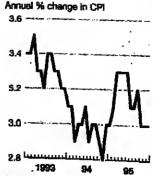

France wants next month's intergovernmental conference to write a Nato-style mutual security guarantee between European Union states into the European treaties and to create a regular council of defence ministers, Mr Charles

Millon, its defence minister, said yesterday. He welcomed Chancellor Helmut Kohl's call last weekend for "a solidarity clause for all EU members akin to the mutual guarantees in the Nato and Western European Union treaties" He also saw no reason for neutral EU members such as Sweden, Finland and Austria to refuse such a clause, now the west had no fixed enemy. But his officials conceded that extending such guarantees to forthcoming EU members in eastern Europe would have to go hand in hand with eastward enlargement of Nato. The role of an EU defence ministers' council would be to oversee European defence programme and peacekeeping efforts, as well as to reinforce the European component of Nato. David Buchan, Paris

Plans to liberalise the European Union's energy markets could be abandoned if member states cannot agree over the next few months how to inject competition into the sector, said Mr Christos Papoutsis, the energy commis-

His warning is a reflection of frustration in Brussels over nearly seven years of deadlock on the energy issue, mainly due to French intransigence. The French government is firmly opposed to competition

in the energy sector, particularly in the area of energy distribution to customers.

France maintained its hardline opposition at an informal ministerial meeting in Bologna at which new ideas for creating a single energy market were discussed but no con-clusions reached.

Mr Papoutsis said he would refer the issue to EU leaders unless the deadlock was broken by May 7. "If on that date there is no political agreement, then the European Council will have to

take up the matter," said a

beads of state will have to decide whether there is any point continuing discussions on the completion of the single market in energy.

Germany, Britain and others have insisted that energy distributors would bave to he included, otherwise ordinary consumers would not reap the benefits of lower prices resulting from liberalisation.

The German government is under particular pressure from its industrial lobby to press for proper liberalisation because of its fears that high

Details of the proposal are to be thrashed out at a meeting in Brussels next week, with a final deadline for adoption of May 7 - the next energy council meeting to be beld in Brus-

Dublin tries to avert big EU farm fine

By Caroline Southey in Bruseels

Ireland has launched a diplomatic offensive in Brussels to persuade the European Commission not to impose one of its largest per capita fines for irregularities in the agricul-

ture sector.
The Commission has threatened to fine Ireland about £100m for a string of irregularities in the Irish meat market in 1991. Mr Ivan Yates, Dublin's agriculture minister, has accused Brussels of trying to make an example of his coun-

Mr Franz Fischler, the commissioner for agriculture, is expected to pnt a final figure on the size of the fine during the next two weeks. "It has not been settled yet. There are still negotiations going on," an Irish official said.

The decision will be a test case for the Commission, which is determined to stamp out fraud, particularly in the agricultural sector. Last year, Mrs Anita Gradin, the commissioner with responsibility for anti-fraud measures, and Mr Erkki Litkanen, budget commissioner, launched initiatives to bring about substantial reductions in EU fraud, estimated to total some Eculbn (£850m) in 1994.

Mr Fischler must weigh up the case for imposing the maximum fine possible - 10 per cent of the amount spent on intervention in the meat market during the year the irregularities took place - against recommendations that the size of the sanction is excessive.

The sanction is being imposed following the discovery of irregularities in beef trading during the height of the so-called Goodman affair in freland during 1991. A government tribunal uncovered largescale fraud in the beef market including the misuse of export

credits by Irish companies. The Commission has identified separate occurrences during the same period, including incorrect labelling which involved giving meat cuts higher quality status and inflating thair weight, and irregular accounting practices. Although the Irish government is not disputing the fact that irregularities took place, Mr Yates has urged Mr Fisch-

ler to consider a recommenda tion from an independent body that the fine is excessive.

The conciliation committee made up of three independent experts and set up to arbitrate between the Commission and member states over disputed fines, has recommended that the fine be reduced substantially. The maximum fine is normally imposed only when irregularities cause serious dis-

ruption to the market. Mr Fis-

chler is not bound by the committee's recommendations. Several other countries also face fines for irregularities during the same year, including a sanction of 2 per cent of the amount sent in the beef sector in the UK and 5 per cent in Italy and France. The size of the fine compares with the Eculbn penalty imposed on Italy in 1993 for ignoring the EU's milk quota regime for 10

Denmark seeks curb on state aid to Germany's shipyards

seven shipyards went to work for the last time. Hundreds more at two other yards face the same fate as the Danish government refuses to rescue them. -

Scarcely a hawser's length from the Danish coast, five shipyards in eastern Germany are being modernised with the help of government subsidies. That's the problem, says the Danish government, whose long-standing policy not to subsidise the country's yards is supported by the Association of Danish Shipbuilders. Everyone else is doing it and the resultant over-capacity is bad

for all. So tha Danes are taking the European Commission to court saying it exceeded its authority in approving the German subsidies and, in another case, have asked the Commission to

investigate. Denmark's Svendborg Shipyard closed last week after it ran out of orders and failed to find temporary financial backing. Burmeister & Wain in Copenhagen, and Danyard in Frederikshavn, Jutland, are also threatened with closure. Shipbuilding employs about 10,000 in Denmark and a further 11,000 are in ancillary

"We can never compete on subsidies," says Mr Thorkil Christensen, managing director of the shipbuilders association. "A small country like Denmark just does not have actual capacity, according to the financial resources to consultants reports prepared the financial resources to match the snosidies which larger nations can provide."

A recent Danish industry ministry report argued that the post important problem facing the shipbuilding sector was that direct and indirect subsidies to yards in other countries had led to excess capacity in the global shipbuilding indus-

ast week 650 employees st one of Denmark's European Commission is caught up in dispute over subsidies as Danish jobs are lost, write Hilary Barnes and Judy Dempsey

> and France, it said. The Danish shipbuilders association, in its action against the European Commission in the European Court, claims that the Germans received approval from the Commission to modernise the five yards up to a combined capacity of 327,000 compensated gross tonnes (CGT - a

measure, comprising value and

'A small country like Denmark just does not have the financial resources to match the subsidies which larger nations can provide'

volume elements, for making comparisons between ships of different types). However, the about 576,000 CGT.

The other disagreement concerns the Bremer Vulkan shipyard on tha north-German coast. Last month Bremer Vulkan, which employs more than 23,000 people, received bank credits of DM220m (£97m) - in addition to an earlier DM300m

mark and the Commission could baulk at such subsidies. What can we do?" one official said. "Bremer Vulkan has not come up with the investments. Over DM400m of those investments fall due this Commerzbank, Bremer Vul-

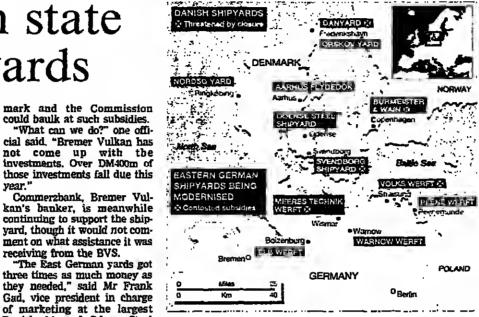

Europe were Spain, Germany authorities, to complete a ship under construction.
The Danes have asked the Commission to examine the legality of the loans. The Commission has asked the German government for more informa-

German officials argue that without any new loans, a large part of east Germany's shipbnilding industry could be threatened, Bremer Vulkan owns the Meeres Technik Werft (MTW), at Wismar, and a controlling stake in Volk Werft, Stralsund, both in the east German state of Mecklenburg-Vorpommern.

The dispute has revealed that the Treuhand privatisation agency, which was responsible for privatising the east German shipyards, failed to take early enough action when it discovered that Bremer Vulkan was not making the investments agreed in the purchase contract for the east German shipyards.

The Treuhand - indirectly the German taxpayer - agreed to a DM1.5bn package to modernise Bremer Vulkan's share of the east German yards half, in the form of subsidies would be paid by the taxpayer, the remainder by Bremer Vul-

But nearly five years after It kan has not invested one pfennig of the promised Dm700m to Dm750m from its own resources, according to officials of the Mecklenburg-Vorstata now wants to give DM600m in grants to its ship-building industry from the 1996 try. Israel's right-wing parties in election pact

By Julian Ozanne in Jerusalem

Israel's two main right-wing political parties are to join forces, back a single candidate for prime minister and present a joint list of parliamentary candidates in general elections

expected in May. The surprise move will considerahly strengthen the rightwing challenge to Mr Shimon Peres, the prime minister, and the Middle East peace policies of his Labour-led coalition gov-

The draft agreement between the more mainstream Likud led by Mr and the ultra-nationalist Tsomet led by Mr Rafael has been negotiated secretly in the past few days. Both parties oppose the Israeli-Palestinian peace accords and the government's current peace talks

Mr Eitan said opinion polls Mr Peres in the direct election will cast two ballots - one for Mr Eitan trailing a poor third.

conducted by the two parties for the premiership showed the Israeli public in return, Mr E wanted a broad right-wing opposition front and were fed up with Israel's long history of small parties and coalition pol-

Although the agreement was criticised by some Likud MPs it was welcomed by the old guard leadership. Mr Yltzhak Shamir, former Likud leader and prime minister, said: "This will add faith, it will add energy and it will add strength to the people that very much want the national camp to win this time.

Under the agreement, Mr Eitan, a former army chief who once publicly compared Arabs to cockroaches, will withdraw his candidacy for prime minister, letting most Israeli rightwing voters support Mr Netanyahu as the main challenger to

in return, Mr Eitan will be given number two slot on a joint parliamentary list guaranteeing him a senior joh, probably as defence minister, in a future government should the right-wing come to power. Tsomet, which recent polls showed had lost ground since it won eight seats in the 1992 elections, will also he given eight slots among the first 40 candidates on the joint parlia-

mentary list. After the elec-

tions the two parties will

decide whether to complete a

formal merger. The agreement has yet to be Netanyahu (left) and Eitan (right): recognition of political reality officially endorsed by the parties hut it marks a shrewd recognition of political reality by the traditionally fractious right wing in the face of a resurgent Labour party. In the next elections Israelis

prime minister and one for parliamentary candidates. Recent polls have shown Mr Peres leading Mr Netanyahu in the

race for the premiership by

between 16 and 23 points with

Analysts said Mr Eitan's military credentials in a securityconscious country would help make up for Mr Netanyahu's image as a young, inexperienced, professional politician.

and Tsomet largely because of a wave of sympathy for Labour after last year's assassination of Prime Minister Yitzhak Rabin by a right-wing fanatic.

The need for tha right wing to unite has been reinforced by prospect of elections earlier than the scheduled date of October 29. Mr Peres said over the weekend he would announce next week whether he would bring the elections forward. Senior cabinet ministers and Labour party officials have urged Mr Peres to capitalise on his popularity and go for an early election in May. Officials suggest May 21 as the most likely date.

The most difficult task ahead for the right wing is to develop a realistic and convincing alternative to the peace pro-

political uncertainties in Morocco. Kenya budget to curb deficit

signed covering \$1.2bn in Spanish credits.

The Kenyan government, anxious to prove to the International Monetary Fund that its economy is still on course, has unveiled a mini-budget aimed at keeping its budget deficit tightly under control. Mr Musalia Mudavadi, finance minister, said he was determined to cut the 1995/96 deficit to 1.9 per cent of gross domestic product from 2.5 per cent in 1994/95.

However he noted that the government's balance of payments position weakened last year and there had been a resurgence in inflationary pressures. To reverse this, customs duty on petroleum products would be raised, operations at the Kenya revenue authority strengthened and penalties to enforce compliance increased.

Mr Mudavadi estimated this would increase tax revenue by a total of Ks7bn (\$120m). The government would simultaneously cut or delay non-essential spending by

The minister normally unveils his budget in June. This mini-hudget, due to be presented to parliament in March, appears aimed at persuading IMF officials, who recently visited Kenya to assess its reform programme, that the country deserves a \$200m enhanced structural adjustment facility. The funds have been blocked for over a year because of IMF concerns over corruption.

ABB wins Uzbekistan plant deal

A \$250m contract to build a chemical complex in Uzbekistan has been awarded to Asea Brown Boveri, the Swiss-Swedish international engineering company.

ABB is to lead a group of Japanese companies in constructing the Shurtan gas chemical plant for Uzbekneftegas, a subsidiary of the Uzbekistan ministry of oil and gas. The total project is valued at \$500m.

The Shurtan complex will include ethylene, polyethylene and copolymer plants and the contractors will provide assistance during initial manufacturing operations. The project is to be funded from international financing facilities available to Uzbekistan and the repayment of loans will come from the proceeds of domestic and export sales made by the Michael Cassell, Business Correspondent

Bahrain unrest points to Gulf-wide problems

Tribal monarchies are caught between 'modernism' and Islamic activism, writes Robin Allen

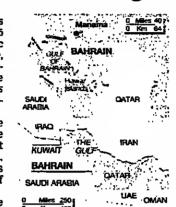

he civil unrest that has plagued Bahrain for 15 months with spasmodic but sustained riots, sabotage, ardise security in the entire Gulf region unless some basics are addressed, western diplomats warn.

Repression and 'blaming the foreigner" may contain the problems in the short term, but will not address the political. social and economic fault-lines running through all Gulf

states, they say. Domestic weaknesses are being exploited by home-grown and foreign opposition elements, "but these elements are not the determining factor behind the disturbances", senior diplomats say.

The authorities in Bahrain have accused Iran of instigating the violence, which has led to the arrest of nearly 600 people, and last week expelled an Iranian diplomat. On Sunday it banned eight Kuwaiti members of parliament from entering the country hecause of Kuwait's support for Bahraini opposition demands that the government recall parliament. dissolved in 1975.

GCC member states' relations". diplomats say. Typical are those between Bahrain and Qatar: Qatar and Saudi Arabia: Saudi Arabia and Yemen; and the UAE, Qatar and Saudi Arabia combined.

The third weakness is the inahility of individual ruling families to meet the social and economic needs of a sufficiently large part of their popu-

Bahrain's unrest started in November 1994 when disgruntled villagers in a poor Shia community threw stones at scantily dressed runners in a charity marathon. Strong police reaction sparked more protests, which led to further arrests. Over the next five months the "opposition" had escalated into demands for economic and political reform, including an end to the predominant role of the ruling family in many aspects of the country's business life.

According to western diplomats, the protest movement subsided last April when the government seemed to have reached a tacit agreement with opposition leaders to open a dialogue in return for keeping protesters off the streets. By

October, however, several factors had contributed to this "understanding" breaking down, with each side feeling betrayed by the other.

A petition calling for a dia-

logue aimed at economic reform and the return of the national assembly, and signed hy 300 people including both Sunni and Shia members of the business and academic commnnities, was abruptly rejected by the government, which demanded a written apology from the signatories. Among these were 92 people employed in the public sector. The three who refused to apologise were fired. Moderate opinion was

or its part, the govern-ment was angry with the opposition for organising rallies of up to 50,000 people, for the involvement of the London-based "Bahrain Liberation Movement" and for the outspoken Iranian and clerical slogans used by the protesters.

Western diplomats are sceptical about Iran's involvement but they acknowledge, in common with even those many Bahrainis who disagree with the government's handling of the unrest, that many of the protesters draw their inspiration from Iran.

According to Dr Naji Al-Mahdi, director of the Bahrain Training Institute, which operates under the labour and social affairs ministry, giving vocational training courses for thousands of Bahraini nationals, the underlying problem is neither sectarian nor unemployment. It is the "pain of change", the abrupt ending, for which neither governments nor people were prepared, of a 25-year period of lavish spending and unreal expectations of boundless economic growth. Lahour and social affairs

Shula says too many private sector companies rely on cheap manual Asian labour "rather than investing in modern stock and equipment which would do the same joh with one-tenth the number of people and which young Bahrainis are trained and willing to handle". The problem, they and other husinessmen agree, "is not unemployment hut the unemployability" of many Bahrainis, hecause of the antiquated structure of too many

Flow of foreign funds to China jumps 12 per cent Japan rules out stake in joint aircraft venture

By Michael Skapinker In Singapore

Japan yesterday said it would not participate in a proposed Chinese and Sonth Korean project to build a 100-seater jet. A Boeing executive said China and Korea were also disputing which country should have responsibility for the jet's final

assembly. Mr Naomi Anesaki, president of the Society of Japanese Aerospace Companies, dismissed suggestions that Japan would take a stake in the Chinese and South Korean venture. Some industry executives had believed Japan might take

a 10 per cent stake. But Mr Anesaki told the FT Conference on Commercial Aviation in Asia-Pacific: "My response is 'no'. Japan will be cautious and prudent. We've learned from the past that the aircraft business is not easy."

Mr Lawrence Clarkson. senior vice-president at Boeing. told the conference that China and Korea had yet to decide where final assembly should take place. He said: "They're

want the final assembly site at the moment but it's not economical to have two sites."

Mr Clarkson said he did not think China and Korea would announce their choice of western partner until they had resolved this question.

The Chinese and South Koreans have said they are looking for a western partner to provide the technology for the 100-seater.

Boeing of the US and Aero International Regional (Air), a new European joint venture, have submitted hids to be partners in the project. Air is owned by British Aerospace, Aerospatiale of France and Alenia of Italy.

Daimler-Benz Aerospace (Dasa) of Germany also submitted a bid, but this is highly unlikely to succeed following the financial crisis at Fokker, the Dutch regional aircraft manufacturer in which Dasa has a controlling stake.

Samsung, the company leading South Korea's participation in the 100-seater project, is in talks about buying some of the Fokker business. Designs on Fokker, Page 22

of foreign direct investment among 250,000 projects. to increase their stake, and this had abolish from April 1 its preferential Asia set to become top investment target

By Guy de Jonquières

Asia, excluding Japan, is set to overtake western Europe in the next five years as the most popular destination for foreign direct investment. At the same time, Asian economies are

become the world's main source of outward FD1 flows. These are among the conclusions of a survey of corporate investment intentions, which also finds that companies main reason for investing ahroad for the rest of this decade will be to improve access to foreign markets, not

expected, along with the US, to

to cut production costs. The survey is hased on responses by 260 managers and business experts in the US. Europe and Asia. It was commissioned by the French govArthur Andersen, the international management consui-

Almost 90 per cent of companies expected their investment flows abroad to grow strongly or very strongly, and to share of their total investments between now and 2000. The most popular vehicles for international expansion were expected to be joint ventures

and acquisitions Companies said exports from their home country would remain their main way of competing in international markets, but they expected their investments abroad to grow faster. This was particularly true of companies hased in Japan and other Asian countries with rising domestic costs and exchange rates.

Although companies planned ernment's inward investment to invest more at home than agency and conducted by abroad in the next five years,

the survey found that domestic investment was a lower priority than in the first half of the

Asia excluding Japan, Latin America and eastern and central Europe were named as the priority destinations for foreign investment, while the US, western Europe and Japan were all rated less important than in the first half of the 1990s.

The survey found that more advanced Asian economies and the US were set to become the biggest sources of outward foreign investment in the next five years, displacing western Europe, which had been the largest provider of FDI since the mid-1980s.

The main reasons for the shift were Asian companies' fear of US protectionism and their desire to exploit foreign markets and western technology. US companies were keen

to exploit internationally their improved competitiveness in industries such as high technology, cars and telecommuni-

Manufacturing industries, led by telecommunications and information technology, were expected to be the leading overseas investors up to 2000, while investments abroad by property and financial services ompanies would be lower than in previous years. However, the top priority for

manufacturing companies was to set up foreign distribution networks rather than production centres. Many respondents also said they wanted to establish research and development facilities abroad.

Where the world's investors are looking

" Fiat chooses Poland to make new world car

By Kevin Done, East Europe Correspondent, in Warsaw.

Fiat, the Italian carmaker. plans to produce its new world car, the 178, in Poland within the next two to three years as part of the renewal of its entire Polish product range. Mr Paolo Marinsek, outgoing chief executive of Fiat Auto Poland, said

The \$2bn world car programme is one of the most ambitious development projects by the Italian carmaker as its seeks to reduce its previous heavy dependence on car

production in Italy.

By 2000 Fiat would be producing 54 per cent of its cars outside Italy, said Mr Marinsek. The 178 range, which includes cars and light com-

mercial vehicles, has been

designed for production and saie mainly in developing Fiat has previously innounced production plans for Brazil, Argentina, Turkey,

India, China, South Africa and Morocco. However, Poland will be the first production site in Europe for the 178.

To be called the Palio, the

178 range will first be launched in Brazil in April, and Fiat is planning a worldwide capacity of 800,000, excluding China. Output could eventually exceed Im if the group sncceeds with plans for a plant in

Fiat expects to halt production of its bottom-of-the-range 126 in Poland by the end of this year, because the car no longer meets environmental regulations. An up-dated Cinquecento small car, for which Poland is the only source in Europe, is also planned for introduction in the late 1990s.

Mr Marinsek, who has led had risen from 55 per cent in the restructuring of FSM, the 1992 to 90 per cent last year.

Polish state-owned carmaker taken over by Fiat in the early 1990s, was appointed last week to head Comau, the Fiat group's automation subsidiary, as part of the reorganisation of

the group's top management. Fiat controls around 51 per cent of the Polish new car market. Mr Marinsek said the current investment programme was aimed at maintaining the group's dominant presence, despite the heavy investments also planned by General Motors of the US and Daewoo

of South Korea. The Italian carmaker has taken the leading role to date in restructuring the Polish car industry, the biggest in central Europe, and in developing the local component supply base. Mr Marinsek said the local

of its poi cars had increased to 73 per cent last year from 55 per cent in 1992. Around 37 per cent of its Polish components purchases were now coming from new suppliers, which had established Operations in Poland since Fiat's takeover of

New supply ventures for Poland were also under discussion with TRW and Delphi Automotive of the US and GKN, the UK vehicle parts sup-

Fiat's car production in Poland rose by 10.9 per cent last year to 278,200, its highest level, of which 156,900 or 56.4 per cent were exported, chiefly to west Europe.

Fiat had completely reorgan-ised its Polish sales network. said Mr Marinsek, to create pri vately-owned dealers offering a full range of sales, service and parts operations.

The share of private dealer ships in the 100-strong network

Mercedes-Benz aims to boost Japan truck sales

By Michiyo Nakamoto in Tokyo

Mercedes-Bonz, one of the biggest foreign sellers of cars m Japan, plans a fresh assault on the country's truck market. The German vehicle manu-

facturer will set up a joint venture with Komatsn, the Japanese construction equipment maker, to sell Mercedes-Benz commercial vehicles in Japan through Komatsu's sales network.

Mercedes-Benz hopes to market its commercial vehicles, including trucks and minivans, through about half of Komatsu's 518 sales outlets. The German company aims to sell 700 units in the first year. This represents just a fraction of the 1.6m Japanese commercial vehicle market, but would more than double the trucks and mini-vans Mercedes-Benz sold in Japan last year.

Foreign commercial vehicle makers have not been particularly successful in penstrating

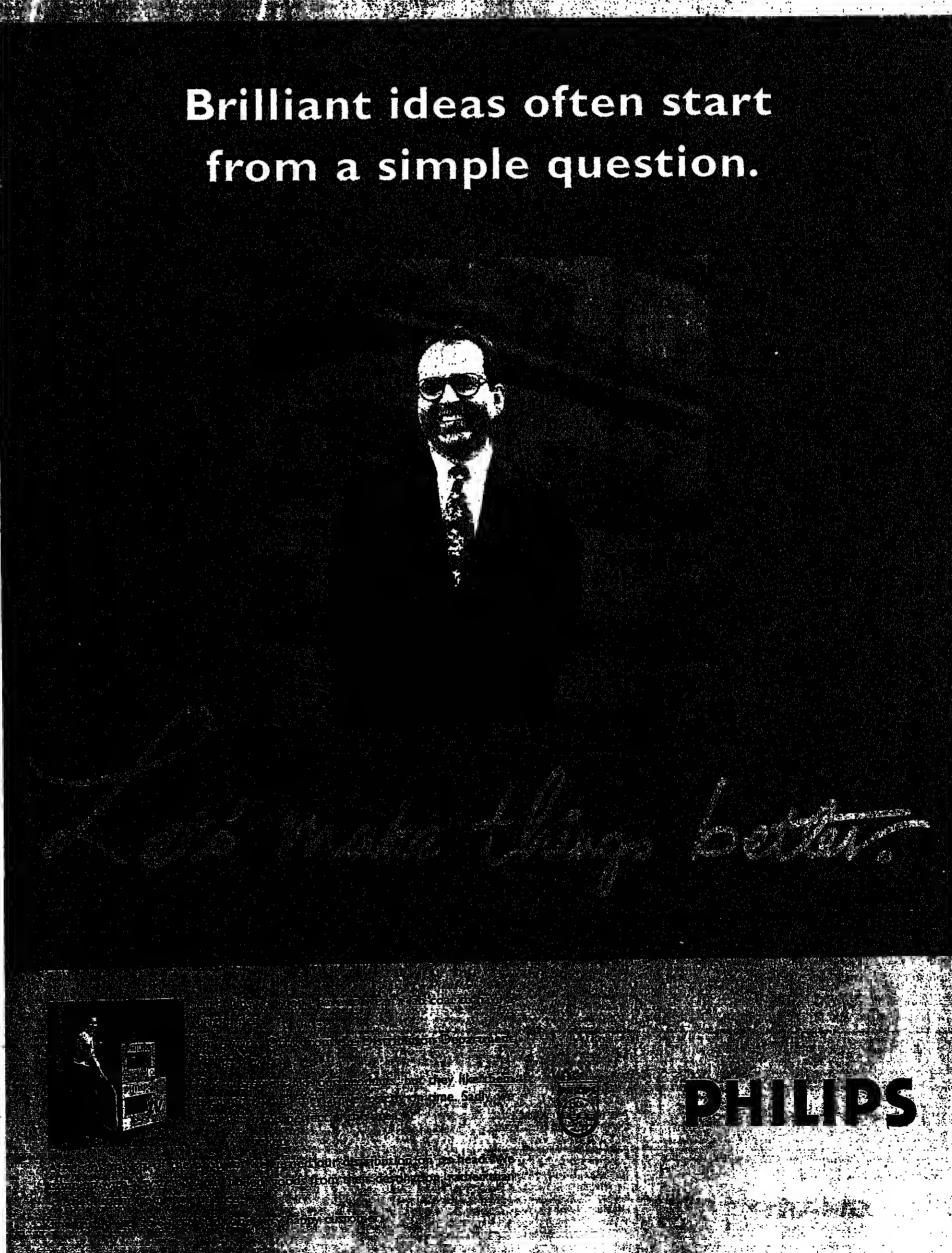

the Japanese market. Mercedes-Benz is the world's

largest maker of medium-sized trucks, but it has sold just 1,250 commercial vehicles in Japan since it began its previons partnership with Mitsubishi in 1989.

The German group believes the Japanese market is set to expand as a result of demand for trucks to replace vehicles bought during the late 1980s and early 1990s; deregulation of restrictions on vehicle weight; and stricter emission controls.

The Komatsu link underlines the failure of the strategic alliance with Mitsubishi. In 1994 the two groups dissolved their joint venture company set up to sell Mercedes-Benz trucks in Japan. Mitsubishi still sells Mercedes trucks, but it is unclear what will happen now. Unlike Mitsubishi Komatsu is predominantly a maker of construction equipment and does not have competing product.

A joint venture company is expected to be established by the end of the year.

Fresh setback Market test for Japan wage round in housing loans bailout

The Japanese government's attempts to win parliamentary approval for a plan to spend more than Y685bn (£4.2bn) on a bailout of the country's bankrupt housing loan companies received another setback yesterday with vet more embarrassing official disclosures about the circumstances surrounding their failure.

Documents released by the cabinet revealed that the Finance Ministry had been aware of the gravity of the problems at the housing lenders, or jusen, as long ago as 1991, hut had failed to act to stop their collapse. The information was made

public amnng a pile of docu-ments handed over to parliament by the government in response to demands from opposition leaders for more details about the period leading up to the companies' insol-

vency.
Officials released details of the outcome of finance ministry inspections of the seven companies which are to be liquidated with part-use of public funds. They showed that in 1991 and again in 1992, ministry officials concluded that the iusen were heading for a financial crisis under a crippling burden of non-performing

Japan: the question of wages

r Jiro Nemoto, a sparkling man at the rough end of Japan's annual shunto wage-bargaining round, believes his country may be facing an employment and productivity crisis.

Mr Nemoto, taking time off from his two jobs as president of the Nikkelren employers' federation and chairman of NYK Line, Japan's largest shipping company, was explaining his controversial call for a wage freeze to curb record unemployment and restore international competi-

The Nikkeiren's recommendation, subject of a more heated dehate than usual among companies and unions over the past two weeks, has also, surprisingly, been ques-tioned by some of its own corporate members. They argue vage rises are vital to stimulate flagging domestic demand as the economy struggles to emerge from four years' stag-

"Japan is wandering between social democracy and democracy, by which I mean deregulation and a free market. How far towards the free market should we swing?" That question, tackled in different ways by the UK. Germany and the US over the past decade, is at the heart of this year's wage round, he believes. Mr Nemoto dismisses compa-

nies' fears over the link hetween wages and domestic demand as exaggerated. Companies should be free to set wages linked to their own productivity, as they increasingly are, so long as the average settlement is stagnant, he says. The growing divergence of

eastern Kyongsang area. The three opposition parties have strong bases cities, while the conservatives

and they have assumed key posts in

politicians to the party.

Nemoto argues fiercely that

That might sound, at first, like a well-worn defence of

For a start, unemployment, a record 3.4 per cent; is under stated by the narrow criteria which the Tokyo government uses to measure joblessoess, Mr Nemoto says. It would be as much as 6 per

cent if measured by UK criteria, and even on the Japanese ble to 7 per cent in a few years if wages are not restrained, he

he most important

is employment."

The target of a modern

Japanese wages have risen in real terms in all but two years since collective bargain-ing started in 1974, despite Nikkeiren calls for a freeze in each of the past three years.

Japan can all the less afford

rising wages now, because its labour costs have on the Nikkeiren's calculation become the highest in the world, Mr Nemoto adds. Worse, this has happened just as the domestic economy is being forced more open to international competition by a high yen and a measure of deregulation. Neither is a wage rise needed when domestic prices are stagnant or slightly falling. Mr Nemoto

A freeze is necessary, but not sufficient, to curb joblessness, he adds. Economic growth of at least 3 per cent a year would be needed to bring unemployment back to the more acceptable 2 per cent of a decade ago. Japan's ability to achieve the current account surplus. It needs to fall from last year's 2.7 per cent of gross domestic product to about 1.5 per cent to push the yen down from the current range of Y106-Y120 to the dollar which the Nikkeiren

job-creating economic growth. The final ingredient is prices, which need to be allowed to fall to international levels, to increase workers' huying power at a time of wage restraint.

estimates is needed to support

Prices in turn depend on governments' will to carry out economic deregulation. That may be a low priority of the present Liberal Democratic party-led government, which Mr Nemoto believes to be at heart social democratic.

But Japanese governments, even social democratic ones, will increasingly be obliged to rely on deregulation to stimnlate growth, he predicts. As the government deficit, already well above the average for leading industrialised countries, keeps on rising, this lim-

Employers' chief explains his controversial pay freeze call. William Dawkins writes its governments' scope to dole out the Keynesian public spending packages of recent years. Excising inefficiencies from formerly protected sectors is almost the only strategy

Here, Japan has something to learn from the US, Mr Nemoto says. Japan, as was the US in the early 1980s, is adjusting to a hard currency, rising competition from low-labour-cost naighbours and a maturing industrial economy.

Rather than pursue US-style mass redundancies, real wage cuts and the rapid transfer of production overseas, Mr Nemoto helieves the move to a free market should be moderated by collective interests

"It was easy for US managers, because they had share options and golden parachutes. But were the people actually working for them better off?... Today, their society is not healthy. We do not want to fol-low such a way," he says. Neither does he advocate as much of a free market economy as the UK and Germany.

At the same time, the Japanese employers and unions cannot put off the inevitable. There is no doubt the Keynesian approach does not apply here any more. We will have to move more towards Adam Smith and a more market-oriented approach."

The outcome of the shunto, to be decided by the end of March, will indicate just how far the orderly consensus of which Mr Nemoto is 50 fond has given wey to the free market. That will give a clue to how far unemployment will be permitted to approach western levels, which many believe is the central question for the

Philippine. inflation increases

By Edward Luce in Manila

Philippine inflation increased to 11.2 per cent in January amid growing social protest over higher petrol prices and an expanded value added tax.

The latest annual inflation figure, almost double the rate recorded this time last year and a rise on December's 10.9 per cent rate, comes after a weekend of protest over the government's decision on Friday to increase petrol prices.

The 7 per cent price increase which follows months of government stalling in the face of growing deficit in its off buffer fund now at 10bn pesos (£251.5m), has been met with anger from church leaders. unions and opposition politi-

The opposition, including the Liberal Democratic party, which broke from the ruling two-party coalition in the Senate last week, accuse the government of being "anti-poor", and have pledged to attack its much-acclaimed economic reform agenda. The administration of Presi-

dent Fidel Ramos, which says the petroi price increase was skewed towards middle-class car owners, says the country can no longer afford to subsidise domestic oil prices after world crude prices rose to \$17 a barrel last month. The government conceded yesterday that the price rise would add about 0.8 percentage points to next month's inflation rate.

Economists, who say liberalisation of oil prices is crucial to foreign investor confidence in the Philippine reform pro-gramme, said vesteroay that temporarily higher inflation was a necessary price to pay for deregulation of the economy. Economists said that the controversial 10 per cent expanded VAT imposed last month was a vitai component of the strategy to boost recur-

ring budget revenues.

"Philippine inflation will continue to rise during the first quarter of the year but. barring any unforeseen mishaps such as natural disasters, we expect it to fall during the second half," said Mr Bernhard Eschweiler, an economist at J.P. Morgan in Singapore.

"We think that if the Philippine government can see through this wave of protests, Its macroeconomic strategy is basically on track."

The Philippine government is bracing for a difficult few months as it pushes through controversial reforms such and comprehensive income tax bill and further oil price rises.

Government officials say last year's gross national product growth rate of 5.7 per cent and forecasts of 6.5.7 per cent in 1996 fully vindicate its threeyear-old economic reform programme.

state should be to keep four things in balance: employment, economic growth, the trade balance and commodity orices. Of these, by far

ned at average 1993 rates

years shows how consensus is inevitably giving way to market forces, he coocedes. Despite gradual erosion of the consensus on wages, Mr

the Nikkeiren still has an important role as advocate of collective interests. "The target of a modern state should be to keep four things in halance: employment, economic growth. the trade balance and commodity prices. Of these, by far the most important is employment," he says.

Japan's reputation for jobs for all. Yet, Mr Nemoto argues, that image belies the truth; a sound economic as well as social argument exists for putting employment first.

Their ability to gain the party's presidential nomination will depend on how well they succeed in preventing a defeat in the April

Upgrade proposed for Australian rail

By Nikki Tait in Sydney

Anstralia's federal government yesterday pledged to spend an extra A\$370m (£184m) on investment in the country's rail network if reelected at a general election on

The money would be allocated to "Track Australia", a body which would run and upgrade the train tracks on an interstate basis. Australia has a fairly extensive rail network, but commercial usage bas been hampered by the fact that much of this is under the control of different state governments.

As a result, until June last year, there was no standard gauge rail send freight from, say, Brisbane to from southern ports. Perth on a continuous basis.

mooted last year and given backing by at least some state governments,

"The problem is that the system has been left to rot by states for so long that in some places the trains can only do 10-15 kilometres per hour," said Mr Paul Keating, prime minister, as he announced tha funding package.

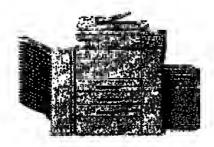

It needs investment in the rail line itself." Government ministers said that the possible development of a rail link between Alice Springs and Dar-

win would be one of the "prime responsibilities" of Track Australia. At present, a rail line runs from South Australia to Alice, but with no onward link with Darwin. This means that manufacturers in South Australia, notably the car industry, and it was impossible to travel or are obliged to ship exports to Asia

The Northern Territory govern-The Track Australia scheme, ment, based in Darwin, has long urged construction of a rail link: there has been talk recently of a although details remain scarce.

Guard murders Chinese deputy

A vice chairman of the National People's Congress, China's top legislative body, has been murdered by an army security soldier guarding his bome. Chinese national television reported yesterday. The killing of Mr Li Peiyao was first reported on Saturday by the official Xinhua news agency, which did not initially identify the accused as a soldier. Zhang Jinglong, 19, was captured by two colleagues and accused of killing Mr Li in a robbery attempt, the TV report said.

Mr Li, 63, one of 19 NPC vice chairmen, was also chairman of the central committee of the revolutionary committee of the Chinese Kuomintang, one of China's eight nominally

China plans exercises off Taiwan

China is planning a large land, sea and air military exercise in the next two months to intimidate Taiwan, according to a US congressional official who asked not to be identified. Intelligence data indicate the exercise will be larger than one last summer when China simulated an amphibious landing with the use of 40 naval vessels and 100 aircraft, he added. Although most experts believed the Chinese were "posturing" and did not contemplate hostile action against Taiwan, he went on, the situation could get out of hand unless

His comments lent substance to a Hong Kong press report that Beijing was planning big military manoeuvres before Taiwan'a presidential elections on March 23. Taiwanese President Lee Teng-hui yesterday appealed to people not to worry over damage which was being done to economic confidence. Agencies, Washington, Beijing and Taipei Bear's growl, Page 15

Hong Kong growth rate slows

Growth in Hong Kong's gross domestic product decelerated in the third quarter of last year to 4.2 per cent in real terms over the same quarter in 1994, government estimates released yesterday show. But taking the first three quarters of the year together, GDP grew an average 5.1 per cent over the same

Even at 5.1 per cent, or using private sector economists' full-year calculations of 5 per cent, the trend is of a slowing economy: growth at these levels was last seen in 1990-91 when the aftermath of Beijing's Tiananmen Square massacre, followed by the Gulf war, dampened expenditure. Consumer spending, which has been sluggish for more than a year because of climbing unemployment and flat property and stock markets, remained slack. Private consumer spending grew only 1.1 per cent, with government expenditure up 5.9

A\$1bn-plus project with joint govern-ment and private-sector funding, would see management and marketing responsibility for the rail network passed to the new federal body.

President Bill Clinton was yesterday forced by law to submit next year's budget to Congress, even though the legislature has yet to approve this year's version. He filed e bare-bones outline of his spending and revenue plans for 1997, a slim 20-page document against

the usual 2,000-page tome.

The detail in the document is as minimal as the pagination. It outlines e \$1,639bn (£1,064bn) budget for 1997, with a deficit of \$151bn. Both figures are about 4 per cent higher than budgeted figures for this year.

The plan also sketches e deficit-reduction strategy to balance the budget by 2002, This is virtually identical to the budget-belancing offer made by the White House last month, before negotiations with congressional leaders broke down

Economic assumptions released with the budget project that gross domestic product will grow by 2.2 per cent in real terms this year, compared with 25 per cent last year. It

projects real growth of 2.2 per cent in 1997 and 2.3 per cent in succeeding years up to 2002.

Mr Clinton yesterday appealed to Republicans to use the new outline to resume

negotiations. "I hope we can set aside partisanship and divi-sions," he told the National Governors' Association, in Washington. He said he was close to agreement with Republicans leeders on walfare reform, e particular budget sticking point. His 1997 plan suggests that

\$596bn could be saved during seven years, by cutting spending in non-mandated areas, such as defence and the environment, and by slowing growth in "entitlement" spending such as publicly funded bealth care to tha poor (Medic-aid) and elderly (Medicare).

Some \$124bn would be saved on Medicare, \$59bn on Mediceid, \$40bn on walfare pro-grammes, \$56bn on other mandatory spending, \$297bn on non-mandatory programmes and \$59bn by eliminating some corporate tax subsidies. A modest tax cut for the middle clas-

Transfer of power: René Préval will be sworn in as president tomorrow

end. Mr Aristide's administration was committed to implementing wide-ranging economic reforms as a condition for foreign assistance of more than \$1bn (£650m) which Haiti, the poorest country in the hemisphere, desperately needs.

Some elements of the agreement were implemented, but the programme foundered when the govern-ment started preparing the privatisa-tion of several state enterprises. Amid clear popular resentment, and tha resignation of the prime minister who backed the privatisation, Mr Aristide did not force the issue, preferring

instead the safety of ambivalence With the legislature unable to fash-

Swearingh of a successor will not mean the end of the former president's power, writes Canute James

with the legislature unable to fash-ion a budget, and the currency close to collapsing. Mr Préval will have no alternative but to do what is neces-sary to unlock the funds and face the expected tide of unpopularity. He will be attempting to find a means to cushion this, say Haitian officials, and plans to speak to international finan-cial institutions and foreign governments about changing aspects of the privatisation programme.

He will also have to move fast to contain Haitian impetience at the lack of economic progress which they

had been expecting since the re-in-statement of Mr Aristide.

In addition to the absence of the foreign funds that had been expected and the inability to draft a budget, Haiti is feeling other pressures. The government was expecting economic expansion of 4 per cent last year after contraction of 10 per cent the previous year. Preliminary indications are that it did not meet the target. The economy declined by 30 per cent in

the three years after 1991. Foreign investors have been offered geoerous incentives, but few have ventured into Haiti, where unemployment is conservatively put at 65 per cent. Most are awaiting a resolution of the impasse between the country and its foreign creditors and donors, and a clear statement of economic policy from Mr Préval.

They also want to see an improvement in the country's infrastructure. particularly in its telecommunications, electricity, ports and airports among the enterprises listed for priva-

In recent visits to the US and in talks with US officials in Haiti, Mr Préval has been told what is expected of the new administration. The new sident's performance this year will be watched closely, and with some anxiety, from Washington.

President Bill Clinton, who engineered Mr Aristide's re-instatement by sending troops to Halti despite objections from leading congressmen, cannot afford a political and economic

setback in Haiti this year. A smooth transition to Mr Aristide's successor will satisfy a part of Mr Clinton's Hai-

tian strategy.

The next step is economic improvement which will keep Haitians at home. In an election year, Mr Clinton's detractors will claim, with justification, that he failed in Haiti, if Haitian boat people again storm US

Mr Préval also faces e formidable task in improving public security. Although there are now indications that some parts of the multinational force which has been responsible for security will stay on for a few months, there are many guns in the hands of people who still feel they would be better off if the military were in power. Improved relations with the neighbouring Dominican Republic - a haven for overthrown Haitian dictators and fallen military leaders - will help. But Haitian offi-cials privately admit continuing concern about the ability of the refashioned constabulary to deal with incidents of terrorism.

7 ith his longer-term political ambitions, Mr Aristide will not want to be seen as too not want to be seen as too involved in Mr Préval's difficulties. The new president might be forgiven if be were to conclude that by the end of his term, history will have recorded him as a slight, if necessary, interruption to Mr Aristide's larger political

Buchanan and Gramm fight for Louisiana's right

By Jurek Martin in Washington

Senator Phil Gramm and Mr at stake among the Republican presidential candidates in today's perty cancuses in

Both have said that victory is vital for one of them to emerge as the leading rightwing alternative to Senator Bob Dole, or even to Mr Steve Forbes, the magazine pub-

The Louisiana event is a ploy by state Republicans there to steal a publicity march on the Iowa caucuses next Monday. Mr. Dole, Mr. Forbes and most of the other candidetes heve refused to campaign there, thus reducing caucuses will choose the first delegates, 21 in all, to the party convention in August. Mr Dole would probably pre-Ar a Buchanan victory in Louisiana becanse it would damage the better-financed Mr Gramm. Mr Bucbanan, the conservative polemicist, is still a more improbable party nom-

inee than Mr Gramm, but both beve been damaged by the sudden surge for Mr Forbes.

Mr Gramm, from Texas, said "I clearly need to win in Louistana" and finish in the top three in Iowa. He predicted that Iowa would whittle down the field to three viable candidates before the New Hamp-shire primary on February 20.

Mr Buchanan agreed and thought he had gained momen tum after his victory last week in the Alaska Republican straw poll, where he just heat Mr Forbes and scored double Mr Dole's vote.

Both spent some time attacking Mr Forbes, now the subject of intense media ar public scrutiny. Mr Griffin doubted that the publish could win more than 35 cent of the national vote if President Bill Clinton.

"There are two Forbes." commercials. But the Steve Forbes is the Rocker Republican of 21 years:00er's economic policiand tolerance of homoser in

EU commissioner proposes tougher transport pricing

'Railway renaissance' is urged for Europe

Mr Neil Kinnock, the European Union transport commissioner, called yesterday for a "railway renaissance" to save lives and the environment.

Throughout Europe, the development of rail transport is central to the achievement of an efficient, safe and environmentally responsible transport system for the oext ceotury," be said at a conference in Loodon. Mr Kinnock was leader of Britain's oppositioo Labour party during the Thatcher premierships of the

He called for firmer pricing policies which made different types of transport reflect their true cost to society. Relative prices of public and private transport should reflect the true cost of accidents, pollution and congestion. Six times fewer people were killed in trains than in cars for each kilometre travelled by a passen-ger, he said. Pollution from rail of that caused by road

He said there was a growing need for mobility, and increasingly congested roads could oot keep pace with the demand. "Transport policy and transport provision must therefore be rebalanced, potential capacity in nnn-road transport must properly be utilised and there must be a shift to the more environmentally friendly modes," Mr Kinnock said at the conference organised by the Association of London Governmeot.

"We need a railway renaissance to safeguard accessibility, to curb coogestion and improve the safety performance of the transport system in the UK and, more generally, across Europe, west and east." Traffic volumes in the Euro-

pean Union were forecast to double in the next 20 years, Mr Kinnock said. "Endless traffic iams, suffocating urban air poleveryday facts of life - and of death in a European Union in which 1,000 women, children and meo are killed every week in road accidents."

A shift to public transport was a "precondition" of sustainable economic success, and he warned of a stark future if nothing was done. "It is gridlock in the urban areas that then spreads along the main connecting networks of Europe. It is massively expensive and noxious paralysis on a continental scale

"Public transport, in order to be able to attract a substantial increase in use must . . . obviously be safe, clean, efficient, well-designed and affordable with easy connection between systems, clear infor-mation and adequate staffing." Mr Kinnock said.

It was also essential that it should be accessible - to the elderly, the disabled, parents with babies and shoppers with

Senior Tory MP set to denounce monetary union

By Rinbert Shrimsley, Lobby Correspondent

Mr Redwood will publish a paper oo Europe in advance of the government's ducument setting out its strategy for the forthcoming EU intergovern-

His paper says progress to a single currency causes "unemployment, budget cuts, very high interest rates and monetary policy far tighter than

He proposes to limit the policy-making power of the Commissioo and reduce the authority of the European Court of Justice. He will also back fines in the form of withheld EU grants for nations

inteoded to offer ideas for the British negotiating positioo at the intergovernmental confereoce. In particular ways to reduce the power of the Commission to initiate policy. Directives from the Commissioo should be subjected to year-long Europe- wide consul-

This would allow measures to be thoroughly discussed and debated by national parliaments before an EU decision is taken. Amendments would have to be submitted a month before the directive went to the Council of Ministers, and EU linguists should be prevented from making textual alterations without reference back to the Council of

This would rein in the Com-mission's power as the sole initiator of legislation and throw open the process to the public, Mr Redwood will argue. As part of a co-ordinated strategy to tackle EU fraud he will suggest that the European parliament should assume a stronger role as the "taxpayers' watch dog" and should be more ruthless in questioning and critici-

Labour recruits industry muscle to help on policy

Business Correspondent

Mr David Alleo, marketing director of Digital Equipment, the computer group, has never voted Labour in his life. But he is helping the party formulate its policy on science and technology in the run-up to the next general election.

Mr Allen has joined dozens of other executives on one of the six task forces just estab-lished by the Industry Forum, an independent body created in 1993 to encourage dialogue between Labour politicians, academics, industrialists and

The initiative, unveiled last week by Mrs Margaret Beckett. the party's shadow trade and industry secretary, aims to update the party's industrial strategy and to huild trust with a business community which traditionally has been

critical of Labour policy.

Mr Allen says his personal politics are irrelevant. Digital, he emphasises, wants to ensure all parties understand that UK industry is failing, pri-marily because financial institutions remain risk-averse and because national competitiveness remains more a matter for rhetoric than action.

The party's attempt to por-tray the oew initiative as

temporarily sidetracked at the launch when Sir Terence Conran, the retailer and restaurateur who is participating, said he vote Labour.

But while some of those involved in the task forces may hold Labour sympathies, corporate members are studiously maintaining a politically impartial approach

"Our involvement is not an expression of support for Labour and neither does it reflect expectations about the likelihood of a Labour government", said Mr Chris Strutt, director of UK government affairs for SmithKline Beecham, the pharmaceuticals company.

It is a sensible approach intended to ensure that the party develops sound policies in areas which are crucial for our company," he said. "If we doo't take part, we may end up with unhelpful policies." Despite coocerns expressed

by some participants, the task forces will not be an arena for blatant lobbying, says Mr Ger-ald Frankel, chairman of the industry forum and the businessman behind its creation. There is an element of selfinterest but a surprising number of people just want to help British industry succeed by formulating sensible policies",

Industry Fortherness Gerald Frankel: "People just want to help Frish i succeed by formulating sensible policies"

says Mr Frenkn aiming to bridge the poll-industrial divide, the forthw includes the Institute Directors among a growinembership of nearly 300. IoD, an avowedly non-scal body hut one which his Labour sympathies, says welcomes the chance to tricipate. Other members of forum, which also runs all interest group meetings organest group meetings organises conferences cinde British Gas, Ham Bank, Nissan, Tesco and Well.

The results of the force discussions will be cled in the summer and Mrskett The results of the

year's party conference. The governing Conservative parety has dismissed the initiative as another doomed preelection attempt to appear probusiness. Ministers intend to paint the opposition as a party which, despite its posturing, remains unable to fully embrace the market economy and which is still interventionist by inclination.

But the Labour party believes its strategy will be harder to denounce if it can demonstrate that industry itself has been the joint archi-

selling them at two suhurban

stations where there are also

Officials irked by Iraq arms probe

By Jimmy Burns and John Kampfner in London

Government officials will break with their tradition of anonymity by defending themselves publicly against criticism in Sir Richard Scott's arms for Iraq report.

Government departments are considering allowing individual officials criticised in the report to issue statements defending their conduct during the 1985-90 period covered by the inquiry. The report is to be nublished on February 15.

have consulted trade union lawyers and are determined to oppose any internal disciplinary action against them which might arise from the inquiry's conclusions. They have made clear they are not prepared to be used by ministers as scapegoats.

An apparently concerted campaign of criticism by people brought before the inquiry has forced Sir Richard to break his aelf imposed silence on the subject.

Without mentioning Lord Howe, the former foreign Middle-ranking civil servanis secretary who has led the

attacks, Sir Richard says in a affected to some extent by television interview to be screaned tomorrow: "The people who have uttered these criticisms were not on my Christmas card list anyway. and they are not about to go on

Sir Richard told Channel Four's Dispatches programme he stood by the format of the public hearings, amid criticisms from Lord Howe and others that he had acted as

whatever the conclusions, the prosecutor, judge and jury. He adds: "It would be naive prime minister is preparing to stand by those ministers most to suppose that the conclusions criticised, notably Mr William that I have reached will not be

Waldegrave, Treasury chief secretary, and Sir Nicholas Lyell, attorney-general. There is some speculation that Sir Robin Butler, cabinat secretary, might take early retirement to divert troubla from colleagues and to take responsibility for the government machine.

Directors may be liable for landfill tax

The British government is proposing to make directors of companies personally liable for the payment of a new envi-ronmental tax, in a move widely seen as an unprecedented attack on limited liabillty, Jim Kelly writes.

According to leading accountants, a little noticed clause in the Finance Bill would mean that directors of waste management companies could lose all their personal wealth if their companies failed to meet hills for the new landfill tax.

Customs and Excise, which will administer the tax, said the clause was needed to protect government revenue. But business organisations said it was a breach of the tradition which protects directors from company debt.

The landfill tax, to be introduced on October 1, is a charge on waste management companies for disposing of waste by weight,

The Confederation of British Industry said the provision was "clearly unjust and should be amended so that the liability of directors in relation to the landfill tax is consistent with existing tax law". But Customs said the clause

was a "revenne protection measure and a way of making sure the tax is paid" - especially in view of the high ratio of the tax to the value of the transactions it covers.

UK NEWS DIGEST

Warburg cuts analysis in US sectors

SBC Warburg, the merged investment banking. business of Swiss Bank Corporation and S.G. Warburg, has cut its analysis of US companies while holding its position as the lead research house in the UK. The investment bank, whose analysis had covered about 10 US industries, is to limit its efforts to the five in which it has particular expertise: energy, mining, capital goods, airlines and telecoms.

SBC Warburg said it planned to add to its teams for these five areas, but the reorganisation is expected to result in a net loss of jobs in the US research operation. It has also reduced the salesforce which sells US equities in Europe. The curtailment of some US research is part of a more general retrenchment during which SBC Warburg is making about 20 staff redundant from a total of 300 with the US operations. While dropping the weaker elements of US coverage. SBC Warburg retained its position as the best research house in the UK according to Consensus Research, the market research company.

UK companies surveyed said SBC Warburg had the best analysts on average, followed hy NatWest Securities, Kleinwort Benson, Merrill Lynch, UBS, James Capel, Barclays de Zoete Wedd, ABN Amro Hoare Govett, Credit Lyonnais Laing and Goldman Sachs. In the survey, published yesterday in Securities & Investment Review, SBC Warburg's analysts were rated top in property, breweries, food producers and insurance.

Soccer clubs may face EU competition probe

English soccer clubs which tie the sale of tickets for European foothall matches to expensive travel packages risk investigation hy the European Commission for anticompetitive practices. Competition authorities in Brussels have told Mr Glynn Ford, a member of the European parliament, that the use of sole agents for travel packages breaks com-petition rules. The Commission said it did not have enough evidence to judge whether English clubs were acting illegally. However, in 1992 it ruled that the organisers of the 1990 World Cup in Italy had acted illegally in awarding exclusive ticket rights to a single Emma Tucker, Brussels

Chief government inspector deplores school standards

The government will publish league tables of schools for children aged five to 11 for the first time next year, after its chief inspector announced that half of them were unsatisfac-

tory. Mrs Gillian Shephard, the education and employment secretary, announced that tables covering 11-year-olds' performance in this year's national curriculum tests would be published early next year. The results of the first tests taken by 11-year-olds, announced last month, revealed more than half did not reach the expected standards in literacy and number. the expected standards in literacy and numeracy. At that point Mrs Shephard said league tables must wait until the tests had "bedded in". Her change of plan follows the annual report by Mr Chris Woodhead, the chief inspector of schools in England and head of Ofsted, the schools inspectorate, which made damning criticisms of education for children aged five to 11. It found that half of all schools for that age group needed to raise standards.

John Authers, Public Policy Staff

Amstrad to shed jobs in lossmaking offshoot

Amstrad is to make about 150 of its 1,300 staff redundant after a re-organisation of its lossmaking consumer electronics operations. The move comes six weeks after Mr David Rogers. Amstrad's chief executive, resigned after a boardroom disagreement over restructuring of the husiness. Most of the job cuts relate to Amstrad Trading, which is based at Amstrad's headquarters east of London.

Meanwhile the Amstrad Direct husiness which handles the group's direct sales of home personal computers and facsimile machines, is to relocated to west London and will be man-aged as a subsidiary of Viglen, Amstrad's PC subsidiary. Amstrad Direct's factory in Shoebury to the east of London will close by May. "The market trend in consumer electronics means only lean organisations who concentrate on their core skills will flourish," said Mr Alan Sugar, Amstrad chairman.

Paul Taylor, Industrial Staff

Contracts

Rumbold, the aircraft interiors subsidiary of BSG International, has been awarded a five-year contract from United Airlines for seating, products worth an estimated \$14m. It has also won a contract to supply galleys and coffee makers to Southwest Airlines.

 Virgin Atlantic has appointed Manchester (Ringway) Handling as its ground handling agent for its new daily service to Orlando, Florida, which starts operating from Manchester in May.

 Runcorn-hased VBG, which makes couplings for commercial vehicles, has agreed to supply wheels to manufacturer Fruehant France. Direct supply will replace an 11-yearold licence agreement under which Fruehauf made VBG-designed couplings.

Dancers barred: Memhers of Aberystwyth council on the west coast of Wales opposed the use of Morris dancers to attract tourists. Mor-ris dancing is an English rural tradition in which men dress in white and wear ribbons, and council members demanded something more traditionally Welsh. "We have had cowboy specials on our local railway line for a number of years with people dressing up in Wild West costume and nobody has ever objected to that not being Welsh enough," said council member Ms Marina Ellis.

Party chiefs expect uproar about 'stringing along creditors' to fade

Deputy PM defends late payers

Conservative party officials were confident yesterday that Mr Michael Heseltine, deputy prime minister, would survive criticism of his endorsement of late deht payments by companies, despite continued attacks on him by Labour and Tory

Although some Conservative MPs admited that they had been embarrassed by Mr Heseltine's claim that he had been "quite skilful at stringing along the creditors" during his business career, officials at the Conservative party's Central Office said the deputy prime minister had been speaking in a personal capacity - and that the uproar would soon die

Mr Heseltine said on BBC TV's Breakfast with Frost on Sunday that many people who set up a business "face moments when they find it difficult to pay their bills".

He admitted that he "certainly went through that experience" when he was setting up companies in the period before he entered the government and that "certainly in those circumstances the creditors

waited for their money". He added: "If I hadn't delayed, I would have gone hust. They [the creditors] would have got nothing." Sir Peter Fry, a long-stand-ing Conservative MP, was one

of a number who criticised Mr

Heseltine over the remarks,

claiming that they were "the

ful," he said, adding that "time and time again" companies in his constituency went bankrupt because of late payment by larger corporations.

Michael Heseltine: "If I badn't delayed, I would have gone bust; creditors would have got nothing" wrong message for small busits criticism of Mr Heseltine's remarks amid signs that the "The remarks were not helpparty might endorse a statutory interest on late repayment of debt in a policy document

later this year.

Ms Barbara Roche, Labour's shadow minister for small businesses, contrasted Mr Heseltine's comments with a statement recently made by Mr Kenneth Clarke, chancellor of the exchequer. He declared that late payments "wreak havoc with cashflow, and . . . can make the difference between survival and failure.

Ms Roche's office also pointed out that the Depart-ment of Trade and Industry's late payment record had deteriorated significantly during the three years in which Mr Heseltine had been in charge

Her office quoted government statistics showing that, in 1992-93, Mr Heseltine's first year at the department, it had paid 90.5 per cent of its bills within 30 days of the agreed credit period. This had dropped to 84 per cent in 1994-95, Mr Heseltine's last year in the

Court of Justice has ruled that it was not discriminatory and unlawful for Italian EUROPEAN Criminal procedure to prevent Lloyd's of Lundon intervening in an insurance fraud

The case arose out of criminal proceedings against Mr Gianfranco Perfili, a Rome jeweller, who had theft insurance with Lloyd's. He was prosecuted for making a false claim and attempted frand.

Lloyd's had appointed a general representative in Italy by a general power of attorney drawn up under English law and in accordance with international treaty provisions abolishing the requirement for legalisation of foreign public documents.

The representative conferred on a lawyer a special power of attorney, in accordance with Italian rules of procedure, ao that be could pursue a civil claim for damages on Lloyd's bebalf in the course of the criminal proceedings against Mr Perfili.

This application to intervene as an injured civil party was refused by a Rome magistrates' court, as the Italian criminal code provided that such a civil action could only be made by a representative who had been given a special power of

attorney.

The Lloyd's representative had not been given such a power although under English law such a general power could be treated as signifying an intention to grant

special power. The Italian court concluded that this resulted in manifestly unequal treatment of Italian and British nationals as where the latter were victims of crime they were prevented from asserting their interest in civil law by the existence in Italy of rules which did not exist under English

It therefore referred two questions to Luxembourg. The European Court interpreted the first question as asking whether the Rome Treaty provisions which prohibit discrimination on grounds of nationality precinded a member state's legislation from requiring a victim of a crime who wished to bring an action as a

The European civil party in criminal proceedings to grant his representative a special power of attorney, even when the law of the member state of the victim did not lay down such a formality.

The treaty provides that any discrimination on grounds of nationality is prohibited within the scope of the treaty's application. The Court therefore stressed that the Italian legislation must be examined in the light of the treaty's provisions concerning freedom of establishment or freedom to provide services.

The court referred to existing case law where it had consistently ruled that although member states were prohibited from applying their laws differently on the grounds of nationality, such a prohibition was not relevant to the disparities of treatment where tbose differences affected all persons subject to them in accordance with objective criteria and without regard to their

The Court observed that neither the question referred nor the argu ment made by the parties had explained how the Italian legisla tion could constitute an unjustifia ble obstacle to freedom of establishment or freedom to pro vide services.

In answer to the first question the Court therefore concluded the treaty must be interpreted as not precluding a member state's legis lation from requiring such a spe clal power of attorney in such

By its second question the Italian court had asked wbether the relevant provision of the criminal code was contrary to article 6 of the European Convention on Human Rights and whether the convention was relevant to the case. Article 6 guarantees the right to a fair

The Court observed that where national legislation fell ontside the field of application of European law it had no jurisdic tion to give an answer to such questions. Thus in the light of its answer to the first question, there was no need to answer the

C-177/94: Gianfranco Perfili/Civil Party v. Lloyd's of London, ECJ 6CH. February 1 1996.

BRICK COURT CHAMBERS.

ilm 2000, a report published recently on the British film Gunning for industry by accountants Casson Beckman, concluded that producers need to rethink radically their approach to raising financa and marketing the pirates movies if the industry is to survive beyond the millenium A survey of 800 film executives

found that 69 per cent believe lack

of finance remains the industry's main weakness, with lack of gov-ernment support in the form of tax

breaks a significant contributory

Looming large, however, is a potentially far mora significant

threat to the viability of the film

industry, not just in Britain but in

the whole of Europe - the lack of

an adequate legal regime for pro-tecting copyright in the digital

"The bottom line," says Mr Rich-

ard Constant, general counsel of PolyGram, the world entertainment

company, "is that unless we are guaranteed a return on our invest-ment by a carefully constructed sys-

tem of copyright law, it is pointless

our investing in what is an

extremely risky business."
Although PolyGram is a relative

newcomer to the film business, it is

clear that its attitude to future

investment is shared by other Euro-

With n medium-hudget film cost

ing Ecul8m (£14.5m) to make and

between Ecu8m and Ecu10m to mar-

ket, and with only one in eight

films resulting in a net return on

investment, strong copyright repre

sents the necessary counterweight to the risks involved, they say.

Failure by the European Union to

address their concerns about the

lack of adequate copyright protec-

tion could, therefore, have dire con-

sequences for the EU's audiovisual

industry, wblch could ultimately

provide jobs, directly or indirectly,

The digital era presents the audiovisual industry with a double-edged sword. Digital and compression

technologies offer new possibilities

for film distribution. But they also

allow for easy and unantborised

mass reproduction, distribution and

At the moment, the quality of

images or sound taken from the

Internet, the time it takes and the

cost, makes mass reproduction un-

viable. But the technology already exists and Mr Constant believes

that in the music sphere, at least,

the quality of material on the Inter-

net will soon be as good as a com-

In any event, he believes it is a racing certainty the technology will

develop to make illegal mass repro-

duction a commercial proposition

before the EU can legislate to pro-tect copyright owners in the digital

age. "Legislation always lags tech-

pact disc bought in a shop.

modification of works.

for 4m people.

pean producers and distributors.

The film industry faces new concerns over copyright, says Robert Rice

nological development," Mr Constant says. "So often, solutions emerge only once there is a problem and it starts to burt."

The EU and other governments have already recognised the need to adapt existing regulatory systems to the digital era.

The Group of Seven ministerial conference, organised by the Euro-pean Commission last February, concluded that "high levels of legal and technical protection of creative content" will be essential to ensure the 'necessary climate for the investment needed for the development of the information

The Commission has produced a green paper on copyright in the information society. But in order to give the Commission a nudge in the right direction and present a united industry front, PolyGram founded the European Film Companies Alliance, a group of leading film companies including Bertelsmann in Germany, Chargeurs and Ciby 2000 in France, Rank in the UK, RCS in Italy and Sogepaq in Spain.

At a meeting in Brussels last month, the alliance left the Commission in no doubt as to its requirements and of the need for speed. Three issues in particular need to be addressed The alliance maintains that Europe's position in the entertainment and cultural sector will be determined by the level of copyright

it grants to film companies.
The US has always bad strong copyright laws, allowing producers to enjoy full control over the explaitation of films. The alliance argues this has been a significant factor in the strength of the US in the global entertainment market.

In Europe, by contrast, the pro-ducer has always played second fiddle to the director under EU copyright laws. The alliance says it is vital to the

health of the film business that in future the rights granted to directors, scriptwriters and performers are transferable without restriction to the risk-taker - the producer. The responsibility for realising the maximum commercial potential for the benefit of all contributors to a film is the producer's and it cannot do that effectively without having all necessary rights. As a consequence, the alliance

wants the EU to change the law to guarantee film companies the exclusive rights to authorise or prohibit distribution and copying of their material on electron-

ic networks such as the Internet. The alliance also maintains these rights are necessary if the industry is to avoid the damaging principle of compulsory licensing under which companies are forced to sell output at rates determined by a

At present, every copyright law in the EU provides that film compa-nies hold the exclusive right to authorise or prohibit the direct or indirect reproduction of their films. However exceptions to this right are allowed, mainly in respect of

private use, or home copying. As a result, 12 of the 15 EU member states have a system of com-pulsory licensing consisting of private copying royalties levied on the sale of blank tapes and/or recording equipment to compensate rights holders for lost sales due to private

The alliance says, however, that this idea of "equitable remuneration" in compensation for private copying reflected circumstances in the 1970s when it was impossible to enforce the reproduction right through legislation or technical

oday, it says the amount of work copied privately, both music and film, exceeds pre-recorded material purchased by nearly three to one, and this is bound to grow with the infor-

mation superhighway. Consequently, it says the legality of private copying needs to be reviewed and exceptions to the reproduction right abolished as electronic delivery makes private copying an even more attractive

proposition. Finally, if copyright legislation is to be effective, there needs to be a means of properly enforcing it. The alliance is calling on the EU to take a lead in promoting the development of effective technical systems for controlling reproduction and distribution in the digital environ-

Conditional access, or encryption, systems will be required to control use, and legislation will be needed to make them compulsory and to create criminal offences to deal with abuse, such as the import, distribution and sale of equipment aimed at circumventing technical copyright protection systems.

Other changes will be necessary to update legal definitions of such things as broadcasting and reproduction, but Ms Jill Tandy, a Poly-Gram lawyer, emphasises that the alliance is not calling for copyright law to be completely recast. "There was a camp for wholesale

recasting but we take the view that copyright can be adapted," she says. "After all, it has adapted pretty well to other changes this century. Rewriting could throw us into

LEGAL BRIEFS

Authorisation denied to quantity surveyors

consultants and quantity Laurveyors has been refused anthorisation to grant litigation and audience rights. The Institute of Commercial Litigators, led by James R Knowles, wants the right to conduct litigation and appear as advocates in construction and

engineering disputes. The Lord Chancellor's Advisory Committee on Legal Education and Conduct says if the Institute were permitted to grant such rights it would extend choice only at the serious risk of substantially lowering standards of service to the public.

The committee also takes the riew that the institute is not yet capable of enforcing qualification regulations or rules of conduct as required by the 1990 Courts and Legal Services Act.

The rejection does not prejudge any future application, according to the committee. However, it says that the institute lacks independence and reality at the moment, and these fundamental defects cannot be remedied in the sbort term by amending the application or the institute's conduct rules or qualification requirements. However, it should should take beart from the fact that four members of the committee dissented from that

Move from SEC

s Linda Quinn, the US Securities and Exchange Commission director, is to join the New York-based international law firm Shearman & Stirling as a partner.

Ms Quinn spearheaded the reforms which opened the US capital markets to foreign corporations. Since 1990 more than 500 foreign companies from 41 countries bave entered the US public markets for the first time as a result of her initiatives.

Secret identities

or ceuturies, a signature has been the way to close a business deal. But now can you sign your name in cyberapace and be sure it is secure? As electronic commerce becomes more popular, it is an increasingly relevant question for business. Already, even with the risk of security breaches, more and more husinesses and their customers are setling up systems for computer-

But the growth in use of electronic commerce could he faster still if a signature could be effortlessly and securely tied to everyday business deals. This is prompting the development and upgrading of electronic signature software.

to-computer exchange of docu-

Two ways are emerging to make an electronic mark that carries the some credibility as a handwritten signature. One is capturing on computer the "behaviour" of a person's signature - a biometric model.

The other approach relies on an algorithm, or mathematical procedure, to form a "digital signature". This is the basis of so-called publickey cryptography which, its supporters believe, is an important step toward a secure form of electonic

In a departure from traditional forms of cryptography, where the sender and recipient use one secret code to encrypt and decrypt messages, this technique gives a user two software "keys". The information on a public key can be pub-lished in a directory, but data on a private key is known only to the owner. Both keys are needed to

For example, a New York bookstore chain buyer looks up the public key listing of a London publisher. The buyer encrypts the electronic order with the publisher's public key. Ouce the informalion is encoded it cannot be opened by the buyer, and belongs to the publisher. The order is then sent to Loodon over a network where the publisher uses his corresponding private key to open it.

A public key could therefore be viewed as a home address which allows anyone to send a private letter. But once the letter is dropped through the front door, only the owner with the private key to the door can retrieve the mail.

Proof also needs to be obtained about who sent the information. For instance, if the London publisher sends an electronic message to the owner of the New York bookstore chain offering to buy it, how does the owner know the message is

In this case, the door swings the other way. The London publisher sends an E-mail encoded with the private key and the New York owner uses the publisher's public key to decode the message. The publisher's public key will only open messages encrypted with his private key, so the New York owner can be certain who the sender is. Authentication takes place when the public and private key match, and together these comprise a "digital signature".

The technology will play an important role in electronic commerce because "digital signatures make messages self-validating", according to Kurt Stammberger, technology marketing manager at US-based RSA Data Security, one of the recognised leaders in public-key

thers seem to agree, RSA has some hig names on its client list - Apple Com-puter, Microsoft, Motorola, Visa International and MasterCard International, Also, International Buslness Machines and RSA are working together to produce easily accessible cryptography for their customers. One of their goals is to make the Internet a safe place to carry out electronic commerce.

Personal digital signature codes may be a little romplicated or even intimidating for ordinary consumers. who may feel that public-key cryptography is forcing them to change their habits to suit a new

For this reason, a different approach is being taken by Peripheral Vision of the UK. Its PenOp software package "captures", stores and verifies handwritten signatures electronically. Managing director Jeremy Newman says this approach is "not asking people to change

their customs and practices".

By using a digitising pen attached to a computer, a "blometric token" of a person's signature - its dynamics, speed of writing and stroke order - is recorded as be or she writes on to the screen.

The information goes into a data-base as a record of someone's signing behaviour but as Newman notes we don't actually retain the means to recreate the original signature". So there is no boneypot of signatures in the database to attract a computer hacker.

Other features support verifica-tion in the data packet, Among them, the identity of the signatory, time and date of signing, and a 'check-sum" of the transaction that was signed to detect if any attempt were made to alter the document. Check-sums are computations to show two sets of data are identical.

With this software, for example, a customer could read a loan application on a computer screen and approve it by inscribing his or her signature on to the screen, using the pen. The signature would then be matched with an original biomet-ric token held on file, and the process would be both convenient for customers and reduce paperwork.

TECHNOLOGY

Ultimately, both types of system could make their mark in the world of electronic commerce, as they would serve different markets. But two big issues remain unresolved.

First, it is not yet clear how electronic signatures will be accommodated in law. The US state of Utah recently showed the way with legislation aimed at giving the public-key technique credibility. In a global economy, however, the aim would be to have international uni-formity involving as many jurisdic-tions as possible, which may be bard to achieve.

Second, an important element in "securing" an electronic signature for cyberspace will be public acceptability. And that may be one of the toughest encrypted messages to get

Airbelts may be the next solution for protecting car drivers and passengers, says John Griffiths

An inflated approach to vehicle safety

fter the seatbelt and the airbag, could the airbelt be the next solution for protecting car drivers or

passengers in collisions? A small UK company, Advanced Research Corporation, thinks it could; it has taken out patents and claims to be talking to two carmakers after developing a

As its name suggests the airbelt concept, which ARC director Riccardo Anzil says was inspired by students at Sussex University. incorporates the airbag principle into that of the seat belt. In an impact the belt inflates to protect the occupant.
ARC claims the airbelt's

advantage over conventional seathelts is that it can absorb much greater impacts than ordinary belts and, because the impact loads are spread over a surface area at least 400 per cent greater than a normal belt, avoids the injuries which a seatbelt can inflict in a severe crash.

The benefits of such load-spreading are aiready well known in the motor racing world, where the straps of current safety harnesses typically are at least 50 per cent wider than road going

vehicle belts.

It is claimed the airbelt serves a similar function to the airbag, protecting the occupant from hitting the steering wheel assembly and protecting a large part of the body - although not the bead - from flying debris. When applied to rear seat

passengers there is a particular advantage to such a system. The airbelts perform a similar function to airbags, without requiring an airbag to be installed in the back of the front seats which could further injure a front seat

ARC, which says it has experimented with 70 different configurations, also maintains that airbelts could be made more comfortable to wear than conventionally shaped belts by rolling them into long, flexible "cylinders" - mncb like an exceptionally elongated Swiss Roll and beld by weak stitching. When the airbelt inflated these

INTERNATIONAL PEOPLE

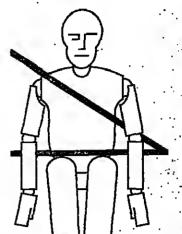

A new way to belt up

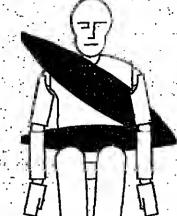

Air belt...

Round, smaller and more comfortable

and at crash

450% more surface creates a damping pillow

stitches would immediately burst. The belt's inflation would be by similar inert gas-injecting mechanisms to those of the airbag. ARC also maintains that inflation would be sufficiently rapid for the belt to begin absorbing impact

energy immediately.

ARC, based in Brighton, says it is discussing a non-exclusive licensing agreement with the two carmakers, which it will not name, and is looking for similar arrangements with other vehicle or components producers.

Meanwhile airbags are becoming both more efficient and more environmentally friendly. General Motors' Opel/Vauxhall subsidiary has introduced, on both its Vectra and Omega models, airbags which dispense with pyrotechnic inflators producing toxic gas and requiring a relatively heavy, single-use

The GM system, developed by New Jersey-based AlliedSignal. uses a non-toxic propellant called arcite, which is fired by electronic impulse and which heats compressed inert argon to inflate the airbag.

Since the system produces relatively little heat, only nylon mesh is needed for the airbag. This is easily recyclable and, because when folded it takes up much less space than a conventional airbag, the overall size of the steering wheel airbag assembly can be made much

The latter aspect is of considerable importance for vehicle manufacturers. It was only in the late 1980s that cars began incorporating radio and cruise control switches into the steering wheel, fingertip functions which met with warm enthusiasm from most drivers.

The advent of the airbag meant that, for many cars, such functions were once again exiled to elsewhere on the dashboard. The GM/AlliedSignal airbag system bas allowed their return.

Bijur takes Texaco chair

Texaco's Peter Bijur has proved yet again that a spell in London is often a signal that a US executive is being groomed for great things. Bijur, 53, pictured above, was chairman of London-based Texaco less than five years ago. In July he takes over as chairman and chief

executive of Texaco, one of the world's biggest oil companies. Texaco's decision to pick

Bijur, who oversees Texaco's business in Europe, Latin America/West Africa, Middle a rival agency.

Michel Goudard, head of international operations, for BBDO, a rival agency. old style of combining the role into four. The biggest division of chairman and chief executive. When John K McKinley retired at the end of 1986, Texaco split the job in two giving Alfred De Crane the chairmanship and making James Kinnear, chief executive. At the time the company was in serious legal and financial trouble and vulnerable to a takeover

Kinnear is credited with restoring Texaco's fortunes and when he retired in April 1993, DeCrane inherited the chief executive's job. Bijur, who had once been McKinley's personal assistant, started in Texaco's marketing department as did Kinnear. William

Havas change Euro RSCG Worldwide,

Europe's largest communication group, changed more than its name last week. The group now to be known as Havas Advertising - after the Havas group which holds a 38.8 per cent stake - also revealed a huge reorganisation. The restructuring follows last November's departure of Jean-

- advertising agency Euro RSCG - will be headed by Alain Cayzac, formerly head of French operations. He also takes responsibility for North America. Under him will be Nick Baum, bead of Europe, Pierre Lécosse, head of Asia, and Eduardo Plana, bead of Latin America.

The Campus division comprises a rival European advertising network which includes WCRS of the UK and Rempem & Partner of Germany. The UK's Robin Wright is chairman and Germany's Thomas Rempem will be chief executive. The media buying arm will be headed by Didier Comet Daage former chairman of Saatchi & Saatchi in France. Jacques Hérail, who remains Havas Advertising's chief financial officer, will head the diversified agencies division. Paul Abrahams

ING's Mexican loss ING's takeover of Barings last year has produced delayed

shockwaves in the New World, where Tim Heyman, Mexico's best-known investment banker. has resigned as chairman of the group's Mexican operations.

Heyman. arrived in Mexico almost 20 years ago, built up one of Baring's leading emerging market teams from scratch.

His departure deprives ING Barings of a well-connected figurehead, although ING's \$100m investment in Mexico, with new corporate and investment banking divisions, will ensure that important doors remain open to them.

Heyman has not joined a rival outfit, and he has not taken Baring's top Mexico analysts with him. But with foreign interest in Mexico again on the rise, he is not likely to be out of work for long.

Peugeot's new driver

The jostling to replace Jacques Calvet as chairman of Peugeot Citroën has intensified with the announcement that Jean-Martin Folz has become chief executive of Peugeot cars. The promotion means he is one of four executives who report directly to Calvet. Folz, 48,

where be was chief executive. Calvet, who will be 65 in September, is scheduled to leave in April 1997. Folz is now well main rival remains Jean-Yves Helmer who is director of the automotive division for the main group. Paul Abrahams

joined Peugeot Citroen last

July from Eridania Beghin-Say

Research chief in Moscow

Dirk Damrau, one of the leading research analysts for central and eastern Europe, has been recruited by the Moscow based Renalssance Capital Group to head its research operations. Damrau was formerly director of regional research at Salomon Brothers in London.

The 32-year-old Damrau concedes it will be a tough job persuading foreign investors to take an interest in Russian equities just after the sacking of Anatoly Chubais, the country's leading economic reformer, and five months hefore unpredictable presidentlal elections. "But the fixed income market is fabulous right now," says Damrau. Renaissance was formed last

year by Boris Jordan and Ste-

ON THE MOVE

■ Philippe Le Goff, former chief executive of Sanofi Inc. the US holding company of the international healthcare group, Sanoti, has been appointed head of strategy and pharma policy at CIBA PHARMACEUTICALS, from March 1. He began his career with Ciba in 1976 and joined Sanofi's research division in

■ Philip Wroughton retires as vice chairman of MARSH & MCLENNAN COMPANIES at the end of June. Richard Blum, chairman and chief executive of Guy Carpenter & Co. moves to the parent company to lead the integration of its insurance broking, reinsurance intermediary, risk management and insurance program management capabilities. Brandon Sweitzer takes over as chief executive of Guy Carpenter and Hady Wakefield moves up from president of Guy Carpenter to chairman. Wakefield succeeds Wroughton as chairman of The Bowring Group. ■ ROBERT BOSCH, the German engineering group, has emphasised its increasing

international scope hy appointing Robert Oswald, 54. president and chief operating officer of Robert Bosch Corporation of Illinois, as an associate member of the board of management. Hermann Eisele and Hansjoerg Manger will retire from the management board having reached 60. Hans Hugendubel, president of Robert Bosch (Australia) and Gotthard Romberg, former president of the Austrian subsidiary, also become associate members of the board of management of Robert Bosch. The appointments take effect July ■ Leon Kalvaria, 37, a former

managing director of First Boston, has been appointed a managing director and head of fixed income origination and capital markets at SCHRODER WERTHEIM & CO. Francis P. Avanzi, 43, has become chief operating officer of ARIANESPACE, the European space transportation company. He joined the company in November 1995. Since 1992 Avanzi has been chairman of CFM International, a joint venture between SNECMA and GEAE (General Electric

Aircraft Engine). ■ Guido Belli, 40, has been appointed managing director of NATWEST VENTURES ITALIA SpA. He was previously with SOPAF, one of the leading Italian investors in unquoted equities, from 1987 to ■ Jane Siebels-Kilnes,

currently senior vice president at Templeton, joins CASPIAN ASSET MANAGEMENT as chief investment officer. She will be based in Nassau, Bahamas, although she will be regularly in New York. ■ Heige Eklund, 51, succeeds Bo S. Hedström as chief executive of SODRA, one of the world's largest producers of paper pulp. Eklund has been managing director of the subsidiary Södra Cell since

■ Michael J. Boskin, former chairman of the Council of Economic Advisors, has joined the board of EXXON CORPORATION.

■ Steven J. Baumgartner, 44, has been appointed president of R. R. DONNELLEY & SONS' newly formed global commercial print sector, with responsibility for the company's commercial

printing operations outside North America. He joined in 1993 from Rhone-Poulenc Rorer in Paris.

■ Gunn Waersted, 40, bead of Den Norske Bank's investment management division, appointed president of VITAL FORSIKRING. ■ John K. Wulff. controller of UNION CARBIDE CORPORATION, succeeds Gilbert E. Playford as chief financial officer. Playford has decided to pursue his private business interests. Prior to joining Union Carhide in 1987, Wulff was a partner in KPMG Peat Marwick. E. Patrick Galvin has replaced Patrick D. McGuckian as a non-executive director of GREENCORE GROUP. Galvin is a director of Waterford Wedgwood. ■ Fergus Sheridan has replaced Michael Whelan as

managing director of the IRISH FUTURES AND OPTIONS EXCHANGE. Whelan is joining CSK - Quay Financial Software. Ronan O'Donoghue, of Bank of Ireland Asset Managers, becomes chairman of the exchange. ■ Michael Barz, a Frankfurt lawyer succeeds Guenther

Krause as a supervisory board

and non-executive deputy chairman of THE RONGKONG AND SHANGHAI BANKING CORPORATION. Helmut Sohmen succeeds her as non-executive deputy chairman. She remains non-executive deputy chairman of HSBC Holdings Sir Joseph Hotung will retire from the board of Hongkong Bank on 18 March 1996 having reached the age of 85. Dipak Rastogi replaces Alvaro de Souza as head of

> been head of global derivatives. Vinay Bhargava replaces Thomas Allen as THE WORLD BANK'S resident representative in the Philippines. Bhargava has been with the bank since 1975. covering Europe, Middle East and Western Africa. ■ Tessen von Heydebreck, a deputy board member with responsibility for asset

management, has been

appointed a management

CITICORP's cross border

finance group. Rastogi has

board member of DEUTSCHE BANK Serge Grzybowski, deputy managing director of BANQUE

Bernhard Sinz becomes managing director of OEUTSCHE CARGILL GmbH on I June 1996. He is responsible for the agricultural division in Germany and succeeds Willem Mock, who becomes president of Cargill BV of Amsterdam, taking over from Rudolf Hoeffelmann, who retires on the same date. ■ Jennifer L. Miller, 40. appointed general counsel of S. O. WARREN, which was acquired by South Africa's

Sappi in 1994. She was general

counsel of the Boston Gas

Company.

he Fool's Gold of the title to Bill Woodrow's ambitious and admirable exhibition at the Tate is, so Brewer tells us, a name given to iron pyrites or pyrite. By its brassy yellow colour it is sometimes mistaken for gold and in that fond belief, poor Martin Frobisher, the Elizabethan adventurer, crossed the Atlantic several times in hope of riches. Quite what ironical association - I assume if be ironical - is intended in its attachment to a show of recent sculpture, is not so clear. Is it perhaps the true artist's gift of transforming base material into real aesthetic treasure that Woodrow has in mind? Or is it, rather, a bint at a pre-emptive and quite it, father, a mint at a pre-emptive and quite unfronical acceptance of the inevitability of failure and disappointment?

It is perhaps a bit of both Most certainly the show is a brave undertaking. Since

Nicholas Serota, at the outset of his directorship, opened up the long central vista of the Tate's Driveen Galleries, and returned them to the sculpture for which they were designed, only a handful of artists have been asked to fill them in their entirety, and it remains e real honour. It is also clearly a most daunting commission, which often brings its artists out in a sort of sweat of theatrical desperation - a towaring centre-piece here, a spreading instal-

lation there - to fill the space.

Noodrow is no exception, and while his gleaming spire in the rotunda, "God Knows", is something of a tour de force, with its extravagant sprouting fronds and wonky cockerel at its crest, and his huge and improbable cannon, "Endeavour (Dredged from the First Wreck of the Ship of Fools)", suitably commands the entrance hall, there is a sense of things elsewhere being a little over-stretched. Is it a question of the artist trying too hard? Perhaps. Of being over elaborate, over literary or symbolic? Again, perhaps. Of

being out of his depth? Certainly not.

The large combination work that occupies the greater part of the farther gallery,

In Awe of the Pawnbroker", is a case in point. More a tableau than a coberent piece of sculpture, it consists of five enormous rings, with cushions as their bases for stability, that act as plinths for the jewels and settings, as it were, that they support on their faces. These last, in fact, are eccentric sculptural compositions, like abstracted and surreal still-lifes. And these five rings with all their garnishings are tethered to a long and heavy chain, which itself is tied off around a pillar of the gallery, All but the chain is cast in bronze.

Ir hag, the merell

ring a beel airbag at their much

ich hears

What we are left with, at the end of it all, is a whole that seems rather less than the sum of its parts. In its detail it shows ns Woodrow at his very best, wry and witty, endlessly inventive. The formal games and tricks of association that these still-life or "jewel" components play - of mass and space, stasis and movement, representation and abstraction - are in themselves as intriguing as they are delightful. Even the larger entity of cushion and ring as occasional table, with variations worked through each of the five elements, works well enough, albeit in a more obvi-ously surreal way. It is only the final linking together that takes it that step too far, onto the stage and dangerously close to

So much for the doubts, and even in the doubtful example Woodrow's qualities as a

ARTS

Wry, witty and endlessly inventive: In Awe of the Pawnbroker', 1994, by Bîll Woodrow

Sculptural treasure

William Packer admires Bill Woodrow's work at the Tate Gallery

sculptor come through. What is of particular interest, made clear throughout, is the relationship of this present with earlier work. It is an old theme that, for all the apparent differences of the moment, of which even the artist might be unaware, the life's work in time will come back to itself. Whatever else changes, essential interest and sensibility remain the same, Here indeed we come to realise that Wood-

row's work, early and late, is all of a piece. He first made his name neither as modeller nor assembler, but as a scavenger and an improvisor, cutting and bend-ing fantastical images out of the guts of

domestic machinery, just as a child might contrive a duck or hat out of a sheet of paper. Such sleight of hand imparts its own disciplines and mysteries, and the freedoms too that follow from them. What is fascinating and exciting now is to see Woodrow as he returns not to the actual mechanics of those past improvisations, but to the spirit of invention and intuitive composition that informed them.

It is a spirit we catch in those exuberant ring-top still-lifes, though the fork or bowl, fruit or twig, fruit or bowl that springs from the composition is no longer folded metal, but modelled in clay, stuck on somehow and cast in bronze. It is intimate and lively work, self-mocking and direct. At last we realise that such intimacy and exuberance are indeed the proper qualities of the monumental sculptor. Visitors to the great Cézanne exhibition from next week-end are sure to pass through Woodrow's show. They have only to mind their step to be rewarded.

Fool's Gold - new and recent sculpture by Bill Woodrow: The Tate Gallery, London, SW1 until April 28; then to Darmstadt in the autumn. Sponsored by Romulus Con-

Opera/Richard Fairman

f nothing else, it was an occasion. A total of around 45,000 people have bought tickets for the nine performances. There were more bow-ties at the gala premiere, in aid of the British Lung Foundation, than at Covent Garden; and the Princess of Wales glittered in the rough box, while her admirers with their

zoom-lenses waited outside. The opening night of La Bohème at the Royal Albert Hall was where everybody but an opera-lover wanted to be. It came as the climax of a week in which opera was in the headlines almost every day, from the disastrous fire at La Fenice in Venice to the official confirmation that the Royal Opera has abandoned plans for its temporary move to a new theatre on the South Bank. Meanwhile, the television documentary series on the Royal Opera House continues to pull in the viewers.

One thing is clear: whether it is BBC2 or The Sim, opera has become news. People want to know what is going on in the world of opera and will have an opinion on it themselves, even if they have never been inside an opera-house. This is where the Royal Albert Hall comes in. In collaboration with Raymond Gubbay, commercial presenter of popular concerts, the hall has decided that there is an untapped audience

Big-scale Bohème

The fact that extra dates had to be added when the edvertised performances of La Bohème sold out within weeks suggests that the management is right. As I see it, the Royal Albert Hall starts with e simple advantage in this market, which is that it is not an opera-house. The many thousands of people who visit each year for the Proms, touring circuses or tennis matches do not see anything elitist or Intimidating about going there.

How else to explain why so many people should choose to attend a production which was in so many ways unsatisfactory? An early warning came with the muffled rendering of the National Anthem from behind part of the set. Fortunately, the mock-Parisian house soon flew up into the roof, but too many other hindrances the wide-open acoustic and clumsy amplification - remained for this ever to be Puccini's evening. The first two ects

for opera and taken the plunge with its sounded e jumbled mess, however hard first ever production. sounded e jumbled mess, however hard the conductor, James Lockhart, tried to hold orchestra and singers together.

The microphones did funny things. Mimi's delicate cough became a massive, gut-wrenching choke, but parts of the orchestra regularly disappeared. In gen-eral, the women fared better, Katerina Kudriavchenko putting across some touching phrases in Mimi's solos and Vivian Tierney giving Musetta a bit of sparkle. The amplification beefed up José Azocar's Italianate tenor to sound like the real thing, but failed to boost his star appeal. William Dazeley's young, but lightweight Marcello, Tômas Tômasson'e sympathetic Colline and Howard Quilla Croft's neat Schaunard only ever seemed a small-scale

set of Bohemians. As there is no etage, the production was given in the round with the stalls seats removed. By and large it was a stilted affair, which spent most of its energy painting a picture of 19th-century Paris

Oots of period fashious on the boulevard and a seller of French flags to remind us which country we were in) and rather too little getting the characters to come alive. Michael Hunt was the producer and Alison Nalder the designer, whose main challenge was to keep the set from getting in the

Those in the front few rows do enjoy a bonus when the snow falls on them as well. Otherwise, there is little on offer here that cannot be found more successfully elsewhere. Although it is dubbed opera for the masses, the prices at the Royal Albert Hall (£13.50 to £37.50) are not that different from what one would pay at English National Opera, where the audience can hear and see a good deal more of what is going on.

Widening the audience for opera is a crucial objective and I wish Gubbay and the Royal Albert Hall every success for their 1997 production, which is already at the planning stage. But the masses who have enjoyed this La Bohème should get straight on the tube to the London Coliseum to see what good-quality opera at reasonable prices is really like.

Sponsored by American Express. Further performances until February 10.

Concerts/Stephen Pettitt

Uncomfortable chemistry

reat Orchestras of the World, claims the publicity promoting the Barbican's season of visiting orchestras. And the Orchestre de Paris should still be one of them, given its distinguished, if short, history. It was formed by Charles Munch in 1967, to replace the old Orchestra of the Paris Conservatoire. Munch was succeeded as music director by Karajan, Solti and Barenbolm no less. But since 1989 Semyon Bychkov has been in charge, and the Russian cannot hold a candle to his predecessors in terms either of raw inspiration or of careful preparation. Or so it seemed in the two disappointing concerts that the orchestra

gave last week.
In the first, with the help of the London
Symphony Chorus in its usual magnificent voice and of the excellent singers, Eliza-beth Norberg-Schulz and Jard van Nes, they boldly tackled Mahler's Second Symphony, the "Resurrection". French orchestras are not renowned for their Mabler - a fundamental dichotomy of spirits - and Bychkov added to the already uncomfortable chemistry by sometimes trying to make the whole work sound e bit too much like Tchaikovksy, et any rate when the orchestra managed to play together.

There was too much plain flamboyance, lacking the sense of irony which should maintain the music's sinister element in, for instance, the Scherzo third movement and the reading lacked a certain vital poise when the "Urlicht" movement began not at all the fault of van Nes, whose gloriously golden voice fully matched the sustained eloquence of this raptly transcendent music. But the finale duly thrilled and inspired; even in the clumsiest of hands this momentous paean of hope and faith cannot fail to do those things.

The following evening boldly began with a new piece, Gilbert Amy's Trois Scenes pour Orchestre, which had its world premi-

ere in Paris the week before. Amy is a reliable composer, solid in technique, eclectic in influence, whose music has an attractive surface. But during these three dour, over-long movements, described in the programme as "a symphony with no development", one looked in vain for a glimmer of real fantasy, a hint of light, a reason for the music's being.

distinctly shoddy reading of Stravinsky's The Rite of Spring followed after the interval. Hearing the work done like this reminded me of tha first time I heard a college orchestra attack it, not with the sure-footed relish with which today's students commonly despatch the piece but with a sense of fear that compromised both the primal brutality and, equally, the still underestimated lyricism of the work. Bychkov seemed to have decided not to waste rehearsal time balancing the textures, so denying the music a refinement in that department that would have increased its impact. The Rite is a carefully, brilliantly orchestrated work even at its loudest moments.

Fortunately, between these two rather depressing exhibitions there was the excitement of hearing a marvellous violinist at his best. Maxim Vengerov, still only 21, delivered Mendelssohn's Violin Con-certo with an ecstatic sense of its beauties. every phrase deliciously, poignantly weighted, and freshly rethought, and with a sound, moreover, to melt the iciest of souls. Bychkov and the Parisians knew what they had to do in the presence of such a wonderful musician, and to their credit they did it well. They enjoyed the two shamelessly exhibitionistic, sentimental and brilliant encores (orchestrated versions of Kreisler's Piece Viennois and Piece Chinois, I am told) as much as we and, patently, Vengerov himself did.

Theatre/Sarah Hemming

Somewhere between Beckett and early Bond

he Gate Theatre in Notting Hill has specialised in resurrecting European classics, offering fresh perspectives on the Europe of the past by staging hitherto neglected plays. This spring, however, the theatre expands its vision to include the present and the future. The "Gate Biennale" is a season of six contemporary European plays all written by young playwrights within the last three years. Plays come from Sweden, Russia, Germany, Austria and Spain, with one interesting addition from the UK: a play by Gregory Motton, who is British but

better known abroad. To judge by the first double bill, Gregory Motton's Cat and Mouse (Sheep) and Elfriede Jelinek's Services, or they all do it (from Austria), European theatre is in a state of despair. Both plays are savage, bleakly funny and acidly sathrical about contemporary western society, both use language fantastically, as if it were a weapon against the tedium of reality, both reveal an original mind et work. And yet the experience of wetching them is

depressing, rather than invigorating.
In tone, Motton's Cat and Mouse (Sheep) comes in somewhere between Beckett and early Bond. It begins with what appears to be a slice of naturalism: wa are in e rundown living room that seems to double as a corner shop, where the shopkeeper, Gengis, serves an old lady and talks of price wars to a battered old individual he refers to as uncle. Only the stilted delivery of the dialogue warns you that realism is not intended.

Then, suddenly, the play shifts gear and we are in a fantastical, nightmare world. where Gengis (played, mystifyingly, by a female actress) is running the country from this grubby room, with all the destructive zeal of a tinpot dictator. As a children's game reflects the world they live in, so this sustained fantasy allows a bitter tour around the debris of Great Britain and adds up to e sour portrait of corrupt and hypocritical authority.

It is a cleverly constructed, deliberately ngly plece, fired by anger, and yet there is something so unremittingly grim and selfconsciously shocking about It that, far from igniting a spark of sympathy, it simply wears you into boredom.

When a play less than 90 minutes long feels like a sermon, some essential valve is missing. The same is true of Services, although this time the subject is the hopeless mutual incomprehension of the sexes and the ugliness of pornography. In Elfriede Jelinek's play (translated by Nick Grindell) we are in a bleak service station which, along with the tasteless food. seems to specialise in tasteless liaisons.

Here two bored suburban housewives have arranged to meet two anonymous men, disguised as "Moose" and "Bear", for soma rough sex in the toilets while their pompous, chanvinistic husbands wait in the burger bar. But e chance meeting between the four men leads to the hus bands taking on the animal discuises and trying to service their wives like beasts, to the disillusionment and disgust of every one concerned.

Jelinek, like Motton, specialises in a sort of viciously poetic, dense dialogue that matches the bleak world she describes. The trouble is that after e while you cannot be bothered to care about her characters or her theories.

Both plays are adventurous in style, yet they manage to depress, without revealing anything new. You leave the theatre feeling as if yon have been closeted for three hours with a ranting, apocalyptic dinner

Both plays continue at the Gate Theatre. London W11 to February 23 (0171-229 0706/5387).

Emu is still on the cards

Since Germany and France both still believe in the political and economic advantages of monetary union, they will try to find a way to start in 1999

Many in the UK view the possible fruition of the Europer cent. According to the pean Union's plan for economic and monetary union with borror. At some point, they fear, they will have to make a painful choice. People faced with so dire a prospect are inclined to seize on any possibility that it will not happen. It may, all the same.

At the end of last week, Helmut Kohl, the German chancellor, repeated his view that "if there is no momentum for continued integration, this will not only lead to a standstill but also to retrogression. Nationalism has brought great suffering to our continent," he warned. "Just think of the first 50 years of this century."

Mr Kohl fears that his own country could once again destabilise Europe. Such fears seem quite unbalanced, but the fact that people like Mr Kohl hold them is more important than whether they are justified. For him, Emu is more than an economic arrangement. It is a waystation on the long march to political integration.

If the political motives for Emu remain potent, economic forces are also in its favour.

True, the fiscal prospects look ominous. Given the slowdown in economic growth, the ratios of general government borrowing to gross domestic product of most member states - including France and even Germany - may well remain above the Maastricht treaty's magic number of 3 per cent next year. This is not surprising when they were generally well above it in 1995, as the chart shows.

Furthermore, discretiooary fiscal tightening may not belp on its own because it would worsen the fiscal outcome, by deflating the economy. Suppose, for example, that the induced short-term decline in GDP were as large as the intended reduction in the fiscal deficit. an outcome suggested by many economic models. Theo a discretionary reduction of 1 percentage point of GDP in the fiscal defi-

Organisation for Economic Co-operation and Development, that would itself

increase the fiscal deficit of larger member countries by half a percentage point. To eliminate an excess deficit of 1 percentage point of GDP, the fiscal tightening would then have to be 2 percentage points. If that were all, Emu would

probably be postponed. But

there are also interest rates.

As is noted by the German economist Daniel Gros, in a lucid analysis to be published on Thursday by the Centre for European Policy Studies, a Brussels-based think-tank, fiscal contraction might grant several member countries a credibility bonus.* If, for example, italy had rates of interest as low as in the hardcurrency core, its savings on debt service payments could be 41/2 percentage points of GDP, reducing its required fiscal adjustment to a manageable 1 percentage point.

Unfortunately, the credibility benefits of fiscal contraction would be negligible for coontries like Austria, Belrium. France or the Netherlands, because their interest rates are already close to Ger-

European government budget deficits

cit would also lower GDP by 1 many's. But they can look to 1993 could be made credible the Bundesbank, instead.

Germany is now in exactly the same leaky economic boat as the remainder of Europe's monetary core: its real exchange rate is overvalued; activity has slowed; unemployment is close to 10 per cent of the labour force and rising: and its inflation and monetary growth are low. Inevitably, the Bundesbank's short-term rates of interest have been declining sharply. Its repurchase rate has fallen by 1/2 a percentage point over the last month. Further reductions ahould be on the way, helped by lower

rates in the US and loose monetary policy in Japan. In addition to the slowdown, two other powerful forces are at work on the Bundesbank: the political commitment to European integration, at least of its president, Hans Tietmeyer; and Germany's own worries about the possible alternative to Emu.

The last thing German industry wants is devaluation by another big European economy, least of all France, Germany's most important single trading partner. That might be no great risk if the narrowband exchange rate mechanism that fell apart in August

would let a recession-induced failure to hit arbitrary deficit figures in a particular year prevent them from starting Emu in 1999. The only good reason for these countries to postpone the project would be the view that other important countries would be able or willing to join just a few years later. But this would be more

do so only by eliminating the

option. That is precisely what

that France and Germany

Given all this, it defies belief

Emu will achieve.

likely if the core countries were to go ahead, since thet move would put formidable pressure on countries like Italy and the UK. The only question is whether the treaty would allow them to proceed. What it says is that fiscal deficits

should be 3 per cent of gross domestic product unless "the excess...is only exceptional and temporary and the ratio remains close to [3 per cent]". And who will decide whether they are? A qualified majority of member states acting on

the recommendation of the once more. But it cannot. Commission is the answer. Even France might sever its If fiscal deficits were far above 3 per cent there would currency links with the be a problem, not least D-Mark if the door on Emu because of potential opposiwere to be shut by too tight a tion within Germany. accepted as legitimate by political forces and the population." The danger is that it will not be, because it imposes insufficient fiscal discipline for some and too much for others, because it divides the EU into hard core sheep and soft-currency goats and because it might become irredeemably tainted by the EU's chronically high unemployment, even if were not the main explanation.

A failure to start Emu may expose the EU to the retrogression Mr Kohl fears. That is why Emu is likely to happen. But the decision to start would hardly be less risky. The further members are from meeting the fiscal targets at the start, the greater the potential for bitter disputes thereafter. But the EU has no easy way out of its dilemma. It has to choose. In all probabil-

ity, it will choose Emu. *Daniel Gros. Towards Economic and Monetory Union: Problems and Prospects, Centre for Europeon Policy Studies Paper Number 65, Brussels, Technology · Richard Gourlay

A fine point made without needlework

Injectors that push drugs through the skin are on the way back

Whatever happened to the reusable needle-free injectors used to vaccinate children against flu in the 1970s? The answer is that they lost favour as it became apparent that patients might contaminate each other with viruses such

as hepatitis B and HIV. Now two British companies Weston Medical and Oxford Biosciences, are developing needle-free devices that avoid this problem because they are

Within two years, Weston Medical believes, the devices could begin replacing some of the 13bn needles used worldwide every year for injections. The company says it could have 15 per cent of a market for disposable needles worth Sibn a year by early next century. Oxford Biosciences estimates the drug markets targeted by its system will be worth more than \$4.5bn a year. Needle-less injection of liquid

drugs was invented more than 50 years ago after men working with hydraulic machinery complained their skin was being penetrated by high pressure oil. Early versions, used to vaccinate US troops, relied on developing large pressures behind the drug which forced a hole in the skin.

In the 1960s, it was realised that a similar job could be done with far less pressure if the liquid were struck rather than pushed. The drug, like any flirid, would remain rigid on impact and drive through

the skin like a nail. Although this allowed jet injectors to be smaller and more efficient, the devices to deliver needle-free injections remained big and relatively expensive. Reusable models have been available from two US companies, Mediject of Minneapolis and Bioject of Oregon.

Venezuelan company - though sales have been modest. However. Mediject has recently sold a stake to Becton Dickinson, the US company with 40 per cent of the world disposable syringe and needle mar-

ket. The two plan to develop a cheaper reusable system. In their different ways, Weston Medical and Oxford Biosciences are attempting to reduce the manufacturing costs to the point where disposability becomes attractive. The two companies are trying to deliver drugs to the fatty tissues beneath tha skin painlessly.

Oxford Biosciences is working with pharmaceutical com-panies to deliver a powder version of insulin for diabetics, human growth hormone and local anaesthetics. Weston Medical is focusing on delivering vaccines, thrombolytics to reduce risks of blood clot-

ting - and migraine drugs. The two companies have very different origins. Weston Medical, in the depths of rural eastern England, was founded by Terry Weston, a mechanical engineer with several successful inventions to his name. On a flight from the US, he happened to sit beside a senior scientist at Akzo Nobel, the Dutch chemicals and drugs company, who was having problems vaccinating pigs.

Weston developed rechargeable version of the old jet injector designed to provide 1m shots and cost £1,000. But it was only after a local hospital asked whether he could produce a version to deliver insulin that Weston began thinking about a disposable version.

He decided that if be could get the manufacturing costs down, the potential market was big. The first models used springs to deliver the required force. But the latest version replaces the spring with a cylinder loaded with compressed air. This delivers a hammer blow to a plunger in contact with the injectable liquid, once the device is triggered by pressing it against the skin. Weston estimates that the

Intraject can be made at a cost

and a version is made by a of 12p if 20m devices are made a year. The company is beginning two months of trials to test sterility and "patient" acceptability". It will then apply to the European Devices Directorate for approval for the Intraject, a process that could .

take up to two years. The principle adopted by Oxford Biosciences is somewhat different. A group of inventors led by Brian Bellhouse, director of Oxford University's medical engineering unit, was injecting genetic material into plant cells when they recognised the application

for humans. Instead of knocking a "liquid nail" through the skin, Oxford Biosciences uses supersonic waves to help blast the powdered formulation of a drug through the skin.

Compressed helium gas is released in a chamber until enough pressure develops to rupture a membrane that encloses the powdered drug. The shock wave formed by this expansion travels down the barrel of the supersonic nozzle, carrying with it the hebum which sweeps up the drug particles and crashes them into the skin over an area the size of a small coin. The particles have the mass to penetrate the skin but the lighter helium molecules bounce back up the

The company has conducted preclinical trials in five areas and is moving towards approval in two areas - local anaesthetics and buman growth hormone. While Weston Medical is working with liquid formulations of drugs that have already received approval, Oxford Biosciences will need new approvals for the powdered formulations of the drugs it will deliver. No one has yet gained approval to inject powdered versions of

drugs, the company says. There are many potential slips before either product reaches the market, not least wbether patients are happy to use them. If they are, needlefree syringes could soon become a familiar sight in the

Payment for education based on income an 'off track' idea

From Ms Patricia Geoghegan. Sir, in supporting charging students ("University fees", February 2), you advocate the fine principle that students should contribute toward paying for their education. You go off track, however, in suggesting that a guiding rule should be "post-graduation contributions based on

Student loans are a fair way of dealing with the high cost of education and if it is found that students pursuing low-income careers such as

teaching should have some of their loans forgiven, so be lt. But any suggestion that future paybacks be proportional to income, rather than on a commercial basis of principal and interest, should be avoided in the best interests of universities' long-term ability to raise money from

While in the infancy stage in Europe, volontary contributions by alumni to universities are the lifeblood of university support in the US. My experience as a volunteer

fundraiser for my law school has convinced me that the best way to discourage prosperous alumni from giving is to adopt a policy of collecting old student loans in proportion to income. A programme along those lines was tried 20 years ago and abandoned. Many of the students who chose it while it was in effect (and are still burdened by it) bitterly resent having to pay back far more than they borrowed. In many cases they do not feel any desire to make volontary contributions on a level

comparable to other alumni in their same income bracket. Universities that lend money to belp students achieve their education and prosperity engender gratitude and future support; universities that become unwanted partners in students later prosperity incur resentment and reduce to pool of future givers.

Patricia Geoghegan, Worldwide Plaza. 38th Floor, 825 Eighth Avenne New York, N.Y. 10019, US

Flawed convergence criteria behind problem of Emu timetable unadjusted) budget deficit than the original discretionary

From Mr Brian Reading.
Sir, Mr Douglas Hurd, in his call for a delay in the Emu start date ("Hold fire on monetary union", January 31), claims that the timetable for monetary union falls at an awkward stage in the economic cycle. But this is no accident of timing, it is the consequence of Maastricht's flawed convergence criteria. Discretionary cuts in public spending and hikes in taxation

reduce structural budget deficits. But fiscal stringency causes growth to slow and unemployment to rise. increasing cyclical budget deficits.

The final result, on the crucial assumption of no change in monetary policy or conditions, is a much smaller fall in the overall (cyclically

example, measures which cut the structural budget deficit by the equivalent of 1 per cent of gross domestic product, would probably reduce GDP growth by 1.5 per cent causing the cyclical budget deficit to deteriorate by around 0.8 per cent of GDP. The overall deficit (which is the measure used in the Maastricht fiscal criteria) would be reduced by only 0.2 per cent. So to cut 1 per cent off the overall deficit, the French government would have to raise taxes or cut pnblic spending by an impossible 5 per cent of GDP which would knock an

tightening. In France, for

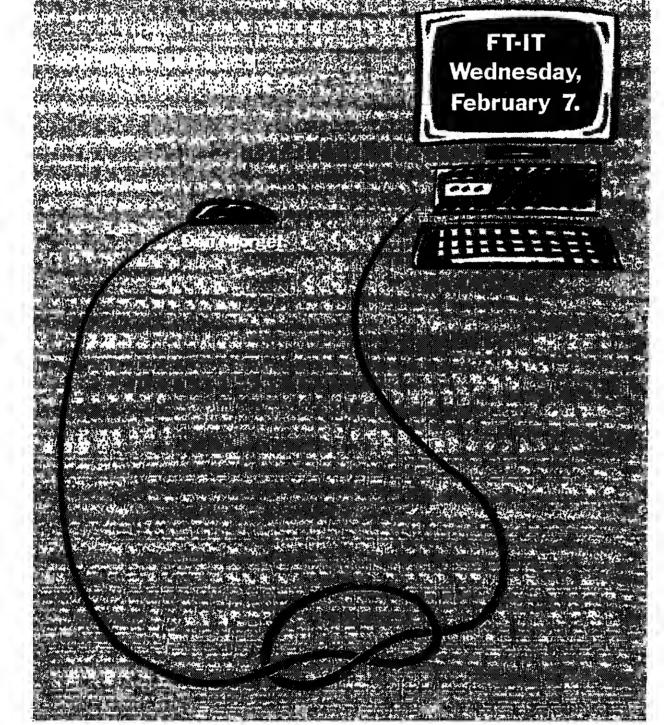

growth This is not bow things

normally work. Fiscal stringency is accompanied by monetary ease which prevents GDP growth from falling so that the cyclical budget deficit does not rise. Unfortunately, Maastricht criteria guarantee that the system cannot work normally. France needs (allowing for the cyclical deterioration likely from slow growth in 1996) to cut its overall budget deficit by 2.5 per cent of GDP between 1995 and 1997 to meet the Maastricht target. Germany needs a smaller cut, only I per

Since German monetary policy will only ease by enough to offset the deflationary consequences of its 1 per cent intolerable 7.5 per cent off GDP cut, French monetary policy cannot be eased by enough to offset its larger 2.5 per cent cut without blowing the franc out of the ERM. Yet without such easing France cannot possibly make the extra 1.5 per cent of GDP cut.

European governments cannot at any time meet both budgetary criteria and exchange rate stability criteria without wrecking their economies. This is the lesson which should have been learnt from Britain's disastrous ERM membership. The criteria must be revised, only this time by economists and to include growth and employment objectives, without which there will be no Emu.

Deregulation but more rules

They call it deregulation. The biggest upheaval in US telecommunications legislation for 62 years, finally agreed on Thursday, is widely predicted to lead to a feeding frenzy of deals as almost evary corner of the telecoms industry is opened to competition. Yet the 216-page act puts a huge new burden on the Federal Communications Commission, the telecoms regulator. Many wonder whether that burden, together with the powerful market position of incumbents, will mean that competition is slow to grow, and that customers and new entrants will remain frustrated for years.

the same and a second

Although the US has spawned some of the world's most innovative communications technology and services, its regulation has languished. The 1934 Communications Act and the 1982 consent decree which broke up AT&T left local telephone monopolies intact, and maintained an oligopoly in the long-distance market, dominated by AT&T. After a decade of fruitless debate, two factors have provoked change. The ways of providing telephone services have multiplied, while the market's growth has reassured companies that they could gain more than they lost from liberalisation.

Under the new rules, the barrier between local and long-distance markets will fall, giving the local market its first real competition. Cable will also face new entrants. and federal price caps will be lifted, Ironically, while commercial rules will be loosened, regulation of obscene content is being

So far, so simple But the act leaves the FCC with tricky decisions. First, it must set ont detailed rules by which new entrants in any markets can connect to the incumbents' networks. Although interconnection terms are perhaps the most controver-sial issue in telecoms regulation worldwide, the rules must be ready within six months.

Second, the FCC has the role of deciding whether local companies have adequately opened their networks to competitors, they must meet this test before entering long distance markets. The act is also unhelpfully vague in telling the FCC to give "substantial weight" to the Department of Justice's views on this point.

Among other headaches, the FCC must also soon set up a new nationwide universal service fund paid for by interstate companies, which will pay for telephone services where commercially unviable. However, the act does not say how much companies must pay in, nor which companies may receive money, or even which services must be available.

Given these unresolved issues, customers may well be disap-pointed by the initial effects of the new framework. Prices may well rise until competition arrives, particularly in cable, and competition may be slow to come. Local telephone companies are likely to find it harder to enter the long-distance market, given the process of gaining FCC approval, than it is for new rivals to enter the local market. Even in local telephony, analysts warn that vigorous competition may be three to five years

Meanwhile, from the perspective of oew entrants, returns on the tens of billions of dollars invested will remain low until market power is established. Despite the act's prolonged gestation, it will take years of fine-tuning before its

Kiev's choice

may have to consider how it would view a rapprochement between Russia and Ukraine. The prospect of an improvement in the often tense relations between the two Slavic states was highlighted last week hy the visit to Kiev of Mr Yevgeny Primakov, the new Russian foreign minister. He proposed that Moscow and Klev resolve rapidly some long outstanding husiness: the division of the Black Sea fleet and the signaturf of a broad co-operation deal. He came to Kiev with a mixture of carrots and sticks; calls for a compromise over the fleet, combined with a scolding for Ukrainian politicians who voted against Russia's entry to the Council of Europe. Ukraine's President Leonid Kuchma had earlier secured an agreement in principle that a summit meeting with Mr Boris Yeltsin, postponed at least five times, would take place in April.

Such signs of normalising relations should undoubtedly be welcomed by the outside world. But Russia's motives are not entirely clear. An alarming number of Russian politicians, from all points of the political spectrum, regard Ukrainian independence as a temporary inconvenience. Mr Malcolm Rifkind, the British foreign secretary, rightly described Ukrainian independence last week as vital to the peace and stability of Europe.

Sooner rather than later, the west While stressing the importance of western ties with Moscow, he warned that a Russian state reincorporating Ukraine would automatically become an empire again. Whatever transpires between Moscow and Kiev over the coming months, the prospect of any real threat to Ukrainian sovereignty in the foreseeable future looks remote. Mr Primakov stressed that Russia recognises Ukraine's independence, and the toughness of Mr Kuchma in defending Ukrainian interests has impressed most westerners. But Russian-Ukrai-

> tive, and still need watching. Mr Kuchma's interest in co-operation with as wide a range of partners as possible is not in doubt. It may, therefore, be the western response that determines Ukraine's orientation.

> nian relations are acutely sensi-

The terms on which the International Monetary Fund assists Ukraine should not be significantly harsber than those imposed on Russia. The security links offered by Nato to Kiev should be as extensive as the defence co-operation which it has offered to Russia. More important, the European Union should consider reducing the tariffs that obstruct the export westwards of Ukraine's metals, textiles and farm goods. If not, such barriers may yet force Kiev to look east again for its best

Bad debts

Paying debts late is bad enough, Boasting about it compounds the offence. Mr Michael Heseltine has done neither himself nor the gov-ernithit any good by admitting that, as a young businessman, he waited until the last moment before paying his bills. As an astute politician, he should have known better than to make flippant remarks about a practice which many small business people, so often the victims of late payments, find so irritating. To make matters worse. Mr

Heseltine's comments about "stringing along the creditors" Control of the contro have come at a time when the government is consulting on whether to change the law - and introduce penalties in the form of statutory interest payments to creditors. The Forum of Private Business, a lobby group, has seized the opportunity to redouble demands for such penalties.

Despite Mr Heseltine's faux pas, the government should stick by its current opposition lo statutory interest. But it should also do much more to promote prompt payments in other ways.

The main argument against statutory interest regimes is that they do not work. As a survey of EU countries published yesterday by the Association of British Factors and Discounters shows, companies in Italy and Spain - two countries with statutory interest laws - are among the slowest payers. The survey finds cultural influences matter, with debtors in northern Europe paying faster than their southern counterparts. Moreover, just as, under present UK rules, hig companies exploit their commercial muscle to delay payments to small businesses, so they could in future avoid penal-

ties because contract terms would continue to be set by negotiation. So big companies could demand longer payment times in contracts. Small husinesses would find it as difficult to object as they do today to overdue payments. However, the government could

do more to encourage prompt settlements. Last month it introduced legislation requiring companies to set out payment policies in annual reports. It would be much better if companies were also obliged to publish figures showing how fast they actually paid bills. Lobby groups could put pressure

on tardy debtors. The government could also put its own house in order. While officials have recently improved their payments record, more could be done. If the defence ministry pays over 99 per cent of bills on time, why does the office of the national lottery manage only 50 per cent? A government which makes a priority of promoting efficiency should not - to borrow a phrase - be stringing along the creditors.

China's uncomfortable embrace

Beijing hopes its aggressive tactics will dissuade Taiwan from seeking greater international recognition, says Tony Walker

hina's imminent mili-tary exercises in the Taiwan Strutt may be a crude attempt to influence voting in next month's Taiwanese presidential elections. But behind the sound and fury lies real menace.

In less than a year the Taiwan issue has moved to the forefront of threats to regional stability, and is now the most dangerous issue facing east Asia as the century draws

Mr David Shambaugh, a defence specialist at the School of African and Oriental Studies in London and editor of China Quarterly, believes a shift in Beijing's Taiwan policy is a shift in Beijing's Taiwan policy is under way, driven by the military and the older generation of leaders who fear that prospects for the reunification of China and Taiwan are slipping away.

"In their minds, reunification should not be an interminable pro-cess, hence their resort to coercive diplomacy," he says. "But the problem with this policy is that it is inevitably escalating. They are pushing themselves into a corner and might find it difficult to de-

With the increasing frailty of Mr Deng Xiaoping, China's patriarchal leader, an uneasy power transition is making China's responses less predictable on Taiwan, the one question that has been central to the country's foreign policy con-cerns since the founding of the People's Republic in 1949.

Chinese resolve on the issue should not be under-estimated, according to diplomats in Beijing and local foreign policy analysts. Taiwan is the biggest problem for the region into the 21st century more than the Korean peninsula," says one. "For that reason it has to be handled especially carefully." China's immediate aim in this lat-

est phase is to influence the outcome of Taiwan's March 23 presidential election, in which Mr Lee Teng-hui, the current president, is aiming for a stzeable majority to bolster his drive for greater international recognition.

But Beijing also has a wider intention - to serve warning on the international community of the seriousness with which it views Taiwan's independence moves. Judging hy nervous reaction in Washington, it is getting its mes-

A senior State Department official was quoted in the Washington Post at the weekend as saying the US planned to warn China that "beightened tensions could lead to miscalculation and accident". The US is also expressing concern about the size of the planned military exer-cises, which would be the fifth and largest of those launched in the

Taiwan Strait since last June. Beiling, which has no qualms about interfering in Taiwan's internal affairs - China regards the island as a renegade province - is bent on reducing Mr Lee's vote, and maximising that of candidates sympathetic to reunification. Its scare tactics may be having an impact, judging by opinion polls which indicate that between 30 per cent and 40 per cent of voters are undecided.

Beijing would clearly like to see Mr Lee end up with less than 50 per cent approval. This would mark something of a reverse for him, because it would indicate that many Taiwanese have reservations about his attempts to carve out an independent foreign policy in defiance of the mainland.

In Beijing, Mr Zhao Tuosheng, director of the Foundation for International and Strategic Studies, a government-supported think-tank,

week, in which he blamed Taiwan's leaders for deteriorating relations, was aimed directly at the Taiwan-

ese electorate, "Mr Li wanted to make the mainland's views clearly understood, not just to the Talwan anthorities, but also to the Taiwan electorate, before the latter's presidential election in March - to make sure no important points are missed," says Mr Zhao. Beijing could not be accused of leaving room for misunderstanding. When the US granted President Lee of Talwan a visa last June to attend

alma mater, China withdrew its ambassador to Washington, froze most official contact with the US and embarked on its series of military exercises in the Taiwan Strait. In its present mood, Beijing is proving ruthless in its manipulation of rumour and speculation. When the New York Times reported last month that China had completed a blueprint for a "limited attack" on

Taiwan after the presidential elections, Beijing responded ambiguously, allowing worries among Taiwanese to linger and driving down the Taiwan stock market.

of China's attitudes dates from Mr Lee's visit to the US, Chinese con-cerns over Taiwan's independence moves had been festering since 1993, when the Taiwanese unveiled a new formula to describe relations with Beijing. Mr Lee hegan talking about "two political entities" within one nation to justify Taiwan's claim for a separate seat at the United Nations, using as a model separate recognition of North and Sonth

At the same time, the Clinton administration incensed Beijing by sanctioning broader official links and approving a change of name for

Undaunted by bear's growl

t is easy to forget that the Tai-wanese have lived with Chinese threats for decades; and that relations across the Taiwan Strait have improved dramatically since the late 1980s in spite of the rise in tension since last year. So while investors bave occasionally scurried away, the Taiwanese are not yet reaching for their tin helmets.

This is not to suggest that Beijing's repeated threats to use force should the island formally declare independence are being taken

According to a survey published last week by the China Times newspaper, 44 per cent of respondents are worried that China might attack, while 47 per cent are not. And 45 per cent are confident that Taiwan can defend itself, against 33 per cent who have doubts. Two thirds believe the US would help Taiwan in a military crisis, but 16 per cent think otherwise The ostensible reason for Bei-

jing's heightened bellicosity is that China's leadership wants to dissuade Taiwanese voters from putting Mr Lee Teng-hui back into office in the island's first presidential elections on March 23. But it is not clear if China's actions will have any effect other than giving the Taiwanese the jitters.

The China Times survey suggested that Beijing's aggression cuts both ways. The survey found that since last summer's missile tests, support for independence among Taiwanese fell from 15 per cent to 10 per cent. However, sup-port for unification with China also fell, from 20 per cent to 15 per cent. The number of respondents who preferred to maintain the status quo rose from 50 per cent to 57 per cent. The remainder

declined to reveal an opinion. Political analysts in Tainei believe that China's behaviour may have as much to do with Chinese domestic politics as with anything happening in Taiwan. In common with analysts in Beijing and abroad, they believe that the risks of a Chinese attack on Taiwan will increase in any power struggle after the death of Mr Deng Xiao-ping, the ailing Chinese leader.

But not all the signals are gloomy. Taiwanese officials think that despite its rhetoric Beiling is preparing to talk to Mr Lee, who is expected to win the election.

Once the election and a cabinet reshnffle in late May are completed, the two sides are expected to resume the arm's-length political

Laura Tyson own

Taiwan's office in Washington from the Co-ordination Council for North American Affairs to the Taipei Economic and Cultural Representative

Adding to China's annoyance was the fact that its president, Mr Jiang Zemin, had last year set out a new and conciliatory eight-point programme aimed at drawing Taiwan into closer consultations, and even proposing informal contacts with

Taiwanese leaders.

Mr Lee's June visit to the US was seen as a stinging personal rebuff to Mr Jiang. This becama a "face" issue, or matter of honour, within the Chinese leadership, contributing substantially to Beijing's overheated reaction. Hardliners supported by the military assumed control of Taiwan policy, arguing that the conciliatory Foreign Ministry line pursued by Mr Jiang risked further humiliation.

As a western military analyst in Beijing says: "The military is having a very significant effect on the Taiwan issue. The whole leadership was chastened by the Lee Teng-hui

ndeed, Mr Jiang is said to have read from briefing notes prepared largely by the military in his meeting with York last November in which he outlined an uncompromising position on Taiwan. Against this background there is little likelihood of any softening of Beijing's position, especially during a leadership tran-sition with contenders jockeying for position. No aspiring Chinese leader can afford to be regarded as soft on

The question for the new generation is how to advance the cause of reunification, and how much pressure to apply to the Taiwanese to persuade them to agree to substan-tive talks in place of the desultory and informal negotiations that were suspended in protest at the Lee visit to the US.

The Chinese-language press in Hong Kong has reported that Bei-jing is working on a timetable for reunification. But beyond remarks recently by Mr Jiang that the return of Hong Kong next year would mark the "first step" towards the recovery of Taiwan, no such timetable has materialised.

If Beijing did choose to publish a hlueprint, it would not only add dramatically to tensions, it would also mark a shift in the Chinese policy outlined by Mr Deng himself. Mr Deng had always counselled patience, but a timetable would con-

firm a different approach. Such a development would certainly draw closer attention to Chi na's military options. Taiwan probably has the capacity to repel an invasion of its main island unless Betjing is prepared to pay a terrible price. But it is vulnerable to missile attack - its missile defences are weak - and would be in danger of being strangled by a naval blockade or the mining of its sea lanes.

Ninety-five per cent of Taiwan's imports and exports travel by sea, and it is completely dependent on imported crude oil of which it has a small strategic reserve. These calculations would weigh heavily if the mainland chose to increase pressures after the presidential election. At the least, the die seems to be cast. China is most unlikely to reverse itself, and pressures on Mr Lee are likely to increase. The last thing the region needs is a further escalation in tensions across the Taiwan Strait, but the danger is that Beijing's Taiwan policy may have developed a momentum of its

BSERVER

AT&T invents the ring

So now we know. AT&Ta equipment business, shortly to be spun off in the biggest public offering Wall Street has ever seen. is to be called Lucent Technologies

Eh? Well, AT&T's market research apparently showed that people think Lucent - a posh word for shining - suggests "clarity of thought, purpose and vision". Its logo will be a band-drawn circle in red, which will be called - even more bafflingly - "the innovation

AT&T, it will be remembered, is the outfit which acquired NCR, the old National Cash Register, and changed its venerable and historically apt title into the horrible Global Information Solutions. Four years on, AT&T is handing the loss-making business back to its shareholders, having re-named it - yes - NCR.

Perhaps one should not be too negative. New names, after all, take a while to get used to. When ICI spun off its drugs business and called it Zeneca, everyone laughed. Now it trips off the tongue. Well, sort of.

Unfair cop?

However many headlines its endemic violence may grab elsewhere, Rio de Janeiro is

managing to retain its own innate capacity for self-deception. When the non-governmental organisation Human Rights Watch/ Americas recently released a

report alleging that Rio police killed 191 civilians in the first nine months of last year, state security secretary General Nilton Cerquira was quick to pounce. "If I were to become a rich vagabond, I'd set up an NGO," he opined. Less than 24 hours later, state

industry secretary Ronaldo Cezar Coelho complained that pop singe Michael Jackson wanted to film his latest video about poverty in one of the city's shanty towns. Coelho even suggested Jackson not be granted a visa if the video's content was deemed offensive.

Meanwhile, allegations abound concerning the Rio police's increasingly inventive tactics, including the supposed kidnapping of the girlfriend of a kidnapper. Just until the kidnapper released his victim, of course.

The police deny the charges. But the case has at least provided rich pickings for Rio cartoonists as the line between police and bandit becomes progressively liner.

A for effort

Who needs the Americans at credit rating agencies Standard & Poor's or Moody's? Gazprom, the part-privatised Russian natural gas giant, was recently asked by the Swedish business weekly

Affärsvärlden whether the company was credit-rated and if so, by whom. Yes, said Gazprom cheerfully, "our board has rated

All at sea

Far be it from Observer to question the whys and wherefores of corporate sponsorship. Rugby fans should simply make a note that National Westminster Bank seems to be the bank that likes to say "ves" at the moment.

Not only has it helped the Rugby Football Union raise £35m in loans for the redevelopment of its Twickenham stadium. But it has just signed over £1m in a seven year deal with the RFU for an executive box. Expensive viewing area, yup. But then, with 50 seats, the NatWest salon is larger than either the president's box or the royal facility.

NatWest at least has a long association with rugby, going back to the earliest days of corporate

Unlike BUPA International, which is splashing out in an entirely new direction. It is backing The Sussex Challenge, a group of unknown amateurs taking a tilt in 1997/98 at yachting's most professional (which means

expensive) race, the Whitbread. Why a company, which wants to raise the profile of its international business, should choose a regional team to back, is a mystery. As is

the supposed synergy between the UK's largest healthcare company and the umbrella sponsors, brewers Whitbread, the overenthusiastic consumption of whose products is a mite incompatible with a BUPA-approved lifestyle.

Judge for yourself Looks like the republican spirit

of egalité still applies in some aspects of French life. It is no longer just top business executives who are being ensnared in corruption allegations by the country's judges.

In a distinctly unfraternal development, three judges, and an associate, risk losing their liberty after going on trial in Nanterre near Paris for "misappropriation" of funds. It is alleged that, while officers of the commercial court in Bobigny, they allowed the transfer of assets of a defunct company to a company owned by one of their

Bosnia poised for early World Bank membership

By Robert Chote, Economics Editor, in Davos

Bosnia-Hercegovina could become a member of the World Bank within months before paying its share of former Yugoslavia's debt, which has been an obstacle to its membership and to access to fresh loans.

Officials hope the remaining obstacles to Bosnia's membership can be cleared - in principle at least - by the time international donors meet again in early April to discuss the next stage of a proposed \$5bn European Union and World Bank led economic reconstruction plan for the wartorn country.

Bosnia is responsible for \$650m of former Yugoslavia's debt to the World Bank, of which \$455m is overdue, and arrears will top \$500m late next month or in early

Senior financial officials now believe it may be possible to admit Bosnia into the World Bank without it first repaying the arrears. They argue Bosnia is, in effect, a new country which cannot be held immediately

Senior officials see way through obstacle of outstanding debts

debts on the schedule on which they were originally contracted. They point as a precedent to the way Bangladesh became a member of the bank following the break-up of Pakistan in the

A meeting of international donors last year agreed Bosnia would need at least \$5.1bn of international assistance over three years to start reconstruction - with the World Bank as an important contributor, both by providing money directly and through encouraging other donor

Some \$500m was pledged by about 30 donors as an emergency package before Christmas. The World Bank bas already come up with \$150m of this, provided none of its member governments formally object in the next few days. The bank is allowed to provide this money without Bosnia's arrears being cleared because it

its share of former Yugoslavia's of a formal loan or credit. But it would be impossible to provide the larger amounts Bosnia needs over the next few years via this informal route.

The \$500m of initial financial support is to be spent on a number of emergency projects, including critical imports (such as seeds, drugs and construction machinery), payment of government salaries and a social fund to help groups such as the elderly and orphans.

Other emergency projects include belp for agriculture, power, transport infrastructure and water and gas supply. Donor countries have until the end of this week to say how much of the money they bave committed will be given to particular projects. So far only the World Bank, the EU and the Netherlands have come up with their promised shares of the initial \$500m.

Russian privatisation

Europe crisis over fisheries

By Alison Maitland and

The European Union and the UK government have failed to take the fisheries crisis seriously, risking the devastation of whole fishing areas and communities that depend on them, a politician from Britain's ruling Conserva-tive party warned last night.

Lord Selborne, chairman of the science and technology commit-tee in parliament's nnn-elected House of Lords, said: "It's tragic what we've done. We've reduced a resource which is nf vital importance, particularly to the developing world who rely much more on protein from fish than

"We're depleting their fish stocks, we're depleting our nwn stocks, for a failure of political will. We haven't taken the problem seriously and we're going to

to junior ministers to deal with. He added that fisheries was

He attacked as "stupid" the EU's system of quotas to stop overfishing. "Quotas are fixed for species and you can catcb the wrong type of fish, throw them overboard, go on fishing the wrong fish until you catch your quota of the right fish ... The fisherles industry themselves recognise that this is a demonstrably mad scheme."

Mr Tony Baldry, UK fisheries minister, satd last night that

Lord Selborne appeared to be making a lot of criticisms without providing many soln-"While quotas may not be per-

fect, they are the best system available," he said. "We tried days-at-sea limits and that was bitterly opposed by the fishing industry. We're trying decommissioning, with a £50m (\$77m) programme over five years."

Mr David Scott, president of the National Federatinn nf Fishermen's Organisations, said: "I don't believe we've got depleted fishing stocks around the UK. If we bad, then we would have an awful lot of people going ont of business in the fishing industry, and we're not."

responsible for the repayment of Austrian parties agree on

Austria's two main political parties vesterday reached agreement on a package to reduce the budget deficit by Scb100bn (\$9.5bn) over the oext two years. paving the way for formation of a

new coalition government.

The deal follows seven weeks of baggling between the Social Democrats and the People's party since an electioo in December provoked by their failure to agree on budget details.

In the deal the parties bave agreed on in spending cuts of Sch66.7bn for 1996 and 1997. mostly through public sector pay restraint and reductions in social programmes, and Sch33bn in higher tax revenues. No changes in the basic income tax rates or in value added tax are planned.

The proposal is designed to cut the deficit from 5 per cent of gross national product in 1995 to 2.7 per cent in 1997 - below the 3

tricht treaty for participation in Mr Franz Vranitzky from the Social Democrats called the package a "respectable result". It

with his previous partners. As the country's budget woes worsened after the election, both parties were forced to accept many measures they bad

The Social Democrats agreed to toughen requirements for early retirement, to cut paid maternity leave for working mothers from two years to 18 months and

unemployed and people in need of permanent care - all measures they had opposed in the past. They also conceded that receipts from privatisations and other one-off measures would not be included when calculating

budget savings. in exchange, the People's party accepted tax increases it had previously rejected. The tax on bank and bond interest will rise from 22 per cent to 25 per cent, and people with higher incomes will

lose a number of tax rellefs. This should allow the Social Democrats to claim that they bave fulfilled their campaign promise and made the austerity package "socially balanced".

Observers still expect protests from trade unions and other Interest groups before parliament passes a budget for 1996. A similar programme unravelled a year ago under pressure from union, industrial and agricultural inter-

accused of ignoring

George Parker in London

Lord Selborne, whose commit-tee will publish the results of a wide-ranging inquiry into international fishing policy on Thursday, complained to a BBC television programme that the EU's common fisheries policy was left

not the sort of issue that Mr John Major, the UK prime mintster, would take to a meeting of the Group of Seven industrialised nations.

Lord Selborne warned that failure to take action could mean a repeat in the UK of the Newfoundland crisis, when a collapse of cod stocks led to 20,000 job losses in the fishing industry.

"We're going to bave whole fisheries closed down. Whole communities are likely to lose their job." be said.

into Grundig to plug any losses. Sncb firm action combined with a decision to cut 3,000 jobs - roughly a quarter of Grundig's workforce - is some comfort to Philips shareholders. Nevertheless, the cash drain is probably not over. For a start, it is unclear whether the job cuts will be sufficient to return Grundig to profit in 1997 without a rebound in demand for tele-vision sets. The DM270m in restructuring costs will be sufficient to cut annual operating costs by roughly the same amount; that is still less than Grundig's operating losses of DM330m last year. If the losses continue, Philips may yet be prevailed on to inject more funds. All yesterday's decision

automatic. But even if Philips did pull the rug from Grundig in a year's time, that would not end the matter. The Dutch group would still be committed to pay the Grundig family a special dividend of DM50m a year because of commitments Philips made when it acquired a stake in the company. And the family would still have the right to sell its remaining shares to Philips for DM540m in 2004, even if Grundig were then bankrupt, If that looks like bizarre financing, it only underlines bow liberally Philips' previous management frittered away shareholders'

Fokker

Is Fokker, which Daimler-Benz Aerospace abandoned only two weeks ago, suddenly beset by suitors? Yesterday's sharp rise in the company's share price, following the news that British Aerospace, France's Aerospatiale and Canada's Bombardier had joined South Korea's Samsung on the list of those holding exploratory discussions, might suggest so. However, the bankrupt Dutch aircraft maker's bopes of being saved in its present

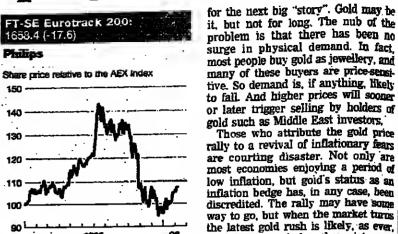

Rivals such as BAe and Aerospatiale clearly want to keep tabs on what is happening at Fokker - but mainly to ensure that no new Fokkers are ever built. With their own regional aircraft businesses losing money because of cut-throat competition, the last thing they want is take on yet more highcost production. Samsung, which has

erable to hanging the albatross around

The technical indicators beloved by

chartists point to a further rally in the

gold price, which reached a six-year

high last week. But this is the only

good reason for buying gold. The price has risen sharply this year because

hedge funds have shifted vast sums -

by gold market standards - into the

metal. But they have done so through

the futures market rather than by

buying the physical commodity. In

January, contracts traded on New

York's Comex represented two years'

supply from the world's gold mines.

Such leveraged investments, which

drive up prices dramatically, can be unwound rapidly. It is precisely by

making short-term bets that these

funds make high returns. Low US

bond yields have sent them scurrying.

their own necks.

many of these buyers are price-sensitive. So demand is, if anything, likely to fall. And higher prices will sooner or later trigger selling by holders of gold such as Middle East investors. Those who attribute the gold price

rally to a revival of inflationary fears are courting disaster. Not only are most economies enjoying a period of low inflation, but gold's status as an inflation bedge has, in any case, been discredited. The rally may have some way to go, but when the market turns the latest gold rush is likely, as ever, to claim more victims than victors.

Hanson

A special dividend to sweeten the pill of Hanson's demerger would be a meaningless bribe. Investors have only one worry about the demerger the gap between Hanson's value and the sum of the value of its parts. From this point of view, a small bonus to tax-exempt investors, especially if it exacerbates Hanson's Advance Corporation Tax problem, is at best a red herring. Although the company could certainly afford to add to its debts. doing so would if anything add the investors' biggest concerns - over the ratings on which the demerged businesses' shares will trade. Moreover, Hanson's initial thinking

on sharing out its debts looks dis-tinctly lop-sided. It is far from obvious why the highly cyclical chemicals business - rather than the cash-gener ative tobacco and energy businesses should take half the £3bn total Of course, of all Hanson's businesses, chemicals is likely to have the lowest rating and the highest tax charge. So it makes some sense to maximise profits elsewhere. On the other hand, it would be surprising if even US inves-tors were relaxed about debts of this order in a business of this volatility. Both the energy and tobacco businesses, by contrast, could probably take more debt with less damage to their ratings. The energy business in particular, with a debt-free market capitalisation of around £4bn, is expected to end up with debts of only £375m. Even taking its ambitious expansion plans into account, this looks remarkably low.

Section 2 FT WEATHER GUIDE **Europe today** High pressure over Poland will keep eastern

and central Europe mainly dry with maximum lemperatures from minus 5C to minus 10C. A frontal system from Iceland across the British Isles to the western Mediterranean will cause cloud and precipitation. Ireland, England, western France and the Iberian peninsula will have periods of rain or snow. It will be unsettled around the Mediterranean. A front over the southern Balkan states, Greece and the Black Sea will cause rain in Greece and Turkey and snow on higher ground. The Benelux and Germany will remain dry and sunny but gusty south-easterly winds will make it much colder

than in the past few days. Five-day forecast

High pressure over eastern Europe and Russia will keep much of the continent dry and cold with widespread frost. Most of western Europe will be wintry. Depressions over the Atlantic will influence the British Isles, south-western France and Portugal with rain and milder air. The depressions will move towards the Mediterranean where conditions will remain

Virgin in talks over Belgian airline stake

By Emma Tucker in Brussels

Virgin, the UK leisure and travel group. is in talks with European Belgian Air-lines, the low-cost airline, about taking a majority stake as part of its strategy to expand into continental Europe. City Hotels, the Belgian hotels group

which owns 51 per cent of EBA, last night issued a statement saying it had signed a "memorandum of understanding" with a "well-funded European group with experience in the airline business".

City Hotels said the deal involved the sale of 80 per cent of its majority stake in EBA at a cost of BFr2bn (\$65m). It

UK leisure and travel group poised to establish continental European operation by taking control of EBA for \$65m

hoped to wrap up the deal by April 30. Mr Victor Hasson, chief executive of City Hotels, said the sale would be made in agreement with NEL the Luxembourg holding company which owns the remaining 48 per cent of EBA. NEI would also sell 80 per cent of its stake, giving Virgin 80 per cent of EBA. City Hotels and NEI would each retain 10 per

Last night, Virgin declined to com-ment although officials confirmed that

for the past year Virgin had been consid-ering setting up a low-cost, quality operation in continental Europe, either on its

own or via a new partner.

In particular, it needs to overcome the problem of slot shortages at London's Heathrow and Gatwick airports. Brussels' newly expanded 2aventem airport offers extra capacity with aspirations to become one of Europe's hubs.

EBA is Belgium's second-largest air-

tion of Europe's aviation market to specialise in charter flights - its most profitable activity - and an "EBA Express" service of bargain flights to destinations such as Rome and Madrid. Any acquisition would not be linked to Virgin Atlantic Airways, or the Virgin Travel Group, but would operate as a stand-alone busi-ness, according to officials close to the deal.

City Hotels said the entry of the new

Brent current month & per berret

shareholder "would enlarge the growth potential of EBA's scheduled flights, while the charter activities would con-

News of the talks between Virgin and EBA comes at a sensitive time for the UK group. This week it will find out whether London and Continental Railways, of which Virgin is a shareholder, has won the right to operate the Eurostar rail link between Brussels and London, as well as the right to build the high-speed rail link between the tunnel and London's Waterloo station.

Trade in City Hotels' shares was suspended yesterday. BA results, Page 22

GM opens Talks with the UN on limited sales of Iraqi oil have deepened over-production fears doors on Internet

showroom By Louise Kehoe

In San Francisco

General Motors yesterday aunched one of the largest and most sophisticated marketing sites on the Internet - a cyberspace showroom where prospective buyers will be able to chose a combination of features to create the car they want to order and take a virtual reality drive in GM cars and trucks.

The opening of the GM site is a landmark event in Internet marketing that is expected to prompt similar efforts by other large manufacturers of consumer goods. CM is betting that the Internet, a global web of compnter networks with an estlmated 37m users, will become a primary method of communications hetween car buyers and

The GM site on the World Wide Web, the multimedia segment of the Internet, would eventually encompass more than 16,000 pages, with more than 98,000 links to information from GM and other sites, the auto-

Created by Electronic Data Systems, GM's computer technol. ogy subsidiary, and CKS Interactive, an Internet content company, the GM site makes use of the latest Internet software. It offers users an opportunity to sit in the driving seat of its cars and tracks to get a 380-degree interior view and to rotate the vehicle for a 360-degree exterior "The idea is to create a 'buzz'

so that luternet users will tell each other 'you've got to check out the GM site'," said Mr Phil Guarascio, a GM vice-president and general manager of NAO marketing and advertising.

GM site (http://www.gm.com/)
included a guide to the products
of GM's various divisions, photographs and virtual reality fea-

Several more features are under development. Chevrolet is huilding a "payment calculator" that will enable prospective car buyers to discover bow much the monthly payments will be on a car loan.

Buick is testing a "Build Your Own Car" application that allows users to select from numerous options to create a car to fit their needs. Other parts of GM will provide information about the location of dealers.

Tha group's Saturn Internet site soon will allow shoppers to browse electropically the usedcar inventory at local dealerships. Ultimately, the GM site would enable computer users to select a vehicle simply by answering a series of questions about their finances and lifestyle, the company said.

GM has no plans to sell cars electronically, sithough the development of secure payment systems for the Internet is soon expected to make this techni-Mercedes embarrassed by parent,

he possibility that Iraqi oil could return to the world

market this year has

added another volatile element to

oil prices. The talks which open in New York today between Iraq and the United Nations over limited oil sales for humanitarian purposes come amid warnings of deterior-ating market fundamentals. The problem is over-production by the Organisation of Petroleum Exporting Countries at a time of rising output by non-Opec pro-

Some forecasters say prices could soon come under pressure even without the re-entry of Iraql oil. Traders fear that the appear ence of an extra. 750,000-850,000 barrels a day (b/d) from Iraq could tilt a finely balanced market and trigger sharp price falls. But a successful ontcome to

the New York talks is far from guaranteed. Previous negotiations on an oil-for-food deal broke down in 1992 and 1993 over provisions for the distribution of aid by UN agencies to the rebellious Kurdish enclaves in northern Iraq. There is scepticism among dip-

lomats and western oil executives that the negotiations will result in an agreement. But in recent days many sceptics have come to accept that Iraq

is not merely testing the diplo-matic waters with its latest ini-

Baghdad fuels doubts on prices in uncertain market

the dialogue with the UN.

tlative. One senior diplomat in Baghdad expected at least two rounds of negotiations. The first in New York to settle the technical details of how to implement Resolution 986, which authorises limited sales, and the second in Baghdad in which a political decision over whether or not to proceed will be taken.

Despite the technical and political difficulties posed by the resolution, expectations in Baghdad are high that oil sales will soon proceed. After 51/2 years of increasing economic pressure under strict and wide-ranging UN sanctions, many tracis have been quick to see light at the end of the tunnel since the surprise aunouncement that talks on oil sales would be revived.

Egged on by the local press, the consensus in Baghdad is not only that Iraq will successfully negotiate a deal with the UN to export oil but that this will be the beginning of the end of sanctions. An official statement on the talks from an economic committee chaired by President Saddam Hussein over the weekend said it expected positive results from

One newspaper, owned by the president's eldest son Uday, has congratulated the Iraqi leader for "compensating your people with ample joy by dismantling the chains of the embargo". The Arab League yesterday

added its voice to those calling for a compromise that would enable Iraqi oil to begin to flow.

diplomat in Baghdad commented: "Our impression is that the Iraqis are very serious about reaching an agreement. But the optimism here far outweighs any real assessment of how successful they're likely to be."

If an agreement is reached analysts expect oil prices to fall by about \$2 a barrel. But prices could come under further pressure if it appears that Opec is unable or unwilling to accommodate an Iraqi re-entry.

"The chaotic state of the market could last from several days to a few weeks, depending largely on how Opec reacts," says the Patroleum Finance Company, Washington-based consultants.

But Iraq is not the only unsettling issue facing the oil markets. The uncertainty surrounding Baghdad's intentions comes at a time when the markets are still adjusting to the volatility intro-duced by a structural change in the way some oil companies manage their inventories.

Last year, a number of US refiners adopted "just-in-time" techniques to cut costs. But they have proved particularly volatile. Having reduced stocks to a minimum, some US refiners found additional supplies at the beginning of the year as a cold snap in the north-east caused demand for

ucts to soar. A recent report from London brokers Societe Générale Strauss Turnbull noted that such techniques "... clearly shift all the short-term price risks on to the upside, in the event of abnormal

fuel oil and other refined prod-

The speed with which prices rose last month surprised many traders. Within a few weeks the benchmark Brent Blend moved from just over \$17 a barrel to the

\$20 a barrel barrier as record trading volumes were set on London's International Petroleum Exchange. But prices sank almost as quickly once the refin-ers secured sufficient supplies and the speculation about Iraq

surfaced The uncertainty over price trends has been exacerbated by news that Opec output remains well above its production ceiling of 24.52m b/d. Industry newsletters report that Opec production last mouth was more than 1m b/d above the ceiling, with Venezuela more than 400,000 b/d over its quota. Given there are no signs of a slowdown in production by key non-Opec countries, such as the UK and Norway, some forecasters see sharp price falls in the second half of the year.

Even so, most analysts average prices to remain within the \$14-\$20 range for Brent Blend that has characterised the market for the past few years. Only Iraq could break the range analysts say. But that depends on President Saddam.

As one diplomat said: "It will take a hell of a lot for the Iraqis to swallow 986. If they agree, then the regime has finally accepted that its system is verging on collapse."

Robert Corzine and **James Whittington**

Finance watchdog plans to broaden HK trading

The Securities and Futures Commission (SFC), Hong Kong's financial watchdog, has launched a plan to tackle growing competi-tion from other centres and worries overseas about China's resumption of sovereignty.

The SFC aims to broaden the range of financial instruments, including those denominated in yuan, the Chinese currency; to develop a liquid debt market; to promote trading-only listings for international and regional issues; to win back trading that has migrated overseas; and to broadan the retail and institutional investor bases.

The watchdog says the most important messages to put across to potential international inves-tors relate to China's resumption of sovereignty of Hong Kong from July next year.
"To properly perform our role
as a facilitator of market develop-

ment, we would need to ensure

that the post-1997 guarantees regarding Hong Kong's status as a Special Administrative Region (SAR) of China are properly understood," says the SFC.

The three-year plan seeks to address the absence in Hong Kong of a deep and liquid debt market and of a depositary receipts market. Additional investment vehicles and products being considered incinde the development of a secondary market and ynan futures, index futures and other soft commodity

In areas where Hong Kong maintains an edge - chiefly, mainland China issues - escalating competition has prompted the SFC to examine ways of stay-

It also aims to reverse the trend of falling domestic activity: in 1991-92, the latest year for which figures are available, about 12 per cent of trading of the highest turnover stocks in Hong Kong was conducted in Londou and New York.

Grace stays open to dialysis offers

By Tony Jackson in New York

Wall Street reacted coolly to the proposed deal between W. R. Grace and Fresenius of Germany, whereby the two companies will merge their kidney dialvsis businesses and spin the new company off to shareholders. Yesterday, Grace's shares rose only

3% to \$69% by lunchtime. This was despite indications from Grace that it would entertain further offers for its dialysis arm, National Medical Care. Baxter International, the healthcare group, made a rival \$3.8bn bid for

Bexter said its offer was still from a US government investigaopen. It believed its offer was

superior to the Fresenius deal.
"Ours can be concluded quickly, and it's for 100 per cent of the company. We will wait and see what [Grace's] shareholders

think of it," it said.
The deal with Fresenius offers Grace shareholders 45 per cent of the new company. In addition, NMC is to borrow \$2.3bn before the deal and give it to Grace, which will use it to buy back up to 20 per cent of its own equity. Grace said the spin-off would be tax-free to Grace's shareholders, in contrast with the Baxter offer. Fresenius has also agreed to bear all costs which might result

tion into NMC for alleged over-

pricing. Baxter has capped its liahility at \$100m. Under the deal, the chief execu-

tive of the merged company would be Mr Gerd Krick, head of Fresenius. Grace's fourth-quarter results

yesterday showed a 17 per cent drop in pre-tax profits to \$107m for the business excluding NMC. There was also an 8 per cent pretax fall at NMC. Both figures were struck before exceptional charges of \$556m after tax, which produced a net loss of \$474m for the quarter and \$326m for the year. Excluding special charges, earnings for the year rose 11 per cent to \$3.33 per share.

You'll have efficient modern premises in a region which attracts high quality, well trained labour and you may benefit from government capital grants and locally available incentives.

This new hub for European business has three flagship developments offering unprecedented opportunities plus the civic determination to help new businesses prosper. The details are available from Ken Welsh on DOVER 01304 821199.

INTERNATIONAL COMPANIES AND FINANCE

EUROPEAN NEWS DIGEST

Södra knocks \$150 off the price of pulp

Sodra, Europe's largest producer of market pulp, yesterday announced it was cutting the price of pulp from \$875 a tonne to \$725. The Swedish forestry group said the cut was due to rising inventories and price pressure. In particular, it blamed North American producers selling cheaply in south-east Asia. "That's a hell of a drop," commented Mr John Mikulski, of Mikulski Hall Associates, paper industry consultants. "It will send a few shudders through the industry.

Södra, a pioneer of totally chlorine-free pulp, sells at the top end of the market and is regarded as being in a stronger position than some other suppliers. "It's a measure of how bad the situation is that they've had to cut," said Mr Mikulski.

A highly cyclical and volatile commodity, pulp climbed from a trough of \$390 a tonne in late 1993 to last year's record \$1,000 a tonne before falling in response to slower than expected economic growth and a build-up of stocks among pulp and paper customers. Although the official price is \$875 a tonne, it is being widely traded at \$800-\$850 and as low as \$700 in east Asia, industry experts say.

French SE transactions slip

The total number of transactions on the French stock market during 1995 fell 9 per cent to 20.8m, still its second highest ever, according to figures published yesterday. The figures came at a time of disappointing performance on the bourse, with the key CAC-40 index falling 0.5 per cent over the year, the SBF 120 by 0.3 per cent and the SBF 250 by 1.4 per cent. The newly-launched MidCar index of middle-sized companies

Overall, the volume of transactions fell by 6.1 per ceot to FFr1,053bn (\$206.11bn), while the daily average of sales and purchases stood at FFr4.17bn last year. Total market capitalisation was FF72.446hn at the end of the year. Volumes in French shares on the main market fell by 2.5 per cent to FFr993bn, and foreign shares on the main market by 15 per cent to FFr17bn. Transactions of French shares on the second market dropped 22.2 per cent to FFr28bn. Andrew Jack, Paris

Sharp advance for Autoliv

Autoliv, the Swedish maker of car safety equipment, yesterday posted a sharp rise in 1995 pre-tax profits which matched market expectations. The group recorded pre-tax profits of SKr1 01bn (\$145m), a 48 per cent increase on the previous

Sales were boosted by higher market peoetration by the company's key growth product, airbags, sales of which increased 18 per cent to SKr4.9bn out of the consolidated turnover of SKr10.2hn, Seat belt sales also showed firm growth of 11 per cent to SKr5.3bn, despite an increase of only 4 per cent in production from European car manufacturers.

The company proposed to lift dividends to SKr4-50 from

SKr3 in 1994. A one-to-one share split was also proposed donbling the number of shares to 55m.

Shake-up at Michelin

Michelin, the world's largest tyre manufacturer, yesterday announced a wide-ranging reorganisation including the appointment of a new executive council. The nine-strong council will support the three managing partners who control the business. The aim is to focus the group on its leading products and markets, based around four geographical

regions, nine strategic husiness units and 11 group services. The members of the oew executive council are existing

Pharmacia & Upjohn to base operations in UK

Pharmacia & Upjohn, the newly created US-Swedish pharmaceuticals company, will build its world headquarters in Windsor, west of London, it said vesterday.

The company, formed in November 1995, also unveiled a new corporate image, inspired hy paintings sprayed on to cave walls hy Stone Age man. The logo is a purple stone with outlines of a hand, a bird and star seemingly sprayed on. Mr John Zabriskie, chief

executive, said details of planned job cuts forced by the merger would be published over the next few weeks. Some details are likely to be released with the company's 1995 results on February 22.

He confirmed the workforce of the combined company would fall from 34,000 to 30,000. saving ahout \$500m a year. Specific cuts are being decided country by-country.

said there would be cuts at offices that were once the headquarters of the parent businesses - in Stockholm, Sweden; Kalamazoo, Michigan; and Milan, Italy. He said the net reduction in numbers employed by headquarters offices would be "more than 20

per cent" The three cities would remain regional headquarters. Stockholm would run the company's metabolic drugs operations, Milan the cancer drugs, and Kalamazoo other areas including infectious disease and female health.

It aims to halve the number of manufacturing sites to 30. . Overlaps in manufacturing mean there is unlikely to be a large increase in employment in the UK. The headquarters site will initially employ about

Mr Zahriskie, 56, will he based in the UK, as will most senior executives except Mr

Mr Jan Ekberg, chairman. Ekberg, 59, who will remain in aid there would be cuts at Sweden for family reasons.

Mr Zabriskie said he would be looking at acquisitions. The two companies have cash resources because they merged through a share swap, thus avoiding the heavy borrowings common after successful hostile bids.

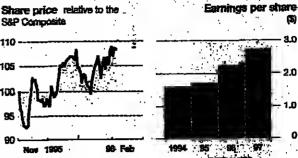

He said the company had now entered the world's top 10 hy sales - 1994 turnover of the companies combined was 86.7bn - but wanted eventually to be in the top five.

The UK-based top management will also be considering a listing on the London Stock Exchange. The company has stock exchange listings in New York and Stockholm Some details also emerged

on the origins of the merger. The trigger was a telephone call from Mr Ekberg to Mr Zabriskie on February 15 1995 to suggest an alliance between the two companies. Pharmacia had conducted a review of its COMPANY PROFILE: Pharmacia & Uplohn

Market capitalisation Main listind New York 22.2 Historic P/E 2.8% 1994: 1.62 Earnings per share \$41.4 Current share price

renews

By John Simkins

Analysts in London and Milan said yesterday it was unclear if the Banca del Gottardo investment was potentially predatory, or whether it indicated an attempt to strengthen the De Benedetti hold on Cofide or simplify the group's holding structure. The De Benedetti family holds 40 per cent of Cofide, which in turn has 43.7 per cent of Cir. the main industrial holding

Speaking in Davos at the weekend, Mr De Benedetti said the Banca del Gottardo purchase was an "act of confidence" in Cofide. He said it could not be seen otherwise, as his family and the shareholder syndicate - which also includes Generali, the insurance group, Mediohanca, Pirelli and Mr Carlo Carracciolo, chairman of the L'Espresso publishing group together control more than 50

per cent of Cofide. Asked if he feared a takeover of Olivetti, of which Cir has 15.12 per cent, Mr De Benedetti said it would be just "part of the game". He said: "I hy far prefer to be subject to a takeover than be in hands of nationalised banks,"

A takeover of Olivetti, which expects a pre-tax loss of L500hn (\$316.5m) for 1995, potentially became easier last month with the dissolution of its syndicate of core shareholders, which controls 20 per cent. Mr De Benedetti sald that the wider share base fol-lowing last December's rights issue, which saw foreign investors take 70 per cent, meant there was little logic in maintaining the syndicate.

Most analysts said they thought it unlikely that Colide itself would be the subject of a(, hostile takeover and that predators would be more likely to aim for Cir or the companies it holds stakes in. The lower down the group you went into the assets the less risk there would be of finding a can of worms in the bit you didn't want," said one London ana-

Recovery gathers pace at Metallgesellschaft

By Andrew Fisher in Frankfurt

Metallgesellschaft, the German industrial and trading company which nearly collapsed two years ago, continued its rapid recovery in the year to September 30 1995, with a pre-tax profit of DM171m (\$115m) compared with a loss of DM2.54hn in 1993-94.

Mr Kajo Neukirchen, chairman, said the target for the current year was around DM300m before tax, The company was sticking to this goal, despite the weakening German economy. Both last year's result - on turnover of DM17.6hn against DM20.5bn last time and the forecast for 1995-96 are in line with previous statements by Mr Neu-

kirchen, who said yesterday "the turnround has succeeded". The shares rose 1 per cent to close at DM36.10.

Without a DM3.4bn rescue package from its banks early in 1994, Metallgesellschaft would have gone bankrupt as a result of heavy losses on US oil futures and swaps contracts. Under Mr Neukirchen, brought in after the scale of the losses hecame known in December 1993, the company has sold assets, cut costs and undergone extensive restructuring. Banks have since injected a further DM618m.

Mr Neukirchen said all activities mainly chemicals, plant engineering and contracting, trading and financial services - were in the black, Pre-tax

profits in the first quarter of 1995-96 were DM22.4m against DM14.3m a year ago, Income from long-term projects, especially in engineering, would be received later in the year.

"Metallgesellschaft has become a completely normal company more quickly than expected after being a problem case discussed around the world," he said. However, it was still too early to think about resuming dividends. This year's targets would first have to be achieved and then "a sensihle profit level" attained in 1996-97.

He said accumulated losses, carried forward from the time of the oil trading debacle and available to reduce tax liahilities. totalled DM3.5hn. Mr Neu-

profits totalled DM118bn against DM2.63bn. Group indebtedness at the end of September was down to DM1.5bn, half the level of the previous year. It also compares with DM7.5bn at the end of December 1993. Mr Neukirchen said capital spending

kirchen declined to say how quickly these would be used up in 1994-95, net-

should total around DM400m this year, Metallgesellschaft was expanding Its foreign activities in engineering and speciality chemicals to he closer to fastgrowing markets in Asia, South America and eastern Europe, where costs were also lower. Acquisitions would play an increasing role in the recovery. Inmet set for restructuring, Page 20

Fokker lines up 'about' five potential suitors

airliner technology to new Asian competitors.

Nelther group, however, is likely to be prepared to take on Fokker's massive debts, mannfacturing facilities or even the cost of maintaining its existing fleet in service.

"Everyone is talking to them to find out what is in there," said one aerospace executive vesterday, "but I cannot see anyone buying the whole mill-Aero Regional International,

the regional aircraft joint venture between Aerospatiale of France, British Aerospace and Alenia of Italy, which is Fokker's main European competitor, has asked Fokker for information about the company's intentions. Its interest is likely to he

restricted to curbing technology transfer and maintaining an orderly secondhand market in regional aircraft.

ers are worried that the com-plete collapse of Fokker would cause the price of aircraft to plummet on the secondhand market, damaging the re-sale value of their airliners.

Bomhardier, whose Short Brothers subsidiary in Northern Ireland makes wings for the Fokker 70 and Fokker 100 jets, also said for the first time vesterday that it would meet the Dutch company's management for talks. The Canadian company has been the most

widely tipped in the Netherlands to acquire all or parts of Bombardier is developing a 70-seater Regional Jet at customer request, but has hitherto regarded the 100-seat regional

jet market as too crowded internationally. News of the possible European and Canadian interest in Fokker came yesterday when Mr Ben van Schaik, Fokker

tors to find a huyer, told reporters at a Singapore aviation exhibition that the company had attracted "around" five potential suitors. Until oow, Samsung of Korea is the only company to have

openly expressed an interest in considering a deal with Fok-ker. However, Samsung offi-cials have tried to temper expectations that the company is preparing a bid. Fokker sald it would hold talks with all interested parties

but added that it was unlikely to be able to narrow the field to one candidate this week. Potential huyers have not

yet been sent details of Fokker's business, which would disclose how much of the liahilities remain with the Dutch company and how much have heen horne by Daimler-Benz Aerospace, the German majority shareholder which withdrew financial support for Fok-

chairman, who has only a month's protection from credi-Other regional aircraft mak-Mercedes embarrassed by parent

Daimler shake-up should help carmaker, writes Wolfgang Münchau

r Helmut Werner, COMPANY PROFILE: chairman of Mercedes-Benz, had trouble suppressing a smirk during a recent news conference when he talked about Daimler-Benz the German industrial group which he repeatedly referred to as "our shareholder". Whenever the name Daimler-Benz is mentioned these days, Mercedes executives seem to fall into expressions of contempt and pity, similar to the way some Mercedes drivers look down on other traffic.

Mercedes-Benz makes up about three-quarters of the turnover of Daimler-Benz, and is one of Europe's most profitable carmakers. Daimler Benz, hy contrast, will this year announce a loss of some DM6bn (\$4bn), give or take a few hundred million, the worst ordinary loss in German corporate history.

Given that most Germans do not know the difference between Mercedes-Benz and its parent, Daimler-Benz's difficul ties present a problem for the carmaker - although Mr Werner insists that sales are holding up well. With the appointment of Mr

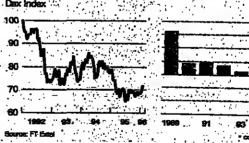

Jürgen Schrempp as chairman last May. Daimlar Benz is finally returning to its automotive roots, after several years of diversification. Within the last few months Daimler has broken up AEG, its lossmaking industrial group, initiated more job cuts at Daimler-Benz Aerospace (Dasa), and pulled out of Fokker, the Dutch regional aircraft maker. The abandonment of the

"integrated technology concern" - an expression coined by Mr Edzard Reuter, the former chairman, and disowned shortly after his departure - as Daimler's guiding strategy now raises the question among

Daimler-Benz Market capitalisation \$27.8bn Main listing Frankfurt Historic P/E . Gross yield

Share price relative to the

investors of where the company is headed now. Is it back towards the pre-Reuter automotive era; is there some other industrial strategy; or is it going to be a pure strategy of profit maximising?

Mr Schrempp himself defines his company as a "transporta-tion group", whose activities focus on anything that moves - cars, trucks, buses, trains and aircraft - conditional on a minimum target performance for each division.

But the company could be looked at in a different way. AEG's old rail business is now part of Adtranz, the 50:50 joint venture company betwaen Daimler and ABB, tha Swiss-Swedish engineering group. Dornier, the regional aircraft maker, may also go eventually.

may be scaled down in to a component supplier.

Net income (DM bn)

If Airbus one day becomes an ordinary commercial company, rather than an economic interest group as it is now defined, there will not be much left at Daimler-Benz axcept of course Mercedes-Benz, various blts and pieces, and some rather large investments.

r Georg Stürzer, analyst at Vereinsbank Research, says a concentration on Mercedes-Benz would be "the best imaginable outcome".

"At this moment it is not entirely clear where this company is headed. It is good that they are getting rid of lossmakers, but it all raises the MTU, the aero-engine maker, question about the strategic

line behind it all," he says. The recent surge in Daimler-Benz's share price suggests most investors have taken a henign view of the recent developments at the company, hoping its determination to pull out of lossmaking activities, combined with an internal 12 per cent return on investment target for all its business divisions, may ultimately lead

to handsome profits. Nevertheless, there remain risks which are beyond the company's control. The German economy has suffered downturn only a couple of years after the last recession ended, and the outlook is uncertain.

By contrast, the D-Mark, a curse to exporters last year, may fall back again from its dizzying heights and provide some relief.

Another damaging factor for Mercedes-Benz is the crackdown on company car taxes. one of several measures taken by the government to plug the hole in the German federal hudget. At the recent news conference at Mercedes' Stuttgart headquarters, Mr Werner expressed his concern, saying second-hand car sales were already affected by a new law which imposes a tax on 1 per cent of a company car's list price per month, thus hitting the drivers of expensive German cars more than

others. Despite those risks, and including the danger that the company may have to restructure yet further, Daimler has certainly taken some of the most important, difficult and expensive decisions that had to be taken.

The debate about its future involvement in the aerospace and defence business, however, is certain to continue

"Samba achieves record results for the seventh successive year."

Directors' Report

Payments

1995 saw Saudi American Bank's profits increase for the seventh consecutive year reflecting continued success in our strategy of emphasising a process of product and technology innovation focusing on providing superior customer service.

Financial Results

Net income for 1995 equals SR 1.072 million (1994: SR 1,014 million: 1993: SR 942 million). The Bank's ground in profits is a realisation of our goal of managing cost growth without sucrificing expansion into those murket and product niches where we believe that SAMBA possesses an inherent advantage. This resulted in amount in both our pross revenues as well as net revenue from funds during the

We continue to bold a conservative view on managing risks and this approach is mirrored in the increased charge for potential loan losses of SR 127.7 million (1994: SR 72.4 million; 1993: SR 5.1 million) which we consider prudent in line with our expansion into newer business areas and to cater for the present economic environment. However, the quality of our credit portfolio remains sound and we feel that the level of our reserves is adequate to absorb the impact of any unforeseen adverse event in this portfolio The Bank's total assets at the year end of SR 40.8 billion (1994:

SR 43 ii billion: 1993 SR 39.8 billion! bare been relatively stable over the trust three years reflecting the Bank's increased focus on fee based products. Customer deposits of SR 30.9 billion (1994: SR 31.6 billion: 1993: SR 30.1 billion) were slightly lower than in previous years while the loan portfolio stood at SR 17.4 billion (1994: SR 17.0 billion; 1993: SR 13.1 billion). The Bank's investment portfolio of SR 15.4 billion at the year and (1994: SR 17.8 billion; 1993: SR 17.3 billion) continues to reflect our bias towards investing in Saudi Government securities and high quality OECD government investment grade bonds.

Our key financial indicators remain excellent, with return on equity of 28% (1994: 29%; 1993, 32%) which is one of the bigbest In the region and earnings per share of SR 44.7 (1994: SR 42.3; 1993:

After taking into account the Bank's performance during the year and after retaining adequate funds for future expansion requirements, the Board of Directors recommend a gross dividend of SR 628 million for the year 1995. After deduction of Zakat, this will yield a net illuidend of SR 25 per share to the Saudi sharebolders.

Meeting. Dividend claims may be presented for settlement at the Bank's registered bead office or any of its branches.

fiscal year ending 31 December 1995. The forthcoming Annual

Good morning.

ofide

(And why it is one.)

It's not every day you can talk about a genuine medical breakthrough.

But maybe today, February 6th, is the exception.

This morning, two leading pharmaceutical companies – Pharmacia and Upjohn – are announcing to the world the merger of their operations.

This will mean that two pools of specialised medical talent now have the opportunity to work together for the first time ever.

Resulting in real, tangible benefits in the fight against cancer, AIDS, infectious diseases and many other medical conditions.

This merger is not simply a matter of shared resources, however. It is also about shared ideals.

Our new trademark stands as a symbol for humanity, hope and inspiration.

Values that we intend to apply to every single aspect of the way we do business.

You are surprised to hear such sentiments coming from a

global pharmaceutical company?

This is not the last time we'll be

This is not the last time we'll be surprising you.

You can be sure of that.

AMERICAS NEWS DIGEST

European activities help Goodyear rise

A jump in European earnings contributed to a 7 per cent increase in after-tax earnings at Goodyear, the US tyre maker, in the final three months of last year. The effects of higher prices and sales volumes in Europe, together with favourable exchange rates, belped offset weakness in the US market and higher raw material prices.

Goodyear's European activities generated 26 per cent of the groups' operating earnings on 22 per cent of sales in 1995, compared with 18 per ceot of earnings on 19 per cent of sales the year before. The US accounted for 55 per cent of sales last year, down from 58 per cent, and contributed 45 per cent of the group's operating profits, down from 50 per cent.

Net income totalled \$146m for the latest quarter, or 96 cents a share, on sales up 2 per cent at \$3.3bn. Full-year profits after tax rose 8 per cent to \$611m, on a 7 per cent increase in sales to \$13.2bn. Earnings per share for 1995 were \$4.02, after \$3.75 in 1994. The results were in line with indications given by the Richard Waters, New York company two weeks ago.

Hilton Hotels shares up 13%

Hilton Hotels stock rose 13 per cent yesterday, a day after the company named former Walt Disney executive Mr Stephen Bollenbach as its president and chief executive officer. The US botel chain's shares surged \$9.875 to \$83.75 on the New York Stock Exchange at midday. On Sunday, the group announced that Mr Bollenbach, formerly chief financial officer of Disney, would replace Mr Barron Hilton as chief executive. Mr Hilton will remain chairman. Mr Bollenbach was previously chief financial officer for Promus Hotel, Trump Hotels & Casino Resorts and Marriott International, and chief executive officer

Automatic Data unit upbeat

GSI, the French-based computer services group bought last year by Automatic Data Processing of the US, said yesterday it expected to report operating profits of FFr130m (\$25.4m) for 1995. The result comes after a loss of FFr30m in 1994, following substantial restructuring charges taken as part of its efforts to reduce the payroll and refocus the business

GSI, originally part of Alcatel Alsthom of France, was bought by ADP in late 1995. Mr Philippe Gluntz, corporate vice-president for ADP in Europe and one of the founders of GSI in 1971, said it needed to complete two more sales of businesses as part of its restructuring. Mr Arthur Weinbach, chairman of ADP, said his group had no plans for additional restructuring at GSI, which is absorbing ADP's previous smaller European acquisitions in the UK and the Netherlands.

GSI hopes to extend its outsourcing activities - including substantial business handling payrolls – towards smaller companies in France, and the high-growth market of

Parmalat enters Brazil market

Parmalat, the Italian dairy foods group, has launched in Brazil the first in what it bopes will become a global chain of ice-cream parlours. The company spent \$5m to start the project, which it intends to develop mostly through franchises, although proprietary outlets will lead the way in each of Parmalat's 19 national markets.

The company has targeted São Paulo's youth market by siting the first ice-cream parlour in a converted mill and warehouse complex which also cootains a bar and discotheque. Mr Gianni Grisendi, president of Parmalat do Brasil, where the idea originated, said more outlets would open after a two-month test period.

Jonathan Wheatley, São Paulo

Varity drops Hayes plan

Varity, the North American-based vehicle parts and diesel engine prodocer, has dropped last September's plan to buy in the publicly-held shares of Hayes Wheels at US\$25 a share and will maintain its existing 46 per cent interest. Hayes is the and other vehicles. Robert Gibbens, Montreal

Stone Container predicts growth

Stone Container, the US pulp and paper group, forecast another strong year in 1996, after reporting earnings of 78 cents a primary share after a 8 cents charge, up from 31 cents a year ago. Mr Roger Stone, chairman, said the long-term prospects remained "truly outstanding". For 1995, income was \$2.63 a primary share after charges, or \$4.64 a share before Reuter, Chicago

Citibank to open office in

Tel Aviv

By Avi Machlis in Jerusalem

Citibank is to open a representative office in Tel Aviv, making it the first US bank to establish a presence in Israel. The central bank said the move was a vote of confidence in Israel's economy and the stability of its macro-

economic policy.
Mr William Rhodes, Citibank vice-chairman, said he had been reviewing Israel's economy since a 1992 visit and was encouraged by recent developments such as the opening of the economy, rapid growth and the reduction of inflation to a 26-year low. Opportunities unfolding along with the peace process also attracted Citibank to Israel.

Mr Rhodes said Citibank's Israel office would participate in financing growing trade to and from Israel. He said israel's "technology base forms an interesting future not only in the Middle East but around the world for

Israeli exports". He added that Citibank's presence in numerous Middle Bastern, Asian and African countries placed the bank in a "unique position to put things together" for Israeli trade. Citibank's Tel Aviv office, to

be managed by Mr Ronny Strauss, will also seek opportunities to co-finance regional development projects. Banking activities will not be carried out by the Israel

office at this stage. Citibank is currently represented in 97 countries, including Middle East offices in Jordan and Egypt, A Citibank office in Lebanon will open in the near future.

3M meets expectations and forecasts growth

By Maggie Urry in New York

Minnesota Mining & Manufacturing (3M), the US industrial group which plans to spin off its data storage and imaging activities, reported fourth-quarter earnings in line with expectations hrought down by last month's profit

The fourth quarter bore a \$653m pre-tax restructuring charge, of which \$574m related

and video tape activity. Mr Desi DeSimone, chairman

and chief executive, predicted "solid sales and earnings growth in 1996". He said the sharp rise in raw

material costs, which affected profits in 1995, was expected to level off.

Sales volumes outside the US rose 10 per cent in 1995, and 8 per cent in the fourth quarter. Domestic volume increases

planned closure of the audio and 2 per cent in the last

Mr DeSimone said international volume growth would be "solid" in 1996, and productivity gains would continue.

Fourth-quarter earnings from continuing operations were 75 cents a share, before a 12 cents a share restructuring charge, compared with 70

Pre-tax income from these

to the spin-offs and the were 3 per cent for the year to \$318m, before the \$79m oneoff charge.

discontinued However, operations, which include the businesses being spun off or closed, only broke even, compared with earnings per share of 9 cents last time. The fourthquarter 1995 period took a charge of 87 cents a share. Net

income from these husiness

share before charges down

was down from \$322m to a loss of \$97m, after the charge. That left group earnings per from 79 cents at 75 cents, in line with the warning in mid-January.

The shares fell a per cent on the day of the warning to \$63% and were down \$% at \$65 in morning trading

For the year, earnings per share from continuing operations after the charges were up from \$2.85 to \$3.11, with discontinued operations losing 79 cents, compared with earnings of 28 cents.

Inmet set for restructuring as directors launch review

By Bernard Simon in Toronto

Inmet Mining, formerly the mining arm of Metaligesell-schaft, is poised for a shake-up after failing to meet expectations since it was spun off by the German industrial group almost two years ago.
The Toronto-based copper.

zinc and gold producer has formed a committee of independent directors to review its future direction. The committee includes two new outside

Mr Douglas Scharf, chief financial officer, said vesterday that "we're trying to establish what our longer-term strategy is going to be and what metals

we'll be in". He added that "we're looking for a significant core asset". Some existing operations could

Besides an 80 per cent stake in the Copper Range copper mining and smelting complex in Michigan, Inmet's far-flung interests consist mostly of minority investments in mines and exploration properties operated by other companies. It owns 18 per cent of the big

Ok Tedi copper mine in Papua New Guinea, and has interests in mines in Canada, Turkey and Tunisia

Immet was expected to gain a new lease on life when it was spun off by Metaligesellschaft In mid-1994 as part of the German group's restructuring in the wake of its heavy losses in US energy markets.

However, the Canadian company has languished. "It really doesn't have much identity or direction at the moment," one Toronto analyst said yesterday. He expressed reservations about the current management's ability to turn the company round. The management has remained largely unchanged since Metallgesell-

schaft withdrew. Inmet shares have recently traded well below their price at the time of the spin-off. But news of the proposed restructuring helped boost them hy 25 cents to C\$10.75 in early trad-

exchange yesterday. Copper Range has been the biggest headache, High mining costs and uncertainty over future operations led Inmet to

ing on the Toronto stock

operations last September. Copper Range's smelter was shut last February under an anti-pollution agreement with the state of Michigan.

A large writedown at Copper Range resulted in a net loss of C\$195m (US\$141.9m) in the first nine months of 1995, compared with earnings of C\$17.9m in the same period the previous

Sales grew to C\$822.9m from C\$579.3m. reflecting higher metal prices, new mines and increased output at Norddeutsche Affinerie, the German copper smelter and refinery in which Inmet has a 35 per cent stake.

Fourth-quarter earnings are due to be published later this month.

One clue to Inmet's future is the appointment to the board of Mr Paul Gagné, chief executive of Avenor, a large North American pulp and newsprint producer

Avenor has been through an extensive restructuring since being spun off by Canadian Pacific, the transport and

US Healthcare hit by increased costs

By Lisa Bransten in New York

Shares in US Healthcare, a leading US provider of managed care services, fell 10 per cent to \$43% yesterday on concerns about increases in the company's medical costs. despite announcing fourth-quarter earnings slightly ahead of expectations.

The sell-off affected two other leading healthcare groups: United Healthcare, the biggest health maintenance organisation in the US, fall \$2%, or 4 per cent, to \$61%, and Oxford Health Plans fell \$2%, or 4 per cent, to \$63%. Oxford is due to report fourth-quarter results today.

Sparking the concerns was a statement by Mr James Dickerson. US Healthcare chief financial officer, that the medical costs as a percentage of the company's premium revenues could go up as much as 250 basis points

But Mr Ed Keaney, an analyst at Volpewelty, said he believed that medical costs

would only grow by 125 basis Net income in the fourth quarter was \$101m, or 65 cents

a share, compared with \$107m, or 67 cents, in 1994. Revenues rose from \$757m to \$954m. For the full year, per share profits were flat at \$2.42. Revenue was up 21 per cent to \$3.5bn, reflecting a 22 per cent growth in enrolment. Medical costs as a percentage of premi-

ums rose to 74.5 per cent last

year from 69.3 per cent in 1994.

in April, the company said that

it expected medical costs to

increase as it huilt member-However, in the final three months of the year medical costs dipped alightly to 74.7 per

cent from 75 per cent in the third quarter. Mr Joseph Sebastianelli, US Healthcare co-president and principal medical administrative officer, said the decrease

came despite growth in enrol-ment of older patients on Medi-care – the publicly-funded healthcare programme for the elderly - who generally require more medical services than younger members. Earnings were hurt by an

increase in operating costs, attributed to a redesign of the company's communications

يد 1 جو

Fresenius in line for a hat-trick with NMC deal

Merger could create global leader in renal care, writes Judy Dempsey

Then new management took over Fresenius, the German medical technology and pharmaceuticals company, in 1992. it set Itself three goals.

It wanted to become one of the three leading renal care companies in the world - supplying kidney dialysis equipment and treatments - with the aim of capturing a global market share of 30 per cent. It also aimed to increase profits up new businesses and establish a greater international presence, mainly through buying small companies.

Two of the goals have already been achieved. Between 1990 and 1994, Fresenius' sales bad doubled, to DM2bn (\$1.3bn), with net profits totalling DM7im. Net profits for 1995 are expected to climb to DM99m, on sales of

DM2.25bn. Total investment is forecast at DM200m. Over the same period, Fresenius, which employs more than 8,900, acquired small companies in France, the Netherlands, Turkey, Spain, Italy and the US, and set np joint ventures in China and India. Almost all the acquisitions had one thing in common: kidney dialysis

The acquisitions pushed up Fresenius' overall global mar-ket share in dialysis products from 14 per ceot in 1987 to 20 per cent in 1994, in line with tbe management's strategic decisions made in 1992.

But yesterday's announcement that Fresenius is to merge with National Medical Care, a subsidiary of W.R. Grace, a leading US chemicals company, is a big step for the German company which has made dialysis production

its core activity. One analyst said the deal would make the joint company "the biggest renal company worldwide". Fresenius will take a 51.9 per

cent stake in the new company, Fresenius Medical Care, while Grace will hold 44.8 per cent. NMC will incur debts of about \$2.3bn, which it will borrow to pay directly to Grace. NMC runs 624 dialysis cen-

tres, mainly in the US, and has more than 45,000 patients. Its NMC a 25 per cent market share in the US, outstripping any competition. Furthermore, similar to Fre-

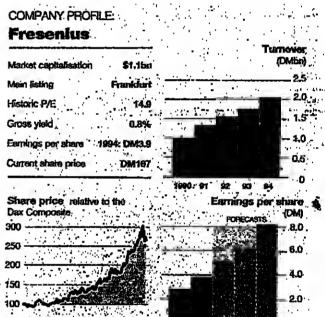

senius, dialysis treatment is NMC's core activity: in 1994, NMC's dialysis centres accounted for \$1.3bn of total turnover of \$1.9bn, while net earnings amounted to \$107m. Turnover for 1995 is expected to reach \$2.1bn.

NMC has its own filter production systems, a kidney treatment in which the patient's blood is pumped out, cleaned, and then pumped back about three times a week. The alternative method

being promoted by Fresentus and used particularly in developing countries because it is less expensive - is a treatment whereby the patient can pump liquid into the system to clean it and pump it

The NMC and Fresenius merger will allow the new company to tap the growing dialy-sis market in the industrial world, where demand for dialysis treatment is rising hy between 7 per cent and 8 per cent a year.

Analysts also see demand in Russia and China increasing, although these countries will face financing difficulties.

This onnouncement oppears as o matter of record only.

Who generally

Daiwa was expelled from the US last November after the discovery of fraud at the bank's New York offices. Sumitomo took over the bulk of its assets last week just before the US-imposed deadline for Daiwa to shut its doors. But for a fee of \$65m, what had Sumitomo acquired, and what had persuaded it to do the deal?

The history of Japanese banks in the US in the last decade has been a sorry tale of over-ambitious expectations and crashing disappointments. so Sumitomo was understandably anxious to put the best possible gloss on the acquisition. "This move strengthens and deepens our already very sound and profitable American operations," the bank said.

But the cynical view in Tokyo was that the deal was no more than the first move in the two banks' probable merger this year. "There was nothing intrinsically attractive about the Daiwa US operations for Sumitomo," says one finan-cial analyst. "The decision was merely a necessary prelude, orchestrated by the Japanese anthorities, to a merger between the two banks."

On the face of it, this appears highly plausible Sumitomo is a much larger and stronger bank in the US than Daiwa, with total assets of more than \$30bn, against Daiwa's \$4.60n.

And the circumstances of the acquisition suggest Sumitomo may have been a less than enthusiastic suitor. Daiwa's dismissal from the US dealt its global reputation a potentially

For the Japanese authorities, the best hope of salvaging the bank lay in a merger with a more powerful neighbour, and Sumitomo appeared to fit the bill. Within bours of the announcement of Daiwa's expulsion last November, gov-ernment officials were talking strong relationship between the two banks.

Sumitomo is anxious to correct the view that its hand was forced. It says the move is part of its strategy of expanding in the US. "This was nothing to do with any talk of a merger," says an official. "It was a mar-ket judgment based on a clear view of our own plans for the

If that is correct, it marks an important change for Sumitomo, one of the country's most aggressive banks, and may indicate an intention to revisit Japanese banks' unhappy experiences of a decade ago. In the 1980s, backed by swelling assets at home, and in pursuit of Japanese corporations which were moving abroad, the country's banks headed for the US with a brio born of confidence at their new found status as the world's largest lenders.

They carved out a big stake in US financial markets. By 1990, they accounted for more than 12 per cent of all loans in the US. Their glittering headquarters in New York marked them out as leading players in the world's largest market. Their ambitions were also

spurred by a spate of acquisitions. Some went for a niche in the broader lending market -Fuji bought the branch net-work of Heller, DKB acquired CIT, and Daiwa bought Lloyds Bank's branches. Others attempted to storm the citadel of US banking itself. Sumitomo's was one of the most spectacular - for a \$500m loan it acquired an equity-participation share in the profits of Goldman Sachs, the investment bank.

But in a remarkably short time, most of these efforts had soured. A rash of problem loans forced the banks to retrench, and the Japanese proved inept at developing more profitable business. Sumitomo's involvement in Sachs was Goldman short-lived.

With the demise of their more long ambitions, the big Japanese lenders were forced beck into high-volume but

acquired with the trust bank. More important is the branch network, with outlets in cities as far apart as Miami and Minneapolis, bought by Daiwa from Lloyds Bank in 1989. The acquisition, Sumitomo says, will enable it to break into the more profitable business of servicing smaller and medium-sized companies. Sumitomo still has a large sub-

sidiary in California, but lacks a nationwide network. Yet there is no firm evidence that Sumitomo can succeed where others have failed. It undoubtedly has a more com-mercially oriented and aggressive culture, but it is not clear

Income at Samancor increases by 105%

By Mark Ashurst in Johannesburg

Samancor, the South African ferro-alloys producer, reported a 105 per cent rise in attributable income, before an exceptional item, from R149.6m a year earlier to R305.9m (\$83.8m) for the six months ended December 31, but cautioned it was unlikely to improve on this performance in the second half.

The Gencor-owned group doubled the interim dividend to 60 cents a share. Earnings per share rose 155 per cent to 201 cents from 79 cents.

Analysts welcomed the results. "Demand is flat but good. Volumes dictate profitability and this is as good as it's going to get," said one. Mr Mike Salamon, Saman-

cor's executive chairman, said the improvement reflected bigher chrome volumes (which comprised 60 per cent of out-put compared with 44 per cent in the corresponding period of 1994), rising prices and a slightly weaker exchange rate. The dollar traded at an average R3.70, compared with R3.63 in the previous year.

Turnover increased 50 per cent to R1.9m. Income from associates rose 61 per cent to R31.1m as contributions from EMSA increased to R13m from R6m. Stainless steel manufacturer Columbus contributed R10m, up from R2m last year, but the final stages of its expansion absorbed R214m of Samancor funding during the period, bringing the group's total contribution to date to R914m before tax allowances.

In November, the group entered into a joint venture the most cautious terms. "We between its Manganese Metal will bave to see bow the Company and the Tosoh Corporation of Japan to market hope we will be able to expand MMC's metal products through Tosoh. The Japanese producer had closed its production facilpossible," the bank says. That may be soberly realisity in Japan and transferred its manganese-aluminium britic. but it is hardly a ringing quetting plant to Nelspruit in South Africa.

The group bad disposed of its 4 per cent holding in Ugine of France to its controlling shareholder, Usinor Sacilor, for \$70m in cash. This was Daiwa Bank in the US. Sumi-tomo's big intentions for Daiwa listed as an exceptional item.

ASIA-PACIFIC NEWS DIGEST

Ansett plans to add 10 aircraft to fleet

Ansett, the Australian airline owned jointly by Mr Rupert Murdoch's News Corporation and TNT, the Australian transport group, yesterday announced plans to add 10 aircraft to its fleet in order to expand both domestic and international capacity, a move it says will require a capital injection from its shareholders this year. Ansett said that it was looking to add two Boeing 767s, one

737, and one 767-300, as well as six new Airbus A320s. Longer-term, Mr Ken Cowley, executive director at Ansett, said that the airline's strategy envisaged it having a fleet of 12 wide-bodied Boeing 767s, compared with the current seven.

The upgrade is aimed at addressing the need to offer

increased peak-hour capacity on the main east coast business routes, and should also allow Ansett retire some of the noisier aircraft ahead of national deadlines. The Boeing 767-300 will be sed on international routes.

Mr Cowley did not specify the size of the capital injection but said it would be substantial. He did not elaborate on bow the capital cootribution might be split between Ansett's hareholders given that TNT is currently seeking to sell its stake, in two stages, to Air New Zealand. That move ran into problems last month with New Zealand's Commerce Commission, the country's competition watchdog, but Air NZ has said it is confident the aituation can be resolved. Nikki Tait, Sydney

Standard Chartered in Laos move Standard Chartered Bank yesterday said it had received

permission from the authorities in Laos to open a representative office in Vientiane, becoming the first non-Thai oreign bank to open in the country.

Standard Chartered said opening the office was part of its "Greater Mekong" strategy, which has seen offices open in Vietnam, Cambodia and Burna in the past five years. The representative office would focus initially on trade finance and inward investment. Foreign investment in Laos has increased since the country adopted economic reforms similar to those undertaken in Vietnam in the late 1980s.

Six banks from Thailand operate in Vientiane, mostly serving rapidly growing trade between the two neighbouring countries.

Jeremy Grant, Ho Chi Minh City

Seven Network warns on profit

Shares in Seven Network, the Australian television network beaded by Mr Kerry Stokes, the Perth-based businessman, fell 14 cents to A\$3.96 yesterday, after it warned of a profits downturn in the second half-year.

The company, in which Mr Rupert Murdoch's News group holds a near-15 per cent interest, reported a jump in profits after tax from A\$78.1m to A\$91.9m (US\$69.4m) in the six months to end-December. Earning per share were 29.7 cents, compared with 25.4 ceots in the same period a year earlier, and revenues rose from A\$334.6m to A\$359.6m.

Mr Stokes said the results "underlined the significant progress achieved in the rebuilding of Seven's credibility with major advertisers and advertising agencies following last year's mishandling of Seven's advertising rate negotiations". He said that the main focus in the current year would be on developing more news and current affairs programming.

But Mr Gary Rice, managing director, warned that second nalf profits were likely to be down on those achieved in the

"The first half, July to December, is traditionally much stronger in this business than the second half . . . I emphasise the second half I expect to be a very good strong half, but considerably down on the first half".

Nikkt

Sumitomo Corp opens in Singapore

By William Dawkins

Japanese trading companies investment drive into east Asia took a step forward yesterday when Sumitomo Corporation announced it would open venture capital units in Singapore and Taiwan.

Sumitomo is the fourth Japanese trader to set up a financial unit in Singapore in the past eight months, part of a trend among Japanese traders to increase investment and consultancy in Asia's emerging

The group's wholly-owned Singaporean subsidiary, Sumi-corp Capital Asia, will specialise in taking stakes in fast growing computer-related com-panies. Sumicorp and Sumitomo will at the same time take a 17 per cent stake in a new Taiwanese investment unit, Tonkong Capital, the rest of which is owned by three Taiwanese local manufacturing

Substantial authority for Asian investments is to be transferred from Sumitomo's

their traditional export/import head office in Tokyo to the new units in Taiwan and Sing-apore, said a group official. Several Japanese trading

houses have chosen Singapore for their new Asian investment businesses, attracted by its lack of capital gains tax. Mitsubishi Corporation, the largest trading company, opened a Singaporean venture capital unit last July: Mitsui followed in December, and Marubeni opened there last month. The Marubeni unit exists at

EXCEPTIONAL PROVISIONS IN 1995 RETURN TO PROFIT IN 1996 DIVIDEND MAINTAINED

In the second half of 1995, the continuing deterioration of the economic climate and the property market has led the Group to reassess the criteria used for valuing its assets with a view to writing its investments down as close to market value as possible. In addition, the accounting principles consistently used by Bouygues require the Group to book provisions immediately to cover the cost of setting up and expanding its

The Board of Olrectors therefore decided at its meeting of 30 January 1996 to approve the proposal made by Martin Bouygues to charge exceptional provisions of approximately FF 4.4 billion in the 1995 accounts.

These provisions are of two different types:

asset write-downs of FF 3.2 billion, reflecting the deterioration in the property market on various investments, both in property development and in property-related assets. In addition, the worsening economic climate has required the Group to write down the value of a number of financial and

provisions of FF 1.2 billion to cover costs relating to the Group's expansion into the highly-promising telecommunica-

With this cautious approach, Bouygues is adapting to current economic realities and strengthening its profitability in the

1995 operating profits, excluding the property sector and exceptional provisions, will be approximately FF 400 million. The consolidated net loss, including the property division and exceptional provisions, will be around FF 4 billion. Despite the tougher conditions in Bouygues' main markets, 1995 total turnover was as predicted.

Total group turnover is estimated at FF 81.3 billion, up 2 % on 1994 figures. The 1995 figure, excluding external growth resulting from Colas acquisitions, is stabla compared to 1994. Diversification businesses, in particular TF1 and Saur,

TOTAL TURNOVER: 1995 ESTIMATES - 1996 FORECASTS

(FF billion)	1994	1995 (estimate)	1996 (forecast)
Construction	55.8	56.0	55.8
Property	4.2	4.4	4.1
Diversification	19.7	20.9	22.3
Total group turnover	79.7	81.3	82.0
of which international		24.3	25.0
Consolidated turnover	72.4	73.3	73.3

Return to profit in 1996 The Group is starting 1996 in confident mood and expects to return to profits in line with those recorded until 1994. The order backlog at 31 December 1995 points to a slight increase in the group total turnover (up 1 %). On the International front, the Group has achieved some outstanding

The provisions to be booked in 1995 and the restructuring of the property division will enable this sector to return to profit as from 1996. Bouygues Immobiller will be recapitalized so as to maintain its financial independence.

Launch of Bouygues Telecom in 1996: a promising new sector

The Bouygues Telecom mobile phone network will be launched during the first half of 1996. The Bouygues group, with the new DCS 1800 technology, is entering a French market which is lagging behind other countries and thus offers excellent propects. Thanks to the provisions booked in 1995, the expenses linked to the davelopment of this

usiness segment over the next three years will not reduce the Group's profitability.

A healthy financial structure

Despite exceptional provisions, the financial structure remains sound. At the end of 1995, shareholders' equity is estimated at FF 8 billion, of which FF 5.1 billion is attributable to the Group. Provisions for liabilities and charges are likely to be FF 7.8 billion. Available cash resources are FF 6.2 billion, Le an amount equivalent to the financial liabilities.

A refocused strategy

The Group's strategy is clearly defined: in addition to its core business, construction, Bouygues pursues its growth in three major sectors: private management of public utilities, communication and telecommunications. Since these development platforms have been defined, nonstrategic assets worth FF 3 billion will be sold in the course of the next 18 months. The disposal of GMP's land and property, which has already been agreed, will account for half of this disinvestment program.

Judicial inquiries

The Board of Directors has been kept informed of the judicial inquiries. The group abstains from making any comment on these proceedings as long as they are investigated.

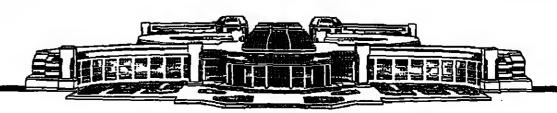

Bouygues' executive management has reiterated strict instructions and stepped up the necessary measures so that the group can carry on its activities in full compilance with the laws and regulations in force.

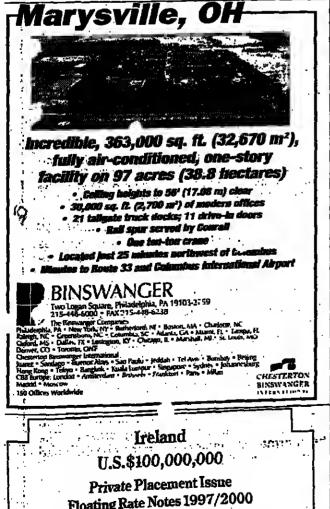

DIVIDEND AND NEW DIRECTORS APPOINTED

The Bouygues' Board of Directors, which has every faith in the future of the Group, its businesses and its people, will propose at the next Annual General Meeting of 25 June 1996 that the 1995 dividend be maintained at the same level as that of 1994, i.e. a dividend of FF 25.50 per share together with a tax credit of FF 8.50.

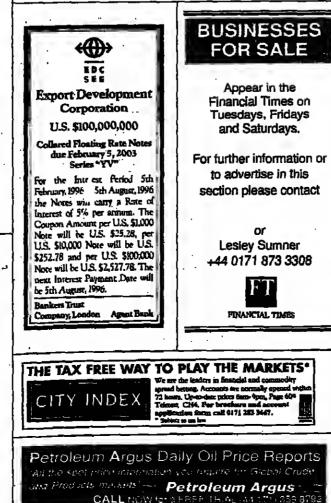

Michel Rouger and Georges Chodron de Courcei have been coopted as directors.

Mr Rouger is Chairman of the "Consortium de réalisation", Mr Chodron da Courcel la Deputy Managing Director of Banque Nationale de Paris and Chairman of Banexi executive

(£148m) in the three months to discounted fares to fill seats." December 31.

The shares were also affected by the January traffic figures, which showed a drop in passenger occupancy, and the preliminary "open skies" aviation deal struck between Germany and the US on Friday.

quarter yield, or revenues divided by distance travelled, to rise I per cent,

chief financial officer: "As the industry has been recovering, so airlines have had to sell fewer highly

Group operating expenditure was 9.2 per cent higher at £1.74bn (£1.6bn) and unit costs increased 5.9 per cent. which was above the company's forecasts. The increase reflected higher employee costs, increased customer service staff and greater marketing expenditure.

The January drop in the occupancy rate to 66.3 per cent (68.1 per cent) was partly the result of bad weather in the US, according to Mr Stevens, who added that passenger numbers

Profits at the pre-tax level benefited

(£55m) and a £12m loss last year on the sale of fixed assets. Earnings per share increased 42 per cent to 9.1p (6.4p).

A falling market reacted a little too harshly to BA's figures. The yield increase, despite strong growth from lower-yielding long-haul traffic, sur-prised analysts. And even the higher costs prompted a mixed reaction.

count of nearer 25 per cent, which

from a lower interest charge of £50m saw it as a one-off investment in new staff, in expectation of rising demand. Yet BA needs to make £36m in the fourth quarter to meet the lower end of analysts full-year profit forecasts of £570-595m. This could be hard work, given that it made only £23m in the fourth quarter last year. The volatile earnings of airlines mean that they usually trade at a discount to the market, and BA is now at a 10-15 per cent discount for the year to April, which seems about right. However,

LEX COMMENT Greenalls

The transformation of Greenalis in the 1990s has been spectacular. Six years ago, Greenalls was a dull FT-SE-A Al-Share index regional brewing company. 120 overshadowed by the government's campaign to stamp out monopolistic practices in the beer industry. Under Mr Peter Greenall. chief executive, it made unfashionable moves such as shutting its brewery and buying other regional pub companies. It is the accompanying share issues for these deals which have pushed Greenalls into the FTSE-100 index, rather than

any dramatic outperformance. Nonetheless, its shares have outperformed Vaux by almost 100 per cent since 1990. However, its elevation to the FTSE-100 may have gone to investors' heads. Greenalls is now the most highly rated investors neads. Greenaus is now the most nighty rated FTSE-100 hrewing/pubs company, based on current year forecasts. Of course, the benefits of its recent acquisition of Boddingtons should help boost earnings over the next few years. And it is an obvious beneficiary of any improvement in consumer confidence from recent tax cuts and building society

pay-outs. Nonetheless, it is trading on the same market rating as Forte was, before Granada reared its head, without the same quality asset base.

It is also vulnerable to a new accounting rule due next year on depreciation of hotels and pubs. Greenalls depreciation charge amounts to half the capital expenditure it considers necessary to maintain the value of its operating assets. Increased depreciation would clearly hurt its shares. At current levels, the share price looks frothy.

Suter makes more equipment disposals

Suter, the industrial conglomerate, is closing Clearplas UK supplier of plastic injection moulded components to motor manufacturers, to concentrate on core operations.

The company is also selling Willmotts, which makes specta cle cases, to a management team. The costs will be taken as an exceptional charge in Suter's 1995 results, which the company says will be in line with

The disposals are part of the group's programme of shedding

its equipment side to concentrate on its refrigeration, special ist engineering and chemicals activities.

Joan Gran

S&N director's share sale

Mr Trevor Hemmings, an executive director of Scottish & Newcastle, the brewing and leisure group, has sold shares

Mr Hemmings, chairman of S&N's leisure division, sold the shares in three tranches on February 2. The company said the shares were unconnected with any executive share option scheme and was unable to say at what price or when the shares had been purchased.

Last month, S&N announced the closure of two breweries as part of a restructuring which would cut 1,600 jobs. The move was part of the integration of Courage which was bought for £443m in August.

Pillarcaisse acquisition

Pillarcaisse, the joint venture between Pillar Property Investments and La Caisse de Dépot et Placement du Quebec, has acquired the Mercat Shopping Centre, Kirkcaldy, for £13.25m from Standard Life Assurance.

Rental income from the centre is about £1.55m and the purchase price represents an equivalent yield of about 10 per cent. The purchase takes Pillarcaisse's investment portfolio to more than £70m since lt was founded in July 1994.

The new owners plan a year-long £4m refurbishment for the centre to eliminate dead frontages and improve pedestrian

VDC cost control pays off

Shares in VDC, the Aim-quoted animal healthcare products company, rose 25p to 650p after pre-tax profits jumped 27 per cent to £731,000 for the six months to November, reflecting its increased emphasis on cost control and sales growth. Turnover rose 19 per cent to £30.5m.

Centralised purchasing improved gross margins and further sales growth is anticipated from the endorsement of vets and the Kennel Clnb for Identichip, a process whereby a microchip is injected into the animal for identification purposes. There are currently 250,000 animals on the Identichip database. Earnings per share are up 26 per cent to 28.44p.

Spanish sales lift Bibby

equipment distribution, paper making and laboratory equipment manufacturer, to report increased pre-tax profits of

sales up by 15 per cent.

Shares in the company, which is 78.9 per cent owned by Barlow Rand of South Africa, rose 7p to 123p.

Sales of new machines in Spain enabled J. Bibby, the capital

£8.7m for the three months to December 30, against £7m.

The industrial and materials handling divisions also showed improvements on last year. The result was achieved on group

for the full year.

foods," he said.

after excluding exchange gains.
According to Mr Derek Stevens,

had picked up in February.

£70m. The combined business

would achieve annual cost

savings of ahout £40m from

next year, a year earlier than first forecast. Mr Clothier said. Charges of £29.6m for reor-ganisation and £10m for a prop-erty revaluation were offset by

a gain of £62m from selling Golden Wonder snacks, Pot

Noodles and Homepride sauces. These left pre-tax prof-its at £69.4m (£60.9m).

Operating profits from food

ingredients fell to £15.1m

(£18.1m) on sales of £180m

(£166m) mostly because of

sharp price rises of wheat, soya

and other raw materials. Price

increases bad since restored

Profits from agribusiness

rose to £20.7m (£16.6m) on sales

of £769m (£675m) with most of

the growth coming from plg

Since December 1994, the group has raised £298m from

disposals, slightly less than it

expected. The proceeds bave

reduced net debt from a peak

of £451m to £281m last Decem-

ber. Gearing was down from 149 per cent to 66 per cent, the

likely level for the next few

years, said Mr John Martyn, finance director.

While some interpreted the rise as a for the following year it is at a dispermanent feature in response to competitive market conditions, others looks more interesting.

Pet foods problems undermine Dalgety

Climbing towards recovery: Richard Clothier backed by one of its pet food hrands

COMMENT

Dalgety has done well buying and integrating Quaker and disposing of most food manufacture. By early summer it will see how well the inte-grated petfood business works.

Volume is the key to its profits. The old Spillers showed it was very fallible on driving that forward and the mistakes cost several senior people their jobs. Assuming the lessons have been learnt, pre-exceptional pre-tax profits could hit

£120m this year and £150m the year after for a ple of 13. Until profits get there, the shares are supported by gross yield approaching 7 per cent. Shareholders who like the current flavour of management might try a nibble or two.

itles at a cost of about £25m.

Total capital expenditure this

year was budgeted at £150m

against 1995's £178m. One of

the group's goals would be to

recycling business, he said. "It

is an area where we could have

and should have done a better

job in 1995," he said. Again, the group did not

declare a dividend. The loss

per share after exceptional

Coal Investments in battle for survival

By Peggy Hollinger

Coal Investments, the company founded two years ago by former British Coal commercial director Malcolm Edwards, was last night fighting for survival as efforts to secure short-term finance appeared to have run

into difficulties. The company, which

which had agreed support until the cash call. Mr Edwards was not availabls for comment yesterday, but further news is expected

Banque indosuez, and UBS -

As a result of shareholder pressure, Mr Edwards had already agreed to relinquish his role as chief executive in return for support of the rights Issue. A replacement had recently been found, but was not yet due to be announced.

GT Chile defiant in face of Regent bid

By Richard Wolffe

The power struggle over GT Chile Growth Fund intensified yesterday after the board threatened to order the compulsory sale of shares held by Its opponent, Regent Kingpin Acquisitions.

The GT Chile board has been fighting a long battle against Regent, part of the Hong Kongbased Regent Pacific Group. In October it defeated an earlier Regent bid for the fund, which is registered in the Cayman Islands but listed in London.

Regent said that its new share-for-share offer, launched last month, has acceptances from shareholders representing more than 60 per cent of the fund. The GT Chile board dispute this figure. The board yesterday urged

shareholders who have accepted Regent's latest offer to take legal advice and withdraw their support for the bid. Under the terms of its articles of association, the board could force the sale of shares if it felt that the shareholdings caused "a pecuniary or tax disadvantage to the com-pany or any shareholders", the board said.

It argues that because Regent can close the bid with majority support, leaving a minority unable to redeem their shares, some shareholders will suffer.

Mr Peter Stevens, chairman of the GT Chile board, said: "It is the duty of the board to look after all the shareholders and if the Regent offer is not doing that, it is obligatory for us to ensure that all shareholders are looked after."

Regent Kingpin yesterday dismissed the hoard's actions as "ludicrous" and called on the board to resign. It said the articles of association were typical of Cayman Islands funds, and were normally used to protect their tax position. Mrs Sophia Shaw, director of

Regent Pacific, said: "It is extraordinary that the board is abusing its powers to remain in control. The majority of shareholders have already said they do not want the board to stay. They are burying their heads in the sand."

Restructure costs behind WMI fall an underlying 3.2 per cent fall in volumes during the year. Mr Holsten said the group intended to expand its recycl-ing business, adding 25-30 facil-

By Peggy Hollinger

Waste Management International, the landfill and rubbish collection group, yes-terday admitted to a disappointing performance in 1995, as it announced a sharp drop in annual pre-tax profits from £165.2m to £23.1m. Mr Joseph Holsten

man, said pricing pressure in Italy had led to a performance "substantially below budgeted expectations", while France had also proved very difficult. He was cautious about the trading outlook, saying the economic health of continental Europe remained "somewhat

uncertain". However, steps had been taken to improve sales and margins throughout the group, which would eventually "bear good fruit", with improving cash flow a top priority. WMI was expecting a signifi-

cant improvement in positive cash flow this year, from £41m in 1995 to £70m, partly due to a a restructuring to focus on core waste businesses and to streamline management, he said. This would involve disposals, at least six of which were under negotiation.

The drop in profits was largely due to a £123.2m exceptional charge, foreshadowed in a December warning, to cover the reorganisation. At the operating level, profits fell by 7.6 per cent to £165m, on sales 5.8 per cent ahead to £1.18m. The sales increase was partly

due to the 25 acquisitions made during the year for a total cost of about £23m. The purchases, price increases and foreign

Yesterday's subdued WMI offered little to encourage optimism in this set of results. Markets in most countries remain difficult, with only gradual improvements expected. But there is some comfort to be drawn from the manage ment's restructuring, which may have come somewhat late. but is now well under way. This should enhance the marginal trading improvement over the next two years. Then, there is the fact that WMI, once one of the most highly rated waste stocks, now languishes near the bottom of the league. Further downside from its current rating of 12 times 1996 earnings - forecast at about £165m pre-tax - seems unlikely. Yet the upside, too, is limited. Profit taking from

long-suffering shareholders

may well keep the shares trad-

charges was 0.9p, against last year's earnings of 27.8p. COMMENT

Shares in CentreGold, the lossmaking video and computer games software publisher and distributor, were suspended at 37p yesterday after it announced that it may have found a buyer.

A brief statement said it was in "advanced negotiations con-cerning a possible offer for the company", and that its delayed preliminary results for the period to August 4 would be announced when the negotiations are complete.

Although it gave no timetable, the negotiations, thought to involve an overseas buyer. are expected to be completed within about two weeks.

Industry speculation about possible bidders for CentreGold has centred on Japanese electronic games manufacturers such as Nintendo and Sony Computer Entertainment.

· CentreGold, whose shares were floated at 125p in October 1993, was forced to issue two profit warnings last year, sending its shares plunging. In August it said it was

"exploring with a small number of major international partners the possibility of a strate-

gic alliance which could fur-ther strengthen the group's resources for the next stage of development of the internatlonal interactive multimedia industry".

Redland's stake rise moch

The European brick industry

above 60 per cent.

Yesterday's announcement was prompted by Stock Exchange rules that require the suspension of shares in companies which have not produced results within six months of the end of a reporting period.

At the end of last year Mr Martyn Savage, the group's managing director, announced that he was is stepping down. Mr Savage was one of three senior executives who helped float the company. The others were Mr Geoff Brown, chief executive, and Mr Tim O'Connell, finance director.

Since the float the cartridge market for video games has been "extremely turbulent" ahead of the arrival of a new generation of games machines, a fierce price war and the rise of the PC CD-Rom games mar-ket. As a result CentreGold's turnover has fallen sharply and the company has sunk into losses, reflecting lower margins, stock write-downs and reorganisation costs.

Redland intends to carry out a strategic business review. Andrew Taylor reports radical restructuring of the European roof tile and brick industries is on the cards following the decision by Redland, one of the UK's biggest building material companies, to conduct a strate-

Robert Napier, plans were at

boundaries. The brick manufacturing arm of Hanson, the large conglomerate which plans to demerge, last week launched its first significant takeover outside the UK. It has agreed to purchase Desimpel Kortemark, one of the largest brick producers in the Benelux countries, in a deal worth about £195m including debt.

Hanson, UK market leader with 30 per cent of domestic brick sales, will become the largest European manufacturer ahead of Wienerberger, the Austria-based brick producer. which is market leader in Germany and which recently purchased brick interests in

them on." The food and garment label husiness accounts for roughly half of group operating profits and sales.

A cost reduction programme, introduced in October, had resulted in a 5 per cent cut in staff and other efficiency measures were being undertaken. "We are taking some fundaabout our business," Mr Irving

the hanger business were proceeding. But Mr Irving said the division's problems of high raw material costs and margin pressure continued to affect

Ferguson's difficultles had been signalled at the interim results in October, when the company reported a 13 per cent decline in pre-tax profits and a disappointing start to trading in the second half.

The company ran into further problems in December when it was ordered to restate its 1996 accounts by the Financial Reporting Review Panel. The panel was concerned over the treatment of goodwill following the acquisition of Elswick, a rival labels producer, in September 1994.

The shares closed down 21p

Sears cuts more jobs on shoe side

Elf Petroleum UK, the British subsidiary of the Elf Aquitaine Sears, the UK's largest oil group, has bought out its 50 per cent partner in Associated Gas Supply, for an undis-In a move that could herald further restructurings in the

UK independent gas sector, Elf bought the shares from Energy The company said it expecand Technical Services Group, a company ultimately controlled by CGE, the diversified French utility group. In a statement, Elf said the

purchase confirmed its commitment to the UK gas market, which is due to be opened to full competition in 1998. Agas was formed in 1987, following deregulation in part

of the gas market. It is one of the top suppliers to customers in the industrial and commercial markets which are now open to competition.

Fierce competition there is thought to be one reason why Energy and Technical Services decided to sell to Elf.

specialist retailer, yesterday announced further joh losses in its shoe division following the sale of its Saxone and Curtess chains to Sheffield entrepreneur, Mr Stephen Hinchliffe, for an undisclosed sum.

ted to cut 300 jobs from the head office of British Shoe Corporation and its logistics division over the next 12 months as a result of the disposal. The deal will also generate positive cash flow of about £12m. Mr Hinchliffe's private com-

pany, Facia, has hought 134 stores, with turnover of more than £60m and assets valued at ahout £10m, Following the acquisition, Facta will have more than 400 high street shoe shops throughout the country. Facia has also agreed to acquire many residual short

leasehold interests through the

purchase of the Saxone com-

pany when the British Shoe

Mr Liam Strong, chief executive of Sears, said the disposal would allow the group to "achieve a clean separation from our non-core shoe businesses and simplify the overhead structure of the business." Sears would also now be

free to "concentrate on the suc-

cessful development of new

shoe formats," which include the high street chain Shoe Express, and the out of town Shoe City ontlets. Mr Strong said the loss on the disposal and the cost of restructuring were included in provisions announced in the company's January trading

Analysts welcomed the dis posal, saying the sale price and risk of some leases reverting to Sears - which could force further provisions - were largely irrelevant. "In the circumstances, it is better to take that risk than to carry on with the trading situation as it was, said one analyst.

Funds under management fall | Marling pays \$4.75m further at Henderson Admin

By Nicholaa Denton

Pension funds have accelerated their withdrawal of money from Henderson Administration, the UK fund manager, in the three months to December. Their money with Henderson has halved in less than two years.

Funds under management from institutions fell from £2.9bn at the end of September to £2.35bn at the end of December, according to Henderson's quarterly results, announced

of pension fund assets as recently as March 1994, but poor investment performance by the group has led to clients

moving elsewhere. Henderson had said at the time of its half-year results that it was on notice from seven clients with £300m under management. The actual decline of £550m suggests that there have been further defec-

But the decline was partially offset by the strength of Seligman Henderson, the group's US partnership. It contributed to growth in international 1995 to £2.3bn at the end of December.

Henderson said that its mix of business was changing and that it had readied an office in Singapore as an Asian base. The company said that it viewed Asia as a source of funds as well as an area for

Pre-tax profits for the nine months to December 31 were virtually unchanged at £14.9m . Total funds under management or administration declined to £13.4bn in December (£13.7bn).

for Southern Weaving

By Tim Burt

Marling Industries, the industrial textiles company. has announced an international expansion plan designed to make it the world's largest supplier of seat belt webhing. The company already claims

to have 15 per cent of the \$250m (£162m) global market snpplying automotive manufacturers. It will now increase that share to 25 per cent following the acquisition of Southern Weaving, the North American seat belt subsidiary of Woven Electronics Corporation, the US textiles group.

It is to pay up to \$4.75m (£3.1m) for the loss-making business, which serves manufacturers including Ford and Chrysler.

Marling is also to moveil a Chinese joint venture to serve Volkswagen's plant in Shanehai, China, a joint venture in

Malaysia and a small acquisition in New Zealand. The deht-financed acquisitions are expected to lift Mariing's gearing from about 55 per

cent to 78 per cent. Most of Southern Weaving's production will be moved to Marling's existing industrial textiles plant in Canada.

WELSH HEALTH COMMON SERVICES AUTHORITY

INFORMATION GROUP MARKET TEST

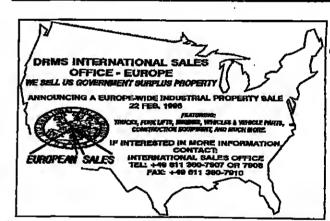

The Information Group of the Weish Health Common Services Authority is narioet testing some of the information services currently provided to NHS podies in Wales and England. The services required include data processing, applications development

applications enhancement and application support and maintenance Applications likely to form part of the market test inclu Finance services - ledger, creditor payments, debtors, income receiption direct input of pay and payroll, travelling expenses, cheque list and econciliation, payroll data query, payroll related statistics and workforce

Child health services - development and support, facilities manage

Other services - supplies, information system, anaesthetic records, pharmacy, Welsh Drug Information Centre support, Welsh Medicines Resource Centre support, radiology information systems, and microcomputer system support. Expressions of interest are invited to undertake this work and should be sent to the Procurement Group. Welsh Health Common Services Authority, Crickhowell House, Pierhead Street, Capital Waterside, Cardiff CF1 5XT by st March 1996. Interested organisations should note that this opportunity is also being advertised in the EC Journal and the EC public procureme regulations apply. An information pack is available from Mr D Noon at the above address. Telephone: 01222 502427

الام) ميار الامار ميار Total

The world sugar surplus this season is expected to reach 3.65m tonnes following record output in Brazil and big increases in Australia, South Africa and Thailand, E.D. & F. Man, the London broker, says today.

Man puts production in the 1995-96 crop year at 120.6m tonnes raw value, or 1.7m tonnes higher than its September estimate. This would put production 4.4m tonnes above the previous year.

The increased estimate results from a projected rise in cane sugar output to a record 84.1m tonnes, 2m tonnes above the last estimate. Brazil makes up more than 80 per cent of the

The broker also forecasts a rise in world consumption to 116.9m tonnes, from last year's 114.2m tonnes, thanks to growing demand in the Asian "Tiger" economies.

Man appears baffled by the continued strength of sugar prices, given this large projected surplus. It notes the lack of immediate supplies from Brazil, delayed shipments from Cuba and continued tight European Union sugar export

But it adds: "It is becoming increasingly difficult to explain the renewed support for prices at a time of widening projected supply surpluses.

With the exception of the Australian exports, much of the anticipated increase in exportable tonnage has to be priced. The resulting producer pricing and the availability of new crop supplies should depress prices,"

Man says that Brazil's combined crop is now estimated at about 12.8m tonnes, some 1.1m toones above last year's tion increase in Brazil continits exports rose strongly last

year to reach a provisional 6m tonnes, making Brazil the world's largest exporter. F.O. Licht, the German commodity statistics agency, last week revised its output forecast to 121,9m tonnes from its

October estimate of 120.8m. In its second outlook report for this season, it said falling import requirements should raise world sugar stocks by 4.4m tonnes to 42.8m. Stocks were expected to reach 36.8 per cent of consumption, compared with 33.7 per cent last season. The London Commodity Exchange reported the second highest monthly volume of trade in wheat futures last month since the exchange took over the contract in 1991. High grain prices led to greater

interest in the UK and Europe,

pushing volume to 10,221

nearly 50 per cent higher than

The summit is the brainchild of the UN Food and Agriculture Organisation's director general Dr Jacques Diouf. He argues that heads of government need to put their authority behind a commitment to ensure food for all - which requires wide-ranging action beyond the capacity of minis-

tries of agriculture.

It will be the first such meeting of heads of government to consider food in the 50-year history of FAO.
"Eliminating present bunger

and preventing future hunger is the aim," says the CFS's secretary Barbara Huddleston and

orld leaders need to also chief of the Food Security and Agricultural Policy Analysls Service in the FAO. Today. some 800m people go bungry, including 200m children. Unless the international community and national governments address the underlying causes of under-nutrition. namely poverty, 15 years from now there will still be around 750m hungry and undernourished people in the world, says

Dr Diouf. For Turkey's representative at the committee, Kemal Bedestenci, there is a sense of drio ru. He was also involved in the 1974 World Food Conference, which adopted the widely remembered but unfulfilled resolution that within a decade "no child will go to bed hun-

gry". The Summit is very important, he says. Political commitment is needed at local, national and regional level. For Mr Bedestenci, establishing clear objectives and targets and being specific about what should be done, by whom and at what level, are central to

any bone of soccess. A draft policy statement and plan of action will be discussed by a series of FAO regional conferences between March and July, with progress monitored by a working group from the CFS. These meetings are expected to propose specific objectives and targets for the plan, which will be discussed at the next full CFS meeting in

Government action is not expected to be enough, however. All those concerned with various aspects of food security at national and bousehold levels are invited to contribute to the national reviews being developed as input to the sum-mit. This includes private sector associations such as farmers' organisations, business and industry groupings as well as public interest non-govern-mental organisations. They are

also being encouraged to con-

tribute to the regional meet-

ings and the summit itself.

Geoff Tansey on the heads of government food crisis meeting planned for November

The three elements that make up food security availability, access and stability - have to be examined in today's circumstances according to Dr Hartwig de Haen, Assistant Director General. Economic and Social Policy Department

One issue is the appropriate minimum safe cereal stock-to-utilisation ratio and the contribution of stock levels to cereal price instability. Stocks have fallen to what many regard as dangerously low levels, 14 to 15% per cent below what the FAO has long seen as a minimum level of 17 to 18 per cent. Preliminary FAO work suggests lower carry-overs may be possible but the methods used assume one year in 20 stocks would be insufficient. This is unacceptable to the committee. which believes stocks should

what the level should be, says Ms Huddleston.

Price instability also affects food security, especially for poor consumers. Globally, instability is linked to stocks and the operation of the mar-ket, says Jim Greenfield, head of the Commodity Policy and Programmes Service in FAO. For farmers, processors and millers, price instability means they cannot plan ahead. The challenge, be argues, is to develop instruments, such as futures markets, that can take that uncertainty out but which are not too sophisticated for

For consumers, especially in developing countries where people buy food much closer to its point of origin and nearer to its raw form, unstable prices, with bigh peaks, can cause hunger. Such consumers need safety nets, food aid and other instruments that cushion the effects on the poor, he says, a theme he will be expanding at the Agra Europe conference in London later this month

most farmers to use.

New guidelines are also needed to deal with land tenure problems, according to Mr Henri Carsalade, assistant director-general, Sustainable Development Department. Land tenure problems remain a major constraint for poor, small farmers and inhibit them from improving their land. He expects the summit to provide guidelines for action to replace those from the 1979 world conrural development, which, he implies, are now obsolete. So far, 50 heads of state have agreed to be patrons of the summit according to Dr Diouf,

who is travelling extensively to

drum up support.

The aim is for a "low cost, high impact summit", says summit secretary-general, Ms Kay Killingworth. The FAO has a summit budget of \$1.2m and is using existing meetings, such as FAO regional conferences, to prepare for it. Other governments are expected to provide funding for specific activities and to support the participation of non-governmental organisations from the developing countries. Dr Diouf is also calling on governments not to bold expensive receptions and dinners during the summit and to donate the money saved to the special programme on food production in support of food security in low

income food deficit countries. Summit preparation comes at a hard time for FAO, where morale among many staff is at a low ebb, as activities are being squeezed after a budget cut of \$60m from a projected \$710m to \$650m for the two years 1996-97 by the FAO conference in October 1995.

For background papers and information on how to become involved, contact: Ms Kay Killingworth, Secretory General. World Food Summit. FAO. [Viale delle Terme di Caracalla] 00100 Rome, Italy. Fax: +39 6

Eastern cuts tighten lead market

By Kenneth Gooding. Mining Correspondent

Present tightness in the lead market can be traced to big falls in ontput in China and Kazakhstan

Preliminary statistics from the International Lead & Zinc Study Group show Chinese production fell by 12.4 per cent or 58,000 tonnes last year compared with 1994 while the suspension of production at the Chimkent smelter in September contributed to a fall of 29 per cent or 42,000 tonnes in

This resulted in a substantial cut in exports of lead - used mainly for making batteries from these countries. The ILZSG estimates net exports from the former eastern bloc countries to the west dropped by 27 per cent, from the record 233,000 tonnes in 1994 to 150,000

The study group says this contributed to lead consump-

BASE METALS

tion exceeding supply by output in the west, the same as 106,000 tonnes in the western in 1994. world last year comparad with a 20,000 tonnes surplus in

World consumption of lead moved up by 2.3 per cent, or 125,000 tonnes, to 5.48m tonnes in 1995, according to the ILZSG. Demand in the western world alone reached a record 4.89m tonnes, up by 2.5 per

Global lead mine output fell by 1 per cent or 28,000 tonnes to 2.676m, mainly because of big reductions in production in China and Australia where industrial strife at Mount Isa Mines had a significant impact in the first half.

World refined lead production increased by 0.1 per cent or 5,000 tonnes. The study group's preliminary assessments show that western world production of lead from secondary or scrap material amounted to 2.38m tonnes, representing 51.9 per cent of total

 The study group estimates that world consumption of zinc rose for the third successive year, by 5.1 per cent to a new record of 7.33m tonnes. In the western world the exceptionally strong growth in demand in 1994 was maintained last year, consumption was up by 5.8 per cent to 6.21m tonnes.

Mine output recovered some

what from the steep fall in 1993-94 with the global total increasing by 1.8 per cent to 6.94m tonnes. World zinc metal production was up only by 0.9 per cent at 7.19m tonnes. Zinc demand exceeded production for the first time since 1987 in the world as a whole - by 141,000 tonnes - and in the western world the deficit was 779.000 tonnes. Exports from the Commonwealth of Independent States and China to the west eased slightly last year, from 551,000 tonnes to 410,000 tonnes

Philippines boosts incentives to foreign mine investors

By Edward Luce in Manila

The Philippines government yesterday unveiled another package of incentives to boost foreign investment in the country's once-moribund mining industry. The presidential directive, which follows the enactment of a mining liberalisation bill last year, offers overseas companies five extra investment tracks in addition

to the right to make outright

purchases of government

'Until today foreign companies could bid only for ownership of government mining assets when they were ten-dered for privatisation," said Mr Gonzalo Santos, chief of the Asset Privatisation Trust in Manila. "These extra options give foreign investors much greater flexibility in deciding how to enter the Philippine

mining industry.

COFFEE LCE SAGTNE

Overseas interest in the gold and copper-rich Philippines mining sector, which provided more than 20 per cent of the country's export revenues in the late 1970s, surged last year when the government lifted restrictions on foreign owner-

cover all contingencies, though

there is no consensus yet on

As well as having the chance to take full ownership of Phillppine mines, foreign companies can also repatriate un to 100 per cent of profits. The government also slashed excise taxes on gold, copper and other

ference on agrarian reform and

The new options announced yesterday include the chance to enter into joint-ventura agreements with the Philippine government to manage stateowned mines, fixed management contracts to operate government mines, build-operatetransfer agreements (where foreign investors return the

asset to state ownership after

JOTTER PAD

managing it for an agreed period) a lease-purchase facility and a "securitisation" facility that allows the two parties to experiment with various equity arrangements.

These new measures will help revive the Philippine mining sector," said Ms Minda Olonan, a mining analyst at James Capel Securities in Manila, "Foreign interest in the Philippines has already risen considerably.

German sell-off drags down European prices

By Martin Brice in London and Lisa Bransten in New York

European government bonds were dragged down by a the future had fallen through sell-off in the German market the psychologically important yesterday that was largely caosed by technical factors, although investors kept one eye on the possibility of a delay to European Monetary

Analysts pointed to comments from Mr Wolfgang Schäuble, the parliamentary leader of the ruling Christian Democrats in Germany, in which he said that they had been thinking about the possibility of postponing monetary union, as being of particular importance.

The high yielding markets produced mixed movements, with the spread of Italian bonds over bunds tightening wbile Spain moved out

continuing jitters over economic policy, which were compounded by an old story that its deht might be downgraded. minds that the Bundesbank stance of being long on Italian

as they continued their weak tone of Friday, during which the future had fallen through level of 100.

Traders reported selling by speculative investors yesterday, and the bund future on Liffe fell 1.26 to 98.30 in very

GOVERNMENT BONDS

heavy volume of 322,000 contracts. The spread over 10-year Treasuries widened by 6 basis points to 34 points.

The yield on two-year hunds rose by 23 basis points, and that on 10-year paper by 13 points, with the spread between the maturities settling at 225 points.

Ms Mary Bloem, a bond

strategist at Paribas Capital Swedish honds underper Markets, said around DM20hn formed hunds on the back of of supply due in February was a concern. She added: "We think it is merely a correction and there is no doubt in our

■ German government bonds will cut the repo rate by 50 bonds to being underweight. of all maturities fell yesterday basis points in March and go Mr John Hall, head of Euroback to a variable repo."

> French government bonds avoided much of the sell-off in Germany and outperformed bunds, with the spread in the 10-years tightening by 6 points to 44 points.

On Matif, the March future settled at 121.66, down 0.76 while March Pibor fell 0.12 to 95.43. The yield on one-year paper rose 11 basis points while that on 10-year honds rose 8 points, with the spread between the maturities at 195

■ Italian government bonds outperformed bunds and the spread tightened by one basis point to 421 points, as some progress was made towards political stability.

On Liffe the March future closed at 111.50, down 0.62, while in the cash market the yield on two-year paper rose hy 10 basis points and that on nine-year paper by 14 points. SBC Warhurg reversed its

pean economic research, said prime minister-designate Mr Antonio Meccanico had heen having difficulties with the formation of a new government "Over the next few days that will permeate the market and we will be exposed to uncertainty," he said.

■ The European-wide sell-off included UK government bonds, which ignored domestic statistics that pointed to subdued January retail spending and a slight increase in the M0 measure of money supply.

The March future on Liffe closed at 108%, down 1% although traders reported very little business in the cash market. The spread over hunds was static at 175 basis points.

The yield spread over bunds on Swedish honds rose by 12 basis points to 255 points on a combination of continuing doubts over domestic economic policy and a re-run of Standard & Poor's views first expressed last January that Sweden

10-year minus 3-month rates

risked being downgraded if it deviated from its tough fiscal programme.

Dec '95

■ US Treasury prices were lower in early trading as the dollar weakened and the market braced for a wave of new supply this week. The Trea-sury Department will be conducting its largest-ever quarterly refunding starting today. Pressure was greatest at the long end of the maturity spec-trum, which is where the new debt is set to be released. This afternoon, the Treasury will sell \$18.5bn in three-year notes; tomorrow it will sell \$14bn in 10-year notes; and on Thursday \$12bn in 30-year bonds.

Near midday, the benchmark 30-year Treasury was down 3 to 109%, yielding 6.176 per cent. while the 9%-year notes whose maturities are closest to the 10-year paper to be sold on Thursday - were 1 lower at 1011 to yield 5.697 per cent. At the short end of the market, the two-year note fell i to 100%, yielding 4.933 per cent.

Also weighing on the market was a drop in the value of the dollar against the D-Mark and the yen. Traders attributed the decline to profit-taking on the heels of last week's gains and on a new consensus that the

German economy might not be as weak as many had believed. In early trading, the dollar was down nearly 2 pfennigs at DM1.4657 and more than a yen at Y104.93. A weak US currency is bad for Treasuries because it discourages international investors from holding dollar-denominated securities.

Net redemptions at European funds

By Antonia Sharpe

European mutual funds had a difficult year in 1995, with an estimated \$7.5bn net withdrawn over the year because of a poor result in France, J.P. Morgan said in its monthly review of European mutual

The figure grows to \$17.8bn if the UK is excluded. French Sicav funds alone suffered \$49on of net redemptions, corresponding to 15 per cent of total assets held at the start of

Money-market Sicavs were responsible for a large part of the outflows, but bond and equity funds accounted for almost 40 per cent of net redemptions. Italy saw total outflows of

\$6.4bn from bond, equity and balanced funds, which is more than 8 per cent of the total asset value.

By contrast, Germany and the UK stood out as the two European countries which received new investment across the different categories.

Germany took in a total of \$36.6bn net, almost 11 per cent of assets, and the UK took in \$10.3bn, 6.9 per cent of

Meanwhile, US mutual funds took in a net \$175.9bn in 1995. or 21.1 per cent of total assets. In December alone, flows into US equity mutual funds reached a new peak with net subscriptions nearly doubling those of the previous month to

International and global equity funds also saw record inflows, taking in \$2.7bm and

\$1.3bn respectively. J.P. Morgan said the increas-ing proportion of US flows into international funds should benefit European stock mar-

kets to some degree. In the UK, flows into foreign equity funds bounced back to £252m in December after a weak November. The bulk of the new investments went to

the Far East and Japan funds J.P. Morgan added that just under half of the institutional money was directed at Far .. East (excluding Japan) funds.

Issuance restricted to FRNs

By Conner Middelmann

Sharp sell-offs in most government bond markets put a lid on primary eurobond activity yesterday, restricting issuance mainly to floatingrate note issues and one retailtargeted D-Mark deal.

The day's largest floater was a £150m issue of three-year notes for Compagnie Bancaire. The all-in cost was 13.5 basis points over Lihor, and the paper was selling inside fees, said lead manager Goldman Sachs. "Everyone's looking for decent Libor-plus coupons." a

Another dealer was more sceptical, noting that "French credits are going through a difficult time - not a lot of people feel comfortable buying them."

WORLD BOND PRICES

BENCHMARK GOVERNMENT BONDS

It was this sentiment that prepared the ground for the World Bank's FFr500m, sixyear issue yesterday, which got a friendly reception in France despite its fairly aggressive pri-

cing, lead manager BNP said. INTERNATIONAL BONDS

The offering · wbose proceeds will go towards the World Bank's single-currency loan programme - was priced to yield 2 basis points over

French government bonds. However, French investors bave been so rattled by the poor performance recently of several French borrowers' bonds - especially Credit Foncier, the troubled property

lender - that they have been keen to buy franc-denominated bonds hy highly-rated, foreign

and Austria's OKB to execute successful deals in the French franc market in recent weeks. Lebman Brothers hecame the sixtb US investment bank to tap the FRN market this year, with \$100m of five-year notes. The bonds were sold at a yield of around 63 basis points over Libor, attracting banks and funds keen to pick up

This enabled GECC of the US

In addition, lead manager Lehman Brothers said: "The industry fundamentals are looking good: earnings in the securities business have been relatively stable lately, the rating agencies have got some

Italian bonds register best return in January

— Low coupon yield — - Medium coupon yield — - High coupon yield — Feb 5 Feb 2 Yr, ago Feb 5 Feb 2 Yr, ago Feb 5 Feb 2 Yr, ago

7.03 7.82 7.94

Feb 5 Feb 2 Yr. ago

By Martin Brice

Italian government bonds shrugged off investors' worries over political uncertainty in January to register the best return in local currency terms, according to J.P. Morgan. Its Government Bond index

sbowed all markets producing a positive return except Japan, which fell 0.38 per cent in local currency terms.

"In Europe, an outlook for weaker than expected growth, the prospects of central bank rate cuts, and a befty appetite for risk, helped make the highyielders, particularly Italy, attractive to investors," said

6.97

Feb 5 Feb 2 Yr. ago

8.57

After Italy, France and Bel agium were followed by the: high-yielding markets of Spain and Sweden. Germany, the US and the UK were ranked 15th, 17th and 18th respectively.

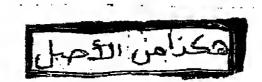

"All European markets posted gains through most of the month, with some profittaking and corrections reflecting fitters about Emn -occurring late in the month," Morgan said.

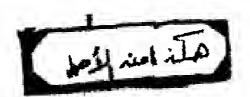

In US dollar terms, most of the European markets posted negative returns with the exception of Italy, while New Zealand turned in the highest return, of 4.47 per cent on the month, after a very poor

The dollar's New Year rally ran into the buffers vesterday as a reassessment of US and German growth prospects prompted heavy selling in bond and currency markets.

The dollar fell to its lowest level in two weeks, closing nearly two pfennigs lower in London at DM1.4693 from DM1.4872 on Friday. Against the yen it finished at Y105.12, from Y106.68.

The catalyst for the dollar's fall was an unexpectedly strong set of German output data, which prompted some reassessment of the likely fall in German interest rates. Longer dated euromark futures contracts fell by more than 20 basis points and short sterling contracts also fell across the

From a technical perspective, the dollar's losses do not represent a break of the upward trend, underway since October. This caused some

observers to describe it as no ties, under pressure from US more than a healthy correction auto manufacturers, would not before the upward move is continued. Others maintain that the dollar's inability to break through key resistance levels casts doubt on the sustainability of the rally.

Sterling benefited from the weaker dollar, closing at \$1.5327, from \$1.5189, but lost ground against the D-Mark to close at DM2.252 from DM2.2589.

In Europe the D-Mark was stronger against most currencies. It closed at FFr3.44 against the French franc, from FFr3.435.

The dollar's correction was a continuation of the move that started in the yen last Friday, amid talk that the US authori-

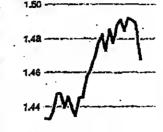

Pound in New York 1,5345 1,5334 1,5311 1,5188

sanction a move above Y110. Yesterday's move flowed more from the German industrial production data, read together with last Friday's US lobs report, which was much weaker than the market had expected. Mr Michael Burke, economist at Citibank in London, said: "It is difficult to build a dollar rally on a story

of economic slowdown." He said the market had recently focused on the problems in the German economy to the exclusion of develop-ments in the US. "The idea that it is only Germany that it is going to be cutting short rates this year is misplaced." He said the dollar's inability to break above DM1.5050 and SFr1.2260 repeated the pattern of recent years whereby the dollar was unable to sustain an initial rally.

Many investors, especially in the speculative community, were also ready to take profits.

Against the D-Mark (DM per \$)

They had become very long of the dollar last month, following positive comments from senior financial officials, such as Mr Hans Tietmeyer, president of the Bundesbank.

Mr Jim O'Neill, chief currency economist at Goldman Sachs in New York, said a sustainable dollar rally needed falling German bond yields, and this was not happening.

Instead he said the Bundesbank's decision last week to fix the repo rate suggested it wanted to slow the rate of fall in interest rates. "They are sending the wroog message for

CURRENCIES AND MONEY

Mr Brian Martin, currency strategist at Barchys in Lon-don, said it was too early to be making definitive prognoses about weak US growth, especially given weather distortions. And even if growth was slowing, he said this would shrink the US's trade deficit with Japan, which would be

the dollar," said Mr O'Neill.

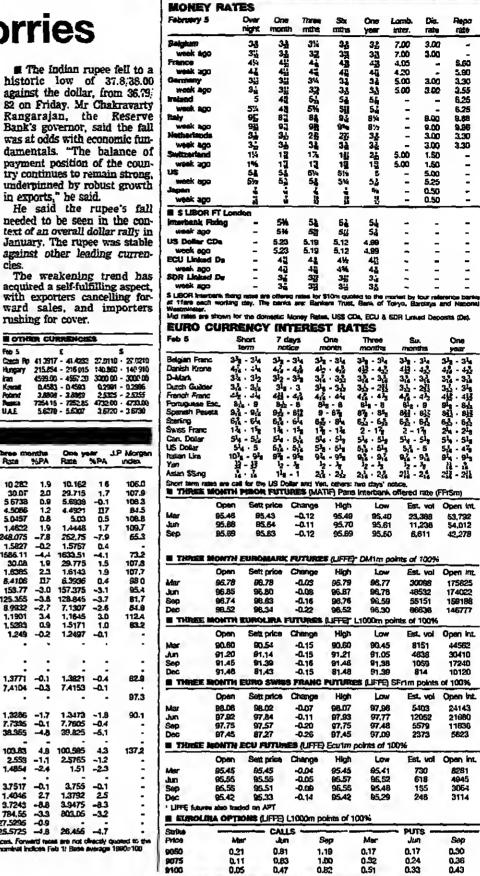

dollar supportive. Mr O'Neill said fears about the US Treasury capping the dollar against the yen were quite widely held, but probably misplaced. He said establishing a fixed ceiling for the dollar would be a serious disincentive to foreign investors buying US bonds, which is oot something the Treasury can afford to encourage. He did not rule out, however, a short term correction to Y103-104.

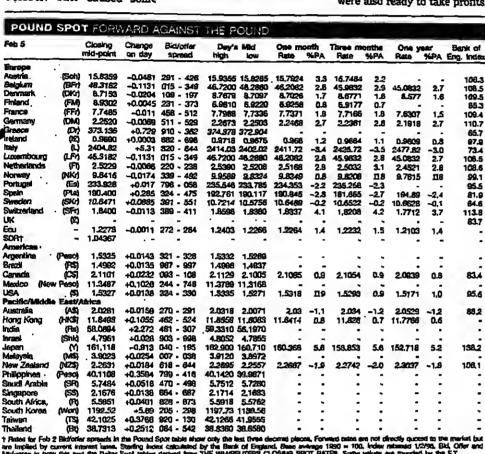

The Indian rupee fell to a historic low of 37.8:38.00 against the dollar, from 36.79 82 on Friday. Mr Chakravarty Rangarajan, the Reserve Bank's governor, said the fall was at odds with economic fundamentals. "The balance of payment position of the country continues to remain strong,

in exports," he said. He said the rupee's fall needed to be seen in the context of an overall dollar rally in January. The rupee was stable against other leading curren-

The weakening trend has acquired a self-fulfilling aspect, with exporters cancelling for ward sales, and importers rushing for cover.

SAINT-GOBAIN IN 1995: NET INCOME OF 4.2 BILLION FRENCH FRANCS

Consolidated net income for the Saim-Gobain Group amounts to 4,210 million French Francs in 1995. It shows a 16% increase compared to 1994 fiscal year, which profited from the capital gain recorded on the disposal of the Paper-Wood Divisioo. Excluding the net results of sales of non-current assets, it amounts to 4,030 million French Francs, showing an increase of 49% on that of the previous year. This improvement is due to a sustained level of activity in most of the Group's businesses. Based on current estimates presented in the Board of Directors on January 25th, 1996, the key consolidated figures are as follows:

In millions of French Francs	(estimates)	1994
• Sales	70,270	74,494
Operating income	7,830	7,295
Financial charges, net	(610)	(1,305)
Reorganisation and other costs	(560)	(1,123)
 Income before tax and before results of sales of non-current assets 	7,060	5,299
Results of sales of non-current assets	150	1.962
Income taxes	(2,430)	(2,084)
Net income before minority interests	4,700	4,750
Net income	4,210	3,625
 Net income excluding net results of sales of oon-current assets 	4,030	2.706
Resources from operations (cash flow)	9,210	8,115
Capital expenditure on plant and equipment	5,700	3,778
Acquisition of investments	3,900	2,762
\$1.31 L.L.	2 700	2 512

The accounting principles used are comparable to those applied in the previous year. They are also in accordance with international accounting principles (IAS), with the exception of the new IAS 22 standard on the amortisation period of goodwill, whose application has been deferred as permitted by the Commission des Opérations de Bourse. As a result, the amortisation periods concerning goodwill as applied in 1994 have not changed in 1995.

Group sales are down by 5.7% in real terms, due to the disposal of the Paper-Wood Division as at November 1, 1994. Sales of the glass packaging company Ball-Foster are consolidated from September 15, 1995. On a comparable structure basis, they show an increase of 0.3% in French France and of 5.1% in local currency. Sales are split: France, domestic market 19%, exports from France 10%, other European countries 40%, countries outside Europe 31%. Despite a slight slow down during the last quarter, sales volumes remained at a good level in Europe as well as in the American continent.

Operating income is up 7.3% and represents 11.1% of sales, against 9.8% in 1994.

Income before tax and before results of sales of non-current assets increased by 33% after dividends from non-consolidated subsidiaries which decreased slightly. Net interest expense and reorganisation and other charges are less than half the amounts of the previous year. Results of sales of non-current assets amount to 150 million French Francs, against 1,962 million French Francs in 1994 which was due to the exceptional capital gain on the disposal of the Paper-Wood Division. Minority interests decreased significantly to 490 million French Francs, because of the non-recurrence of the capital gain on the disposal of the Paper-Wood Division, of higher Group shareholdings in Vetr.L and Oberland, and of the reduction in the results of the subsidiaries located in Latin America.

Net income amounts to 4,210 million French Francs. Earnings per share based on the number of shares issued at December 31, 1995 (83,540,848 shares) are FF 50.4 against FF 44.6 at December 31, 1994 (81,192,658 shares). Cash flow amounts to 9,210 million French Francs. It represents 13.1% of sales and covers almost all capital expenditure and invest-

The Group's net indebtedness of 3,790 million French Francs remains at a low level and represents approximatively 8% of share-

holders' equity, including non-voting participating securities. The review of results by business activity shows that Building Materials and Pipe declined while Flat Glass, Insulation and Fibre

Reinforcements, Containers and Ceramics and Abrasives improved significantly. The review by geographical areas shows that the results of the countries outside Europe declined due to the lower results in Latin

America. Those of France and the other European countries improved significantly.

LONDON STOCK EXCHANGE

Weak international bond markets hit Footsie

By Philip Coggan, Markets Editor

Sbare prices in London dropped sbarply vesterday in line with falls in international bond prices and weakness in European stock markets.

By the close, the FT-SE 100 index had lost 34.7 points to 3,746.6, wiping out all of Friday's gain. The junior FT-SE Mid 250 index did not suffer as hadly, relinquishing 15.8 points to 4.136.4.

Shares were led lower by gilts. with the benchmark 10-year issue falling more than a point, to yield 7.73 per cent. German government

Analysts were divided about the cause of the weakness in international bonds. Some said it was due to a feeling that governments' reflationary policies, designed to stimulate a slowing world economy, might eventually create inflationary pressures. Mr Richard Jeffrey. Charterhouse Group economist, said: "What is happening in the gilts market is the reaction I expected after the last base rate cut."

But Mr Keith Skeoch, chief economist at James Capel, pointed to nervousness ahead of the US Treasury auctions today, tomorrow and on Thursday, and to concern that the Bundesbank might not reduce rates boods also fell in excess of a point. as quickly as some would like.

Whatever the cause, the recent its mobile phone charges in the weakness in gilts has pushed up the yield ratio - the relationship between bond and equity yields from 2.04 at the start of the year to 2.16 at the end of last week. A higher ratio makes shares look relatively less attractive.

Add in the effect of a weaker dollar on European bourses - shares in Paris and Frankfurt fell by I to 2 per cent - and London had little hope of escape.

Domestic news did not help. British Airways' third-quarter results were at the lower end of the range of expectations and the shares were marked down accordingly. Vodafooe suffered after Cellnet reduced

face of an increasingly competitive market.

There was, at least, some continned bid speculation to lighten the gloom. Pearson, the media group which owns the Financial Times, was one of the few Footsie gainers on the back of a weekend story that Viacom, of the US, was a potential bidder, volume was light, however.

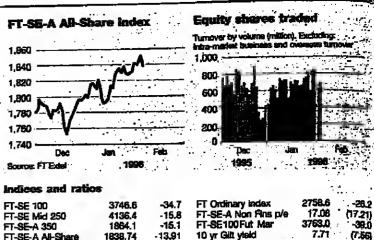

Traders marked shares lower at the opening in response to Friday's fall on Wall Street in both bond and share prices. The Footsie began the day 18.3 points off at 3,763.0.

The malaise which affected international hond and stock markets

a rally and shares received a further knock in the afternoon when Wall Street opened weaker. At its worst, the leading index was 38.2 points down at 3,743.1.

There was a general feeling that equities, which have had a very good start to 1996, were due for a breather. That seems true on Wall Street, which has regularly been setting records, and by the close of trading in London yesterday the Dow Jones Industrial Average was

around 19 points lower. Trading volume was reasonable for a Monday, with 734.7m shares having heen traced by the 6pm count. Customer husiness on Friday was a healthy £1.96bn. prevented the Footsie from staging

Gas Distribution +0.5 Engineering, Vehicles Other Financial +0.2 Retailers, Food Life Assurance

Pearson bucks the siide

Pearson, the media couglomerate which owns the Financial Times, jumped against the trend, with speculatioo of a possible takeover mooted in the weekeod press.

The shares, up 23 at one stage, ended the day as one of the strongest performers in the Footsie with a rise of 15 at 670p. They were hoosted by talk that Viacom, of the US, might be interested in making an offer for Pearson.

Rumours about Pearson have circulated for some time. Late last year Henderson Crosthwaite produced a break-up valuation of 900p a share. It was said that Granada had been prepared to pay that orice but was rejected by shareholders and went for Forte instead.

Turnover was slight yesterday and there was no reason, apart from the market's current search for likely hid candidates, to think an offer was being seriously considered.

Ms Lorua Tilbian of Panmure Gordoo said she had a fair value target of 685p a share for Pearson and yesterday's rise was easily justified.

BA grounded

Transport leader British Airways slithered to the bottom of the Footsie rankings in beavy volume following a negative change of stance and a modest profits downgrade by top

BZW, which has had doubts about the shares for some weeks, moved from hold to sell on the grounds that BA had slipped to a yield discount to the overall market of almost 20

per cent. And Credit Lyonnais Laing trimmed current year profits estimates by £15m to £565m on the back of a costs spurt in the third quarter.

The shares dropped 19 to finish at 502p in turnover of 11m. some five times more than an average day's volume for the

There was talk that one large broker had grossly overestimated the third-quarter

BAe nosedives

British Aerospace went into a nosedive in modest turnover amid news that it was participating in a consortium which is interested in huying Fokker, the troubled Dutch aircraft maker. The shares, one of last year's strongest Footsie performers, closed 24 off at 875p.

Not helping the stock was a change of stance by Kleinwort Benson, which switched from huy to hold. The shares have outpaced the market as a whole by more than 50 per cent over the past 12 months. One top engineering analyst said: "It is a fairly clean cut case of profit-taking.

IMI and GKN, both of which bave suffered from worries about the German economy lately, moved up against the market trend. The former put on 12 at 332p and GKN gained 7 at 859b.

Lasmo, the exploration and production group, firmed a penny to 167p as Kleinwort

Benson raised its net asset valuation. The broker increased its estimate by 13p to 184p following encouraging figures from Anadarko, one of the operators of the Algerian field in which Lasmo has 25

per cent. Other oil issues were weak ahead of the UN meeting to consider allowing Iraq to begin exporting again. Vodafone fell hack in heavy

volume oo news of tariff changes at rival mobile phones operator Cellnet, which is part of the BT group.

Analysts said talk of a price war between the two market leaders was mostly misplaced. The Cellnet move was described by one sector watcher as bringing the com-pany into line with the rest of the industry. Vodafone shed

65: tp 2371:p in 20m traded. Securicor, which has a 40 per cent stake in Cellnet, continued to move ahead, adding 8 at

928p following a move from undervalued to huy at Hoare Govett. Bardon hardened a penny to

40p in 7.1m traded as the company fuelled hopes for further rationalisation within the construction sectors. It confirmed receot discussions with rival building mate-

rials group CAMAS but said the talks had been discontinued. CAMAS softened a penny Broadcasters benefited from active huying again on the

hope of more takeovers or mergers within the sector. Scottish Television was boosted last week by its inclusion in the FT-SE Mid 250 index and some speculation that removal of monopoly constraints could prompt a bid by Mirror Group.

Yesterday, the shares were up again, closing 36 higher at 566p. However, the company was keen to disassociate itself

from hid talk and pointed instead to its 20 per ceot stake in HTV, which has gained in value as the latter has increasingly been considered a target.

Also, SBC Warburg is believed to be preparing a note commending the shares up to 600p - or 800p in the event of a bid. HTV rose 5 to 347p and Carlton Communications. seen as a possible buyer,

Meanwhile, Mirror Group gained 4 at 195p as it raised the price of the Daily Record in Scotland and the Saturday Mirror. More importantly, the Sun followed suit for its own Saturday paper, giving rise to the possibility that the price war is well and truly over and Mirror would soon he able to raise Monday to Friday prices.

Retailer Dixons was among a handful of stocks that managed to beat off the downward pressure in the market yesterday. The shares closed 2 ahead at 422p, having touched 425p

on healthy turnover of 7.3m. The news last week that Hanson is closing 195 Powerhouse electrical retailing shops in the south and midlands was cited by analysts yesterday as being positive for companies such as Dixons and Kingfisher.

Mr Robert Snaith at Strauss Turnbull believes Dixons to be the most attractive among the leading retail stocks. Kingfisher followed the market lower and eased 4 to 5280.

Not even news that Hanson is considering offering shareholders a special dividend could banish continued doubts about the four-way demerger announced last week The shares gave up 41/2 to 1921/2p in trade of 16m.

Sentiment was weakened further by a negative note from NatWest Securities. There was profit-taking in

Lloyds Chemists as the market waited to hear if German gronp Gehe is to launch a counter-bid to UniChem's agreed offer. Shares in the UK retailer relinquished 7 at 447p. while UniChem finished unchanged at 247p. Boots was down 8 to 615p, although there was talk late in

the session that NatWest Securities was about to come out with a positive note. Many brokers moved to downgrade full-year profits

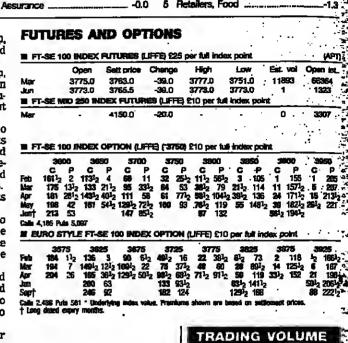

expectations. The list included BZW, which reduced its forecast by £10m to £122m and remains a seller of the shares. Strauss Turnbull also cut its forecast, by 58m to £122m.

Gases group BOC rose 5 to 928p as a shortage of available stock squeezed the share price higher ahead of figures due next week. Renewed optimism for a bid

in the electricity sector helped Midlands move forward 5 to 394p and London improve II to British Gas floated 6 higher to 2441:sp on weekend newspa-

per reports that Mr Cedric Brown, the chief executive who has attracted heavy media criticism, might be resigning. Ferguson International, the

labels and hangers group. dropped 21 to 196p on a profits

Nasdaq rises as Dow stocks settle back

WORLD STOCK MARKETS

Wall Street

US shares were mixed in midday trading as big companies continued to give up some of last week's gains, while the technology-rich Nasdaq composite rose, writes Lisa Bransten in New York.

At 1 pm, the Dow Jones Industrial Average was off 15.18 at 5,358.81. The Standard & Poor's 500 was 0.74 lower at 635.11 and the American Stock Exchange composite fell 0.86 to 554.68. NYSE volume was 195m shares.

Weakness in both the hond and currency markets weighed on equities vesterday. Bonds were lower as traders prepared for a wave of new supply to hit the market, starting today, and the dollar fell amid concern that the German economy might not be weakening as much as many traders originally believed.

Meanwhile, the Nasdaq rose 2.92 to 1,075.03 on increases in some of its higgest computerrelated components, Microsoft added S1's at \$94% and Intel gained \$% at \$57%. Dell Computer jumped \$21, or 8 per cent

Shares in several Nasdaqtraded health maintenance organisations, however, slipped oo uncertainty about medical costs. US Healthcare, which early yesterday announced stronger than expected fourthquarter earnings but warned that medical costs would grow this year, dropped \$4 or 8 per cent to \$44%. Oxford Health Plans, which is due to report results today, shed \$2% or 4 per

cent to \$631/2. W.R. Grace added \$% at \$69% on news that Fresenius, the German bealthcare group, had topped Baxter International's \$3.8bn bid for Grace's National Medical Care unit. On Friday, Grace leapt \$7% or 12 per cent to \$69% on news of Baxter's unsolicited bid.

Two components of the Dow Goodyear Tire & Rubber and Minnesota Mining and Manufacturing - posted fourth-quarter earnings in line with Wall Street expectations early yesterday. Goodyear lost \$% at \$47 after reporting earnings of 96 cents a share and 3M fell \$% to \$653 after putting operating earnings at 75 cents a share.

Canada

Torooto was weak in midsession trade as profits were taken after last week's record setting rally. The TSE 300 composite index had fallen 20.04 by noon to 5,011.93 in volume of 47.7m shares.
Golds showed relative

strength after Goldman Sachs upgraded its ratings on several producers. However, Barrick Gold traded just C\$14 higher at C\$43%, unable to sustain a year's peak of C\$44%, and TVX Gold turned back after an early advance to stand CS14 easier at C\$1414.

Among weak communications stocks, Northern Telecom surrendered C\$1 at C\$61% and Tee-Comm Electronics sank C\$12 to C\$14.

Canadian Imperial Bank of Commerce lost CS% at C\$40%.

São Paulo down 1.5%

Although MEXICO CITY was closed for a public holiday, the region was relatively active in midsession dealings. Bear Stearns said yesterday that it had readjusted its recommended weightiogs for Latin American stocks, moving to an overweight position in Argentina and Brazil in its model portfolio, and reducing Mexican exposure to "significant underweight'

SAO PAULO drifted lower, with dealers suggesting that profit-taking was to blame following the market's steady

progress since the start of the year. By midday the Bovespa index was down 820.58 or 1.5 per cent at 53,288.

· Lehman Brothers said yesterday that it had reduced its earnings forecasts for Mexican stock Telmex, but added that nevertheless It was maintaining an "outperform" rating. Specifically, Lehman reported that it had lowered estimates for Telmex to 37 cents per ADS, from 53 cents, for the fourth quarter of 1995 and to \$2.50, from \$2.65, for the full 1995 year.

Senior bourses fall on weakness in bonds, dollar

Falling bond markets and a pay Grace \$2.3bn (DM3.4bn) as weaker dollar knocked share prices across Europe yesterday, writes Our Markets Staff.

Mr Michael Hughes, global strategist at BZW in London, said that bonds were having a reaction because: "Given the amount of reflation being attempted by governments around the world, people have started to ask whether there might be inflationary pressures down the road."

FRANKFURT's turnover dropped again, from DM9.6bn to DM7.9bn, and the dollarsensitive cyclicals took more punishment as the Dax Index fell 42.97 or 1% per cent to an Ibis-indicated 2,416.84.

However, the outstanding share price movement of the day was a winner. Fresenius prefs closed Ibls trading DM14.50 or 11.15 per cent higher at a new peak of DM144.50 after the German company, a world leader in products for dialysis therapy, agreed to merge its kidney dialysis business with that of Grace's National Medical Care unit, the biggest US provider of kidney dialysis.

Fresenius was capitalised at DM2.6bn ahead of the event; NMC agreed to borrow, and

part of the deal; and analysis yesterday wondered whether Fresenius might have bitten off more than it could chew.

Elsewhere, a 38 per cent drop in net profits at Asko left the retailer down DM36 at DM810: but a sustained profits forecast from Metaligesellschaft pushed the revived conglomerate 36 pfgs higher to DM36.10.

PARIS saw an element of profit-taking following the market's solid gains over the previous week. The CAC-40 index receded 36.62 or 1.8 per cent to 1,985.59. Turnover was under FFr4bn.

Michelin confirmed that it would be carrying out a major reorganisation but the shares were FFr4 easier at FFr214.20. Usinor, dropped FFr3.45 to FFr73.30 in line with the trend, although its International announced an increase in its turnover for 1995. Renault slipped FFr5.70 to

FFr145.20 after noting that the second half of 1995 had been "difficult", but it expected an improvement during the forthcoming 12 months.

AMSTERDAM's financials

dating a DM270m provision by

SFr1,247, while Zurich Insurance dipped SFr8 to SFr319 and Swiss Re gave up SFr30 to SFr1.194 Nestlé retreated SFr15 to SFr1,269 in spite of upheat comments on the outlook for 1996 profits from the chairman

and chief executive. Among pharmaceuticals Roche certificates relinquished SFT180 at SFT8,760. Alusuisse, down SFr8 at SFr953, fell less sharply than the market, as it continued to

benefit from positive sentiment

after Friday's preliminary net profits estimate. Adia, up SFr2 at SFr210, and SMH bearers. SFr6 better at SFr733, benefited from positive brokers' reports.

MILAN closed off the day's lows after profit-taking following last week's rally. The-Comit index lost 4.49 at 626.07 and the real-time Mibtel index finished 127 weaker at 9,989, up from 9.964.

Fiat fell L109 to L5.168 after a forecast from the chief operat-ing officer that the group would record only limited growth in sales this year. Snia, the chemicals company

controlled by Fiat, was automatically suspended after ris-ing L56.6 to L633 in hefty volume of 715,000 shares, compared with the recent daily average of 30,000. Analysts suggested that the activity might be linked to speculation about a revival of the SuperGe-mina plan, involving Snia. Olivetti fell L13.4 to L958.1

and the De Benedetti controlled Cofide lost L10.9 to L569.2 as Mr Carlo de Benedetti aaid that "unknown" huyers had snapped up more than 5 per cent of the company on the market on Friday.

BRUSSELS also followed bonds lower and the Bel-20

s decline of 18.54 or 1 per cent at 1.685.99.

There was widespread sell. ing, although many investors took the opportunity to sell financials in particular. Genér. ale Bank gave up BFr250 to BFr11,375 and Kredietbank

eased BFr160 to BFr8,690. Dollar weakness also played its part. Petrolina, which announced 1995 earnings last week that were more or less in line with expectations, retreated BFr140 to BFr8.720.

WARSAW was a shade easier after striking a new 52. week high on Friday, and the decline in rurnover was a reflection that leading instentional investors were staying out of the market for the time

The Wig index softened 0.5 per cent to 10,452.4, as turnover fell by almost 20 per cent to 148m zlotys. Chartists observed that the

Wig was likely to find strong support at the 10,000 level. while a period of stabilisa or even a correction would be

Nikkei off 1.2%, Taipei again hit by China worries

Tokyo

A slide in the dollar, and consolidation after last week's gains, were blamed as the Nikkei average fell 1.2 per cent, writes Our Markets Staff.

The 225-sbare index finished 250.65 down at 20.653.38 after a day's low of 20,623.88 and high of 20,882.20. Institutional investors took profits in low-priced, large-capital issues, last week's strong performers.

Volume fell to 516m shares from 773m and declines led rises by 821 to 274, with 129 issues unchanged. The Topix index of all first section stocks lost 16.51 at 1,601.00 and the Nikkel 300 was off 3.08 at In London the ISE/Nikkei 50

index shed 4.50 to 1,395.88. With sentiment weakened by the yen's rebound, electronics exporters were mostly weaker. Canon dipped Y40 to Y1,960, Toshiba Y8 to Y832 and Matsushita Electric Y40 to Y1,720. Dealers, however, were encouraged by active individual buying in speculative and resource-related shares. Nonferrous metals issues were lifted by the recent strength of bullion, Sumitomo Metal Mining rising Y20 to Y1,070 and Mitsui Mining & Smelting Y10 to Y471.

Meanwhile, Green Cross soared Y27 to Y755 in response to a newspaper report on its development of a genetically engineered serum, albumin. Rhythm Watch was both the most heavily traded stock on the first section and the biggest percentage gainer, putting on its daily limit of Y100 at Y615 in 20.8m shares dealt. Traders said the main attraction of shares in the clock maker appeared to be their

Equities fell back as the golds sector lost some of its shine

owing to weakness in the price

of builion. The overall index

shed 48.8 to 6,946.7, while

industrials lost 63.0 at 8,542.5

and golds 24.5 at 1,878.7.

launch of its new 64-bit game machine in the US until September 30 this year from the original target of April, citing difficulty in making enough hardware due to a chip supply

Daiws Bank receded Y12 to Y778 after saying that it had ended its hanking operations in the US, selling them to Sumitomo Bank as part of a deal with the US government following a scandal over the operations' huge trading

Roundup

TAIPEI managed to end off the day's low point following heavy selling at mid-morning after a Hong Kong newspaper reported that China would begin a large military exercise near the island later this week.

The weighted Index lost 30.83 or 0.6 per cent at 4,759.25 after touching 4,695.86. Turnover came to T\$16.9bn.

Brokers attributed the lats rally to possible buying by investors and institutions associated with the ruling Nationalist party. Such groups had been trying to support the market ahead of next month's pres-idential election. Some purchasing was also noted after an announcement of a 2.3 per cent rise in consumer prices for January, Brokers commented that the increase raised hopes that the central bank could ease monetary policy.

The electronics sector was the most active area as United Microelectronics fell \$2 to T\$58. SINGAPORE climbed to a record close on broadly based demand for blue chips by foreign funds. The Straits Times Industrial index, which does not include banks or property

shares, rose 15.84 to 2.484.01.

Leading the index higher,

De Beers retreated R2 to R126, Vaal Reefs R17 to R402

and Amgold R5.50 to R409.

Iscor, manufacturer of steel

products, eased 4 cents to

R3.15 and South African Brew-

eries fell 74 cents to R137.50.

S813.80 and Singapore Press 50 cents at SS15.00.

HONG KONG edged forward on continued rotational buying of utilities and other recent underperformers. The Hang Seng index ended 14.72 firmer at 11,484.12, off an early high of 11,521.06. Turnover dipped to HK\$8.9bn.

Analysts said that a quarter percentage point cut in bank rates which took effect yesterday had been fully factored in and failed to influence trade. HK Telecom added 45 cents

at HK\$16.10 on talk of another covered warrant issue. It rose 75 cents on Friday. China Light climbed 70 cents to HK\$38.70 on news that the

company had proposed co-operation with HK Electric on power generation.

SEOUL finished higher on a strong performance by finan-

it-taking brought shares back from their best levels. The composite index ended 6.05 up at 290.68 as foreign and local demand pushed the banking sub-index 3 per cent ahead. Commercial Bank rose Won400 to Won8,700, Korea Exchange Bank Won300 to Won10,400 and Hyundai Securi-

cials, although some late prof-

KUALA LUMPUR was lifted by selective demand for blue chips and speculative buying of second liners and the composite index gained 6.70 at 1.079.86, after an intra-day peak for the year of 1,082.02.

ties Won800 to Won15,300,

SYDNEY was in retreat, with industrial stocks in particular dragging the broader market lower. The All Ordinarles index shed 21.5 to 2,271.7. Trading volume reached 319.8m shares worth A\$682.3m.

Dealers said some investors

appeared to be sidelined ahead of the federal election, while others were watching to see whether gold hullion prices moved higher this week. The gold shares index eased 3.7 to Advance Bank made 19 cents

at A\$12.04, off an intra-day

A\$12.28 high, as rumours that Westpac might launch a takeover bid for Advance resurfaced. Westpac was 11 cents cheaper at A\$6.28. DHAKA retreated as many

investors feared that the country's political crisis could worsen. The all-share index slipped 3.5 to 770.0.

MANILA closed lower after late buying failed to erase declines seen in early trade on worries about a rise in the inflation rate over the first quarter of the year.

The composite index shed

8.02 at 2,919.24, off a day's low

of 2.898.90. Volume was 2.4hn shares worth 2.2bn pesos. BOMBAY added to last week's 12.3 per cent rise, the BSE 30-share index advancing 60.49 to 3,233.32 in volatile Turnover in Reliance indus-

tries touched an all-time high

of 43.6m shares on the National

Stock Exchange as speculators covered short positions before the last day of the current account today. Reliance ended Rs13.90 higher at Rs218.80 on the NSE. JAKARTA was slightly

firmer in spite of profit-taking in blue chips, particularly sec-tors dependent on consumer spending.

The composite index rose 3.57 or 0.6 per cent to 591.14 after touching a low of 587.53. Dealers remarked that Inves tors were switching their port folios to second line stocks.

WORLD PHARMACEUTICALS

25 & 26 March 1996, London Hilton on Park Lane

Leaders from all parts of the healthcare delivery chain will address this annual FT conference, the seventh in a popular series. Industry experts from Europe and North America will consider how the pharmaceutical industry needs to transform itself and create new organisations with new cultures to meet the challenges of the changing marketplace.

Industry leaders will examine the key issues:

- Seeking New Models
- Revitalising R&D
- - Capitalising on Consolidation

Speakers include:

Mr Jan Leschly Chief Executive SmithKline Beecham plc

Dr Thomas F McKillon Chief Executive Officer Zeneca Pharmaceuticals

Dr Hans Jürgen Ahrens Managing Director AOK-Bundesverband

Mr Michel de Rosen President & Chief Executive Officer Rhône Poulenc Rorer Inc

Responding to Stakeholder Expectations

Mr Eli Hurvitz

President & Chief Executive Officer

Teva Pharmaceutical Industries Ltd Dr Chris Evans OBE Founder

Chiroscience plc Dr Henry A McKinnell Jr **Executive Vice President**

Pfizer Inc Mr Gerald Malone MP Minister of State for Health, UK
